COURSE OUTLINE

1. **Course:** PHYS 303, Quantum Mysteries and Paradoxes - Fall 2020
   Lecture 01: MWF 14:00 - 14:50 - Online

<table>

<tr>
<td>Dr Christoph Simon</td>
<td><a href="mailto:csimo@ucalgary.ca">csimo@ucalgary.ca</a> please use email</td>
<td></td>
<td>ONLINE</td>
<td>Thursday 4-5pm, online (zoom invite will be sent by email)</td>
</tr>
</tbody>
</table>

   **Online Delivery Details:**
   This course is being offered online in real-time via scheduled meeting times, you are required to be online at the same time.

   Zoom invites will be sent by email. Lectures will be recorded and uploaded to D2L.

   **Course Site:**
   D2L: PHYS 303 L01-(Fall 2020)-Quantum Mysteries and Paradoxes

   **Note:** Students must use their U of C account for all course correspondence.

2. **Requisites:**
   See section 3.5.C in the Faculty of Science section of the online Calendar.

3. **Grading:**
   The University policy on grading and related matters is described in F.1 and F.2 of the online University Calendar.

   In determining the overall grade in the course the following weights will be used:

<table>
<thead>
<tr>
<th>Component(s)</th>
<th>Weighting %</th>
<th>Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>Assignments (approximately biweekly)</td>
<td>100</td>
<td></td>
</tr>
</tbody>
</table>

   Each piece of work (reports, assignments, quizzes, midterm exam(s) or final examination) submitted by the student will be assigned a grade. The student's grade for each component listed above will be combined with the indicated weights to produce an overall percentage for the course, which will be used to determine the course letter grade.

   The conversion between a percentage grade and letter grade is as follows.

<table>
<thead>
<tr>
<th>Minimum % Required</th>
<th>A+</th>
<th>A</th>
<th>A-</th>
<th>B+</th>
<th>B</th>
<th>B-</th>
<th>C+</th>
<th>C</th>
<th>C-</th>
<th>D+</th>
<th>D</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>98</td>
<td>95</td>
<td>92</td>
<td>88</td>
<td>84</td>
<td>80</td>
<td>76</td>
<td>72</td>
<td>68</td>
<td>64</td>
<td>60</td>
</tr>
</tbody>
</table>

4. **Missed Components Of Term Work:**
   The university has suspended the requirement for students to provide evidence for absences. Please do not attend medical clinics for medical notes or Commissioners for Oaths for statutory declarations.

   In the event that a student legitimately fails to submit any online assessment on time (e.g. due to illness etc…), please contact the course coordinator, or the course instructor if this course does not have a coordinator to arrange for a re-adjustment of a submission date. Absences not reported within 48 hours will not be accommodated. If an excused absence is approved, then the percentage weight of the legitimately missed assignment could also be pro-rated among the components of the course.

5. **Scheduled Out-of-Class Activities:**
   There are no scheduled out of class activities for this course.
6. **Course Materials:**

   Recommended Textbook(s):
   
   

   “Understanding quantum physics through simple experiments: from wave-particle duality to Bell’s theorem”, by Dhand et al., freely available at https://arxiv.org/abs/1806.09958

   mass-spectrometer-device-used-analyze-chemical--q35909063

In order to successfully engage in their learning experiences at the University of Calgary, students taking online, remote and blended courses are required to have reliable access to the following technology:

- A computer with a supported operating system, as well as the latest security, and malware updates;
- A current and updated web browser;
- Webcam/Camera (built-in or external);
- Microphone and speaker (built-in or external), or headset with microphone;
- Current antivirus and/or firewall software enabled;
- Stable internet connection.

For more information please refer to the UofC ELearning online website.

7. **Examination Policy:**

   not applicable

   Students should also read the Calendar, [Section G](#), on Examinations.

8. **Approved Mandatory And Optional Course Supplemental Fees:**

   There are no mandatory or optional course supplemental fees for this course.

9. **Writing Across The Curriculum Statement:**

   For all components of the course, in any written work, the quality of the student's writing (language, spelling, grammar, presentation etc.) can be a factor in the evaluation of the work. See also Section E.2 of the University Calendar.

10. **Human Studies Statement:**

    Students will not participate as subjects or researchers in human studies.

    See also [Section E.5](#) of the University Calendar.

11. **Reappraisal Of Grades:**

    A student wishing a reappraisal, should first attempt to review the graded work with the Course coordinator/instructor or department offering the course. Students with sufficient academic grounds may request a reappraisal. Non-academic grounds are not relevant for grade reappraisals. Students should be aware that the grade being reappraised may be raised, lowered or remain the same. See [Section I.3](#) of the University Calendar.

    a. **Term Work:** The student should present their rationale as effectively and as fully as possible to the Course coordinator/instructor within ten business days of either being notified about the mark, or of the item's return to the class. If the student is not satisfied with the outcome, the student shall submit the Reappraisal of Graded Term work form to the department in which the course is offered within 2 business days of receiving the decision from the instructor. The Department will arrange for a reappraisal of the work within the next ten business days. The reappraisal will only be considered if the student provides a detailed rationale that outlines where and for what reason an error is suspected. See sections I.1 and I.2 of the University Calendar.

    b. **Final Exam:** The student shall submit the request to Enrolment Services. See [Section I.3](#) of the University Calendar.

