**Petroleum Origin, Accumulation and Technology**

Petroleum Origin, Accumulation and Technology is being offered during the Winter 2020 term in a seven-week format. This lecture plus workshop, immersive format, is designed to efficiently inform and educate students on a range of new concepts, technologies and the process of technology innovation itself. A brief description is given below. The course is suitable for Geoscience grad students.

The course will be offered from week of January 16th-March 5th, 2020 (6 hours every Thursday-SS 008 9am-4pm). The grade will be determined by a final project, with written and oral components. The oral component is due on March 5th as a project presentation while the extended abstract paper, is due March 20th, 2020.

If you are interested in registering for this geoscience grad course in Winter 2020, please contact Thomas Oldenburg (toldenbu@ucalgary.ca).

Instructors Profs., Larter, Huang, Oldenburg and guest workshop participants.

----------

**Course Description:**

This course, in an intensive lecture/workshop format, will provide an overview of the principles of petroleum origin, from source rock deposition, petroleum generation and migration processes through to understanding in-reservoir alteration processes responsible for heavy oil formation. You are introduced to molecular geochemistry, biomarkers and the tools of the petroleum geochemist in a workshop format, to introduce a diverse range of new technical content and practical tools. Emphasis is placed on methods and technologies for reservoir characterization based on assessing heterogenous fluid characteristics in terms of the processes producing fluid property heterogeneity. The course also examines past present and future petroleum recovery technology approaches and teaches students the tools of the innovator and how to invent their own potential solutions to the energy and environmental challenges of the oil and gas industry during our energy transition.

**Learning Objectives:**

By the end of this course, students should be able:

1. to describe and understand the processes involved in the generation, migration and accumulation of petroleum and be aware of, and able to critically assess, the key literature;

2. to identify and understand the methods of the petroleum geochemist and the technology for the analysis of petroleum system components and processes;

3. to apply petroleum geochemical data to assess correlations between oils and oil – source rock and to examine the impact of source facies and maturity on petroleum composition

4. to explain the origin of heavy oil and the impact of in-reservoir biodegradation on fluid composition and production;

5. to understand the nature of technology, the difference between discovery, invention and innovation and how to invent their own solutions to the energy and environmental challenges of the oil and gas industry during our energy transition.

Seven weeks * 6 hours

Jan 16th: Course Intro: Presentation skills and techniques: technology and innovation: Industry challenges, climate issues and CO2 mitigation challenges.

Jan 30th: Petroleum system processes. Petroleum generation, migration

Feb 6th: Petroleum system processes. Phase behavior and reservoir charging

Feb 13th: Reservoir geochemistry-oils, waters and gases. Biodegradation and heavy oil. Shale reservoirs-shale gas shale oil

Feb 27th: Innovation workshop

March 5th: Project presentations
Course Site:
D2L: GLGY 699.60 L04-(Winter 2020)-Selected Topics in Geology

Note: Students must use their U of C account for all course correspondence.

2. Requisites:
See section 3.5.C in the Faculty of Science section of the online Calendar.

Prerequisite(s):
Consent of the Department. MAY BE REPEATED FOR CREDIT

3. Grading:
The University policy on grading and related matters is described in F.1 and F.2 of the online University Calendar. In determining the overall grade in the course the following weights will be used:

- Group project 30% [Technical Content (50%), Innovation and Originality (30%), Communication (20%)]
- Extended abstract 70% [Research, coherence and content (60%), Originality and pizzazz (20%), Style and presentation (20%)]

Each piece of work (reports, assignments, quizzes, midterm exam(s) or final examination) submitted by the student will be assigned a grade. The student's grade for each component listed above will be combined with the indicated weights to produce an overall percentage for the course, which will be used to determine the course letter grade.

The conversion between a percentage grade and letter grade is as follows.

4. Missed Components Of Term Work:
In the event that a student misses the midterm or any course work due to illness, supporting documentation, such as a medical note or a statutory declaration will be required (see Section M.1; for more information regarding the use of statuary declaration/medical notes, see FAQ). Absences must be reported within 48 hrs.

The regulations of the Faculty of Science pertaining to this matter are found in the Faculty of Science area of the Calendar in Section 3.6. It is the student's responsibility to familiarize themselves with these regulations. See also Section E.3 of the University Calendar.

5. Scheduled Out-of-Class Activities:
There are no scheduled out of class activities for this course.

6. Course Materials:
There are no additional course materials required for this course.

7. Examination Policy:
No aids are allowed on tests or examinations.
Students should also read the Calendar, Section G, on Examinations.

8. Approved Mandatory And Optional Course Supplemental Fees:
There are no mandatory or optional course supplemental fees for this course.

9. Writing Across The Curriculum Statement:
For all components of the course, in any written work, the quality of the student's writing (language, spelling, grammar, presentation etc.) can be a factor in the evaluation of the work. See also Section E.2 of the University Calendar.

