2. **Prerequisites:** Consent of the Department. See section 3.5.C in the Faculty of Science section of the online Calendar (www.ucalgary.ca/pubs/calendar/current/sc-3-5.html)

Antirequisite: Credit for both Geology 685 and 585 will not be allowed.

3. **Grading:** The University policy on grading and related matters is described sections F.1 and F.2 of the online University Calendar. In determining the overall grade in the course the following weights will be used:

Lab assignments (2)	20%
Lab final test	40%
Final project and presentation	40%

Grading Scheme

A+	95 – 100%
A	86 – 94%
A-	80 – 85%
B+	77 – 79%
B	73 – 76%
B-	70 – 72%
C+	67 – 69%
C	63 – 66%
C-	60 – 62%
D+	55 – 59%
D	50 – 54%
F	<50%

Each piece of work (assignment, laboratory final, or final project and presentation) submitted by the student will be assigned a percentage score. The student's average percentage score for the various components listed above will be combined with the indicated weights to produce an overall percentage for the course, which will be used to determine the course letter grade.

4. **Missed Components of Term Work:** The regulations of the Faculty of Science pertaining to this matter are found in the Faculty of Science area of the Calendar in [Section 3.6](#). It is the student's responsibility to familiarize himself/herself with these regulations. See also [Section E.6](#) of the University Calendar

GEOLOGY 685
ADVANCED BIOSTRATIGRAPHY

1. **COURSE OBJECTIVE AND CONTENT:** The objective GLGY 585 Biostratigraphy and GLGY 685 Advanced biostratigraphy is to present the principles and applications of the biostratigraphy in the oil industry. The focus is on foraminifers and conodonts but other microfossil groups will be also presented. We study the patterns in microfossil distribution and how they can be used to recognize the paleobathymetry settings and relative sea-level through time. The final project will be focused on foraminiferal assemblages worldwide and conodonts from Western Canada.

A tentative outline of the topics covered in this course is given below; note that changes can occur as we advance through the course.

Week	Lecture topics
1	Introduction. Major non-foram and non-conodont groups
2	Foraminifers and radiolarians
3	Conodonts
4	Applications of foraminifer and conodont studies in biostratigraphy (I)
5	Applications of foraminifer and conodont studies in biostratigraphy (I)
6	Overall view on applied biostratigraphy
