Dr. Vivian Mozol is **course/tutorial coordinator**. Dr. Erin Sullivan is the **laboratory coordinator**.

The Tutorial activities and Lab Experiments will alternate on a weekly basis, except for the week of Term Break (November 12th-18th, 2023). Please see the calendar in the course syllabus posted in D2L for the weekly schedule & your Student Centre for the exact location and time of your lab or tutorial session.

To account for any necessary transition to remote learning for the current semester, courses with in-person lectures, labs, or tutorials may be shifted to remote delivery for a certain period of time. In addition, adjustments may be made to the modality and format of assessments and deadlines, as well as to other course components and/or requirements, so that all coursework tasks are in line with the necessary and evolving health precautions for all involved (students and staff).

**In Person Delivery Details:**

The learning outcomes for the course will be delivered in-person. The learning objectives, and a class calendar outlining which learning objectives are covered each week, can be found within the Syllabus for the course posted on the D2L website. Students will be assessed on their understandings of the course content via the following course components:

**Lecture.** In-person Lectures begin on September 5th, 2023. Lectures will occur weekly on Monday Wednesday, and Friday at 11:00 - 11:50 p.m. for L01 and on Tuesday and Thursday at 9:30 - 10:45 a.m. for L02. When appropriate, students will work in unstructured groups. Both sections will formatively check understanding periodically through in-class discussions and polling.

Lectures will be co-taught. The lecturer listed for lecture section 1, L01 (Dr. V. Mozol) will teach ALL sections during weeks 7 through 13 of the fall term, the lecture listed for lecture section 2, L02 (Dr. F Jalilehvand) will teach ALL sections during weeks 1 through 6 of the fall term. Both instructors will be available for consultation on course material throughout the entire term.

**Tutorials.** In-person Tutorials begin on September 12th, 2023. Students will conduct five bi-weekly tutorial activities, as scheduled in your Student Centre. Tutorials will be worth 20% of the course grade. For details on the grading of tutorial activities, see Section 3.

**Labs.** Lab Activities begin on September 5th, 2023. There are six bi-weekly activities. The first week is dedicated to completing the Department of Chemistry's Online Safety Course. The Online Safety Course must be completed prior to entering any Laboratory room, see Section 13. The remaining five weeks involve in-person experiments, as scheduled in your Student Centre. Experiments will be worth 25% of the course grade. For details on the grading of lab experiments, see Section 3.

**Course Site:**

D2L: CHEM 201 ALL Lectures - (Fall 2023) - General Chemistry: Structure and Bonding
**Note:** Students must use their U of C account for all course correspondence.

**Equity Diversity & Inclusion:**

The University of Calgary is committed to creating an equitable, diverse and inclusive campus, and condemns harm and discrimination of any form. We value all persons regardless of their race, gender, ethnicity, age, LGBTQIA2S+ identity and expression, disability, religion, spirituality, and socioeconomic status. The Faculty of Science strives to extend these values in every aspect of our courses, research, and teachings to better promote academic excellence and foster belonging for all.

The Chemistry EDI Committee acknowledges there are persistent barriers that prevent such accessibility and hinder our progress towards EDI. Our representatives (faculty, postdocs, graduate and undergraduate students) are committed to addressing any concerns and work towards proactive solutions that enact necessary change within the department. To submit anonymous questions, comments or concerns regarding EDI related issues, please reach out to our Associate Head EDI, Erin Sullivan (ersulliv@ucalgary.ca)

2. **Requisites:**

See section 3.5.C in the Faculty of Science section of the online Calendar.

**Prerequisite(s):**

Chemistry 30 or 212 (or Continuing Education - Chemistry 2) and one of Mathematics 30-1, 212 or Mathematics 2 (offered by Continuing Education).

**Antirequisite(s):**

Credit for Chemistry 201 and any of 209, 211, 301 or Engineering 204 will not be allowed.

3. **Grading:**

The University policy on grading and related matters is described in F.1 and F.2 of the online University Calendar.

In determining the overall grade in the course the following weights will be used:

<table>
<thead>
<tr>
<th>Course Component</th>
<th>Weight</th>
<th>Due Date (duration for exams)</th>
<th>Modality for exams</th>
<th>Location for exams</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lab component¹</td>
<td>25%</td>
<td>Ongoing</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Tutorial component²</td>
<td>20%</td>
<td>Ongoing</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Midterm Exam</td>
<td>20%</td>
<td>Oct 20 2023 at 06:30 pm (2 Hours)</td>
<td>in-person</td>
<td>TBD</td>
</tr>
<tr>
<td>Registrar Scheduled Final Exam</td>
<td>35%</td>
<td>Will be available when the final exam schedule is released by the Registrar</td>
<td>in person</td>
<td>Will be available when the final exam schedule is released by the Registrar</td>
</tr>
</tbody>
</table>

¹ There are five graded lab sessions. The first is an orientation laboratory worth 3%. The remaining are 4 laboratory experiments worth 5.5% each.

