Course Description

This course is an advanced studio exploring contemporary themes in planning and professional planning practice. It is centred on an existing community need; involves analysis, synthesis, and formulation of a planning or urban design solution; and culminates in a professional report and presentation.

Studio is the pedagogical model employed in this course. Students will work with faculty members to create innovative and strategic solutions. In this studio, the client and project are real, exposing students to the complexities of creating a project from expressed needs, developing a methodology to appropriately plan and scope the project and carrying out the work to arrive at a product that is agreed upon between the instructors, students and client. We will collaborate with one or multiple Community Associations to deliver a comprehensive planning project. The product that results will reflect a detailed analysis and design exploration, and will have encouraged students to consider "best practices" in planning as well as innovative thinking. A series of public participation events will be included as well as stakeholder meetings and reviews.

Course Hours: 6 units

Online Delivery (if necessary)

The course will be delivered in person but in the case that gathering restrictions come into place the class will meet via Zoom. Classes will not be recorded. Students are expected to participate actively in all Zoom sessions and to turn on their webcam. Please join our class in a quiet space that will allow you to be fully present and engaged in the Zoom sessions. Students must behave in a professional manner during the session. Students, employees, and academic staff are also expected to demonstrate behaviour in class that promotes and maintains a positive and productive learning environment.

Course Learning Outcomes

1. To develop an approach and methodology for understanding the challenges of evolving established communities that are facing pressure for redevelopment.
2. To analyze and model existing conditions of the built form, natural environment and sociodemographics using different methods and research tools.
3. To design and integrate a public participation process with the members of the community and stakeholders involved in the community.
4. To propose and develop strategies and designs that provide a framework for land use, density and urban design in the community.
5. To develop a comprehensive report that addresses with detailed concepts, guidelines and recommendation all the issues identified by the research and the public participation process.

Workshop Safety Training Requirement

This course requires the use of the SAPL workshop, students must complete all online University of Calgary safety courses, the online Trajectory safety training course, as well as in-person workshop training and a grade of pass on the final evaluation project, to be granted access to the SAPL workshop. This training is offered once a year, around the start of the Fall term and has a completion deadline.

Assessment Components

Evaluation will be based on five project landmarks. The work will be completed in groups. Students will receive a common grade for work done in groups, unless it is clear to the instructor the balance of work has been unfairly distributed between team members. Class participation is a key component of the grade and will be evaluated based on attendance to class, studio desk crits and group work. It is expected that students will work and be available to meet with the instructor and their group members during class-time. Any anticipated absence should be communicated to the teaching team as soon as possible.

Guidelines for Zoom Sessions

Zoom is a video conferencing program that will allow us to meet at specific times for a "live" video conference, so that we can have the opportunity to meet each other virtually and discuss relevant course topics as a learning community.

To help ensure Zoom sessions are private, do not share the Zoom link or password with others, or on any social media platforms. Zoom links and passwords are only intended for students registered in the course. Zoom recordings and materials presented in Zoom, including any teaching materials, must not be shared, distributed or published without the instructor's permission.

The use of video conferencing programs relies on participants to act ethically, honestly and with integrity; and in accordance with the principles of fairness, good faith, and respect (as per the Code of Conduct). When entering Zoom or other video conferencing sessions (such as MS Teams), you play a role in helping create an effective, safe and respectful learning environment. Please be mindful of how your behaviour in these sessions may affect others. Participants are required to use names officially associated with their UCID (legal or preferred names listed in the Student Centre) when engaging in these activities. Instructors/moderators can remove those whose names do not appear on class rosters. Non-compliance may be investigated under relevant University of Calgary conduct policies (e.g Student Non-Academic Misconduct Policy). If participants have difficulties complying with this requirement, they should email the instructor of the class explaining why, so the instructor may consider whether to grant an exception, and on what terms. For more information on how to get the most out of your zoom sessions visit: <https://elearn.ucalgary.ca/guidelines-for-zoom/>

If you are unable to attend a Zoom session, please contact your instructor in advance to arrange an alternative activity for the missed session. Please be prepared, as best as you are able, to join class in a quiet space that will allow you to be fully present and engaged in Zoom sessions. Students will be advised by their instructor when they are expected to turn on their webcam (for group work, presentations, etc.).
