# REMOTE CONNECTION TO THE UNIVERSITY OF CALGARY

Macintosh (OS X 10.6)

Establishing remote connection to the University of Calgary consists of two procedures: Create Secure VPN Connection and Connect to Server.
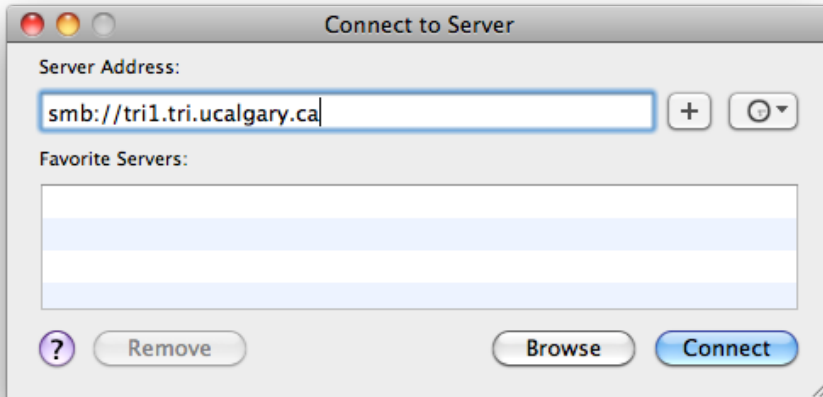

CREATE SECURE VPN CONNECTION.
1. Open **System Preferences** located in the **Applications** folder.
2. Open **Network** preferences
3. Select the + below the list of networks on left
4. From the **Interface** list select **VPN**
5. From the **VPN Type** list select **PPTP** and click **Create** button.
6. Type in your credentials:
    a. In **Server Address** type: vpn.tri.ucalgary.ca
    b. In **Account Name** type: tri\YOUR_ACCOUNT_NAME
       (Substitute YOUR_ACCOUNT_NAME with your user account)
    c. Select **Authentication Settings…**
    d. In **password** type your password and click **Ok**
    e. Click **Connect** button.

CONNECT TO SERVER

1. In the Finder: from the **Go** menu select **Connect to Server…**
2. In Sever Address type: **smb://tri1.tri.ucalgary.ca** and click **Connect** button

3. Type in your credentials:
   a. In Workgroup or Domain type: TRI
   b. In Name type YOUR_ACCOUNT_NAME
      (Substitute YOUR_ACCOUNT_NAME with your user account)
   c. In Password type your password.
4. Select your department and click **OK** button.
5. You should see a new icon on your desktop representing shared network drive.
