Media Reviews

Ottawa Citizen: Saxophone Shines on Ottawa Symphony Concert

"Saxophones are rare birds in classical music, but the stage at Southam Hall has seen a gaggle of them in the past six weeks.

After sightings at NACO performances of Kurt Weill and Ravel, the sax was the star attraction at the Ottawa Symphony Orchestra Monday evening.

The program revolved around the world premiere of a concerto for tenor saxophone by Canadian composer Andrew Paul MacDonald. Entitled *The Orchid Garden*, the O.S.O. commission is built on a familiar five-note theme by Charlie Parker and makes extensive improvisation use.

MacDonald has created a spectacular showcase for both soloist (the astonishing Jeremy Brown) and orchestra. His writing is dense but somehow catchy, exploiting the sax's entire tonal range. The orchestration is complex yet subtle. MacDonald's a master illusionist, combining weird effects from the woodwinds with layers of percussion to produce a kind of elusive "third sound," making you wonder how it's done. The lush slow movement is especially evocative, like Ravel on a tropical island vacation.

Brown's performance was a dazzling display of classical discipline and agility combined with a jazz artist's freedom and sense of exploration. To get through the piece's marathon fluttering phrases, Brown uses circular breathing — essentially inhaling through his nose while exhaling through his mouth, an advanced, prized technique that never fails to impress." (November 2015)

Ottawa Citizen: "Sax Soloist Brilliant, Conductor Confident in Short But Satisfying Concert"

"Jeremy Brown was brilliant as he would remain throughout the concert." (May 2013)

Kenneth DeLong, music critic, the Calgary Herald

"Even by today's demanding performing standards, Jeremy Brown is a highly accomplished saxophonist. Technically, he is able to leap the highest hurdles, and his command of tone and rhythm convey a refined sensibility." (May 2011)

**Calgary Herald: "...afforded Brown the opportunity to tease a wide variety of tone colours from his instrument and to shape the expressive phrases with delicacy and poise."
(November 10, 2002)**

American Record Guide on the Calgary Philharmonic recording *Scaramouche*: "Saxophone soloist Jeremy Brown's creamy smoothness, graceful elegance, and singing tone are ideally suited to

Milhaud's Scaramouche. Maestro Graf offers such a jazzy and spirited orchestral backdrop that for once I did not miss the original two-piano scoring". (December 2002)

"Montreal International Jazz Festival"

The Calgary jazz scene is Verismo, the elite quintet founded by saxophonists Pat Belliveau and Jeremy Brown and filled out by bassist John Hyde, pianist Derek Stoll and drummer John De Wall. The modern jazz and hard bop on their self-titled debut was hailed across Canada for its originality, cohesiveness, virtuosity and the brilliance of pieces like "Trojan Horse" and "Winter." A fresh chinook blows out of the West! (2007)

IAJE Canada Bulletin, Spring 2007

Verismo

Review by Nick Lavigne

"Straight ahead, truthful jazz and no apologies." A perfect description of the Calgary-based ensemble Verismo. Formed in 2001 by saxophonists Jeremy Brown and Pat Belliveau as a means to explore original compositions and to create/promote artistic growth. With veteran players John Hyde on bass, John de Waal on drums, and Derek Stoll on piano filling out the rest of the band, they, for the most part, accomplish exactly that on their self-titled 2005 release.

Great compositions and playing aside for a moment, the best part of this album is something many jazz records seem to lack: unity. These guys sound like an actual band and not just pros coming together for a recording session, and that makes the grooving tunes and hard-swinging solos all the sweeter.

Groove is the name of the game on Hyde's mischievous and catchy composition "Trojan Horse." Although it will no doubt have listeners wondering, "where to have, I heard this before?" (think back to Michael Brecker's self-titled 1987 album), the tune serves as a vehicle for blowing and illustrates the second best part of this album which seems to come up again and again: these guys can play.

That leaves the third best part: the tunes. Brown's "Winter" has Stoll switching to Fender Rhodes for a texture shift, which creates a softer base for the memorable melody and countermelody to glide over. Not only has the majority of the group contributed strong compositions, but they've also included tunes that complement their own, including Bob Mintzer's "Sonny" and the infectious "Push" by fellow Calgarian Brian Christensen.

There isn't much of a jazz record that needs to be considered "good": solid players, good tunes, and creativity. When all of those are also groovy, tasteful and musically challenging, it can be great. Luckily for those with an ear to the Canadian jazz scene, that's precisely what Verismo has done. However, this isn't merely a great "Canadian" album: this is a great jazz album. Period.
