Introduction

This seminar offers a comprehensive overview of the city's urban and architectural history, from the Roman founding to the contemporary era. Lectures and field studies follow a chronological sequence in order to highlight the inter-relation of urban design strategies, landscape and public space projects with cultural, economic and political programs. An important theme of the seminar will be to explore urban regeneration projects that reconfigure historic sites and neighborhoods.

The focus will be on traditional and contemporary public spaces in the city. For the last 30 years Barcelona has been an important center for debate about public space. The city presents a wide array of historic but also contemporary case studies for exploring the civic realm, new definitions of landscape, Mediterranean density and hybrid public spaces that combine logistical and infrastructural issues with public space.

Objectives

1. To understand historic and contemporary issues affecting urban development, urban quality and urban life
To develop skills and ability to conduct critical research and comparative analysis of past and current urban and architectural initiatives with other case studies.
2. To understand broader social, political, economic, and design impulses underlying urban transformation.
3. To develop the skills, techniques & vocabulary to describe, analyze and understand urban form and its evolution
4. To critically review theories, methods and concepts in urban design
5. To be able to critically analyze urban form.
6. To be able to articulate a personal approach to urban design

Content

Urban Design Theory/Urban Systems will be coordinated among the three locations in Calgary, Melbourne and Barcelona. The course will consist of lectures, site visits, and case studies in public space.

Teaching Approach

The class will meet two times weekly from September 13th to October 20 on Wednesday and Friday mornings 10:00 to 1:00. A final presentation session will be in November. Please check the calendar and syllabus for days, times and meeting points. Lecture sessions will be 3 hours.

Grading Scale

Faculty shall use the following methods for reporting grades and for determining final grades. Final grades shall be reported as letter grades, with the grade point value as per column 2. Final grades shall be calculated according to the 4-point range in column 3. Should faculty members evaluate any individual exams or assignments by percentage grades, the equivalents shown in column 4 shall be used.

Students must be informed of the method of calculation, and should be able to, from the grades provided by the instructor, determine their standing.

Final grades will be reported as letter grades, with the final grade calculated according to the 4-point range. Assignment(s) evaluated by percentage grades will be converted into letter grade equivalents as shown.

Grade	Grade Point Value	4-Point Range	Percent	Description
A+	4.00	4.00	92.5-100	Outstanding - evaluated by instructor
A	4.00	3.85-4.00	85-92.49	Excellent - superior performance showing comprehensive understanding of the subject matter
A-	3.70	3.50-3.84	80-84.99	Very good performance
B+	3.30	3.15-3.49	76-79.99	Good performance
B	3.00	2.85-3.14	73-75.99	Satisfactory performance
B-	2.70	2.50-2.84	70-72.99	Minimum pass for students in the Faculty of Graduate Studies
C+	2.30	2.15-2.49	66-69.99	All final grades below B- are indicative of failure at the graduate level and cannot be counted toward Faculty of Graduate Studies course requirements.
C	2.00	1.85-2.14	63-65.99	
C-	1.70	1.50-1.84	60-62.99	
D+	1.30	1.15-1.49	56-59.99	
D	1.00	0.50-1.14	50-55.99	
F	0.00	0-0.49	0-49.99	

Notes:

- A student who receives a "C+" or lower in any one course will be required to withdraw regardless of their grade point average (GPA) unless the program recommends otherwise. If the program permits the student to retake a failed course, the second grade will replace the initial grade in the calculation of the GPA, and both grades will appear on the transcript.

Readings

The required and recommended readings for the course are listed with the schedule of classes.

Notes:

1. Written work, term assignments and other course related work may only be submitted by e-mail if prior permission to do so has been obtained from the course instructor. Submissions must come from an official University of Calgary (ucalgary) email account.
2. Academic Accommodations. Students who require an accommodation in relation to their coursework or to fulfil requirements for a graduate degree, based on a protected ground other than disability, should communicate this need, preferably in writing, to their Instructor or the designated contact person in EVDS, Jennifer Taillefer (jtaillef@ucalgary.ca). Students who require an accommodation unrelated to their coursework or the requirements for a graduate degree, based on a protected ground other than disability, should communicate this need, preferably in writing, to the Vice-Provost (Student Experience). For additional information on support services and accommodations for students with disabilities, visit www.ucalgary.ca/access/

3. Plagiarism - Plagiarism involves submitting or presenting work in a course as if it were the student's own work done expressly for that particular course when, in fact, it is not. Most commonly plagiarism exists when:(a) the work submitted or presented was done, in whole or in part, by an individual other than the one submitting or presenting the work (this includes having another impersonate the student or otherwise substituting the work of another for one's own in an examination or test),(b) parts of the work are taken from another source without reference to the original author,(c) the whole work (e.g., an essay) is copied from another source, and/or,(d) a student submits or presents work in one course which has also been submitted in another course(although it may be completely original with that student) without the knowledge of or prior agreement of the instructor involved. While it is recognized that scholarly work often involves reference to the ideas, data and conclusions of other scholars, intellectual honesty requires that such references be explicitly and clearly noted. Plagiarism is an extremely serious academic offence. It is recognized that clause (d) does not prevent a graduate student incorporating work previously done by him or her in a thesis. Any suspicion of plagiarism will be reported to the Dean, and dealt with as per the regulations in the University of Calgary Graduate Calendar.