10. Human Studies Statement:
See also Section E.5 of the University Calendar.

11. Reappraisal Of Grades:
A student wishing a reappraisal, should first attempt to review the graded work with the Course coordinator/instructor or department offering the course. Students with sufficient academic grounds may request a reappraisal. Non-academic grounds are not relevant for grade reappraisals. Students should be aware that the grade being reappraised may be raised, lowered or remain the same. See Section I.3 of the University Calendar.

a. **Term Work:** The student should present their rationale as effectively and as fully as possible to the Course coordinator/instructor within 10 business days of either being notified about the mark, or of the item’s return to the class. If the student is not satisfied with the outcome, the student shall immediately submit the Reappraisal of Graded Term Work form to the department in which the course is offered. The department will arrange for a re-assessment of the work if, and only if, the student has sufficient academic grounds. See sections I.1 and I.2 of the University Calendar.

b. **Final Exam:** The student shall submit the request to Enrolment Services. See Section I.3 of the University Calendar.

**12. Other Important Information For Students:**

a. **Mental Health** The University of Calgary recognizes the pivotal role that student mental health plays in physical health, social connectedness and academic success, and aspires to create a caring and supportive campus community where individuals can freely talk about mental health and receive supports when needed. We encourage you to explore the mental health resources available throughout the university community, such as counselling, self-help resources, peer support or skills-building available through the SU Wellness Centre (Room 370, MacEwan Student Centre, Mental Health Services Website) and the Campus Mental Health Strategy website (Mental Health).

b. **SU Wellness Center:** The Students Union Wellness Centre provides health and wellness support for students including information and counselling on physical health, mental health and nutrition. For more information, see www.ucalgary.ca/wellnesscentre or call 403-210-9355.

c. **Sexual Violence:** The University of Calgary is committed to fostering a safe, productive learning environment. The Sexual Violence Policy (https://www.ucalgary.ca/policies/files/policies/sexual-violence-policy.pdf) is a fundamental element in creating and sustaining a safer campus environment for all community members. We understand that sexual violence can undermine students' academic success and we encourage students who have experienced some form of sexual misconduct to talk to someone about their experience, so they can get the support they need. The Sexual Violence Support Advocate, Carla Bertsch, can provide confidential support and information regarding sexual violence to all members of the university community. Carla can be reached by email (svsa@ucalgary.ca) or phone at 403-220-2208.

d. **Misconduct:** Academic misconduct (cheating, plagiarism, or any other form) is a very serious offence that will be dealt with rigorously in all cases. A single offence may lead to disciplinary probation or suspension or expulsion. The Faculty of Science follows a zero tolerance policy regarding dishonesty. Please read the sections of the University Calendar under Section K. Student Misconduct to inform yourself of definitions, processes and penalties. Examples of academic misconduct may include: submitting or presenting work as if it were the student's own work when it is not; submitting or presenting work in one course which has also been submitted in another course without the instructor's permission; collaborating in whole or in part without prior agreement of the instructor; borrowing experimental values from others without the instructor's approval; falsification/fabrication of experimental values in a report. These are only examples.

e. **Assembly Points:** In case of emergency during class time, be sure to FAMILIARIZE YOURSELF with the information on assembly points.

f. **Academic Accommodation Policy:** Students needing an accommodation because of a disability or medical condition should contact Student Accessibility Services in accordance with the procedure for accommodations for students with disabilities available at procedure-for-accommodations-for-students-with-disabilities.pdf.

Students needing an accommodation in relation to their coursework or to fulfill requirements for a graduate degree, based on a protected ground other than disability, should communicate this need, preferably in writing, to the Sr. Instructor of the Department of Geoscience, Dr. Rudi Meyer by email rmeyer@ucalgary.ca or phone 403-210-7848. Religious accommodation requests relating to class, test or exam scheduling or absences must be submitted no later than 14 days prior to the date in question. See Section E.4 of the University Calendar.

g. **Safewalk:** Campus Security will escort individuals day or night (See the Campus Safewalk website). Call 403-220-5333 for assistance. Use any campus phone, emergency phone or the yellow phones located at most parking lot pay booths.
h. **Freedom of Information and Privacy:** This course is conducted in accordance with the Freedom of Information and Protection of Privacy Act (FOIPP). Students should identify themselves on all written work by placing their name on the front page and their ID number on each subsequent page. For more information, see [Legal Services](#) website.

i. **Student Union Information:** [VP Academic](#), Phone: 403-220-3911 Email: suvpaca@ucalgary.ca. SU Faculty Rep., Phone: 403-220-3913 Email: sciencerep@su.ucalgary.ca. [Student Ombudsman](#), Email: ombuds@ucalgary.ca.

j. **Internet and Electronic Device Information:** Unless instructed otherwise, cell phones should be turned off during class. All communication with other individuals via laptop, tablet, smart phone or other device is prohibited during class unless specifically permitted by the instructor. Students that violate this policy may be asked to leave the classroom. Repeated violations may result in a charge of misconduct.

k. **Surveys:** At the University of Calgary, feedback through the Universal Student Ratings of Instruction (USRI) survey and the Faculty of Science Teaching Feedback form provides valuable information to help with evaluating instruction, enhancing learning and teaching, and selecting courses. Your responses make a difference – please participate in these surveys.

l. **Copyright of Course Materials:** All course materials (including those posted on the course D2L site, a course website, or used in any teaching activity such as (but not limited to) examinations, quizzes, assignments, laboratory manuals, lecture slides or lecture materials and other course notes) are protected by law. These materials are for the sole use of students registered in this course and must not be redistributed. Sharing these materials with anyone else would be a breach of the terms and conditions governing student access to D2L, as well as a violation of the copyright in these materials, and may be pursued as a case of student academic or non-academic misconduct, in addition to any other remedies available at law.