12. **Other Important Information For Students:**

    a. **Mental Health** The University of Calgary recognizes the pivotal role that student mental health plays in physical health, social connectedness and academic success, and aspires to create a caring and supportive campus community where individuals can freely talk about mental health and receive supports when

2020-08-26
needed. We encourage you to explore the mental health resources available throughout the university community, such as counselling, self-help resources, peer support or skills-building available through the SU Wellness Centre (Room 370, MacEwan Student Centre, Mental Health Services Website) and the Campus Mental Health Strategy website (Mental Health).

b. **SU Wellness Center**: For more information, see www.ucalgary.ca/wellnesscentre or call 403-210-9355.

c. **Sexual Violence**: The Sexual Violence Support Advocate, Carla Bertsch, can provide confidential support and information regarding sexual violence to all members of the university community. Carla can be reached by email (svsa@ucalgary.ca) or phone at 403-220-2208. The complete University of Calgary policy on sexual violence can be viewed at [https://www.ucalgary.ca/policies/files/policies/sexual-violence-policy.pdf](https://www.ucalgary.ca/policies/files/policies/sexual-violence-policy.pdf).

d. **Misconduct**: Academic misconduct (cheating, plagiarism, or any other form) is a very serious offence that will be dealt with rigorously in all cases. A single offence may lead to disciplinary probation or suspension or expulsion. The Faculty of Science follows a zero tolerance policy regarding dishonesty. Please read the sections of the University Calendar under **Section K**. Student Misconduct to inform yourself of definitions, processes and penalties. Examples of academic misconduct may include: submitting or presenting work as if it were the student's own work when it is not; submitting or presenting work in one course which has also been submitted in another course without the instructor's permission; collaborating in whole or in part without prior agreement of the instructor; borrowing experimental values from others without the instructor's approval; falsification/fabrication of experimental values in a report. **These are only examples**.

e. **Academic Accommodation Policy**: Students needing an accommodation because of a disability or medical condition should contact Student Accessibility Services in accordance with the procedure for accommodations for students with disabilities available at procedure-for-accommodations-for-students-with-disabilities.pdf.

Students needing an accommodation in relation to their coursework or to fulfill requirements for a graduate degree, based on a protected ground other than disability, should communicate this need, preferably in writing, to the Associate Head of the Department of Physics & Astronomy, Dr. David Feder by email phas.ahugrd@ucalgary.ca or phone 403-220-8127. Religious accommodation requests relating to class, test or exam scheduling or absences must be submitted no later than **14 days** prior to the date in question. See **Section E.4** of the University Calendar.

f. **Freedom of Information and Privacy**: This course is conducted in accordance with the Freedom of Information and Protection of Privacy Act (FOIPP). Students should identify themselves on all written work by placing their name on the front page and their ID number on each subsequent page. For more information, see Legal Services website.

g. **Student Union Information**: VP Academic, Phone: 403-220-3911 Email: suvpaca@ucalgary.ca. SU Faculty Rep., Phone: 403-220-3913 Email: sciencerep@su.ucalgary.ca. Student Ombudsman. Email: ombuds@ucalgary.ca.

h. **Surveys**: At the University of Calgary, feedback through the Universal Student Ratings of Instruction (USRI) survey and the Faculty of Science Teaching Feedback form provides valuable information to help with evaluating instruction, enhancing learning and teaching, and selecting courses. Your responses make a difference - please participate in these surveys.

i. **Copyright of Course Materials**: All course materials (including those posted on the course D2L site, a course website, or used in any teaching activity such as (but not limited to) examinations, quizzes, assignments, laboratory manuals, lecture slides or lecture materials and other course notes) are protected by law. These materials are for the sole use of students registered in this course and must not be redistributed. Sharing these materials with anyone else would be a breach of the terms and conditions governing student access to D2L, as well as a violation of the copyright in these materials, and may be pursued as a case of student academic or non-academic misconduct, in addition to any other remedies available at law.

SYLLABUS

I. Introduction
Scientific method
Range of validity of quantum physics

II. Single-particle interference and wave-particle duality
Experiments with single photons
Behaviour of classical particles
Wave explanation
Quantum physics explanation
Hidden variable explanation
Wave-particle duality of light
Wave-particle duality of matter
Indistinguishability and environment

III. Two-particle interference and entanglement
Experiments with entangled photons
Rules of many-particle quantum physics
Correlations and randomness

IV. Local hidden variables
EPR argument

V. Local hidden variables cannot explain quantum physics
Hardy’s version of Bell’s theorem
Local hidden variable prediction
Quantum prediction
No signaling
Non-local hidden variables - pilot wave theory
Interpretations: realism, determinism, locality, contextuality, and many worlds

VI. Experiments
Generation of photon pairs and of entanglement
Tests of Bell’s theorem
Closing loopholes in Bell tests

VII. Quantum information technology
Quantum key distribution
Qubits
Polarization
Quantum teleportation and entanglement swapping
Photon bunching and Bell state measurements
Quantum computing
Quantum repeaters
Quantum memories

VII. Open questions
Quantum gravity
Does quantum physics apply on macroscopic scales?
Do quantum effects play a role in biology?

Course Learning Outcomes
This course will require a high-school level understanding of arithmetic, a very minimal amount of basic algebra, and an open mind.

Course Outcomes:

- At the end of the course, students will have a clear mental picture of some of the ways in which quantum mechanical systems behave counterintuitively as compared to everyday experience, at a more advanced level than is presented in most popular books.
- Students will also be aware of some of the far-reaching consequences of this counterintuitive behaviour, and some of their applications.