² There are five tutorial activities each worth 4% of the overall course grade.

Each piece of work (reports, assignments, quizzes, midterm exam(s) or final examination) submitted by the student will be assigned a grade. The student's grade for each component listed above will be combined with the indicated weights to produce an overall percentage for the course, which will be used to determine the course letter grade.

The conversion between a percentage grade and letter grade is as follows.

<table>
<thead>
<tr>
<th>Percentage Grade</th>
<th>A+</th>
<th>A</th>
<th>A-</th>
<th>B+</th>
<th>B</th>
<th>B-</th>
<th>C+</th>
<th>C</th>
<th>C-</th>
<th>D+</th>
<th>D</th>
</tr>
</thead>
<tbody>
<tr>
<td>Minimum % Required</td>
<td>95.00 %</td>
<td>87.00 %</td>
<td>82.00 %</td>
<td>77.00 %</td>
<td>72.00 %</td>
<td>66.00 %</td>
<td>62.00 %</td>
<td>58.00 %</td>
<td>54.00 %</td>
<td>50.00 %</td>
<td>45.00 %</td>
</tr>
</tbody>
</table>

This course will have a Registrar Scheduled Final exam that will be delivered in-person and on campus. The Final Examination Schedule will be published by the Registrar’s Office approximately one month after the start of the term. The final exam for this course will be designed to be completed within 2 hours.

In order to achieve the prerequisite requirements (i.e. C-) for future Science courses, a student must meet **ALL** of the following requirements:

1) Achieve a minimum AVERAGE grade of 50% on the tutorial component for the course and
2) Complete a minimum of 3 of the 5 tutorial activities (to reflect meaningful completion of course activities) and

3) Achieve a minimum AVERAGE grade of 50% on the laboratory component for the course and

4) Complete a minimum of 4 of the 5 in-person laboratory activities (the orientation and three of the five experiments) to reflect meaningful completion of course activities) and

5) Achieve a minimum grade of 50% on the WEIGHTED AVERAGE of the Midterm and Final Exams.

Therefore, if ANY of the above five are not met a maximum grade of D+ will result.

The University of Calgary offers a flexible grade option, Credit Granted (CG) to support student’s breadth of learning and student wellness. Faculty units may have additional requirements or restrictions for the use of the CG grade at the faculty, degree or program level. To see the full list of Faculty of Science courses where CG is not eligible, please visit the following website: https://science.ucalgary.ca/current-students/undergraduate/program-advising/flexible-grading-option-cg-grade

4. Missed Components Of Term Work:

In the event that a student legitimately fails to submit any online or in-person assessment on time (e.g. due to illness, domestic affliction, etc...), please contact the course coordinator, or the course instructor if this course does not have a coordinator to arrange for a re-adjustment of a submission date, or possible exemption and reweighing of components. Absences not reported within 48 hours will not be accommodated. Students may be asked to provide supporting documentation (Section M.1) for an excused absence, See FAQ.

If an excused absence is approved, options for how the missed assessment is dealt with is at the discretion of the coordinator or course instructor. Some options such as an exemption and pro-rating among the components of the course may not be a viable option based on the design of this course.

There will be no deferred midterm. If a student is unable to attend the midterm then the 20% of the course grade assigned to the midterm exam will be pro-rated to the final exam.

Attendance for at most two of the lab activities and at most two of the tutorial activities in this course could be excused in extenuating circumstances. The weight for any excused absence in labs or tutorials will be moved to the final exam.

If ongoing extenuating circumstances may prevent a student from meeting this minimum, it is recommended that they meet with the course and/or lab coordinator as soon as possible to discuss what options may be in the best interest of the student's long-term learning.

5. Scheduled Out-of-Class Activities:

The following out of class activities are scheduled for this course.

<table>
<thead>
<tr>
<th>Activity</th>
<th>Location</th>
<th>Date and Time</th>
<th>Duration</th>
</tr>
</thead>
<tbody>
<tr>
<td>Midterm Exam</td>
<td>TBA</td>
<td>Friday, October 20, 2023 at 6:30 pm</td>
<td>2 Hours</td>
</tr>
</tbody>
</table>

REGULARLY SCHEDULED CLASSES HAVE PRECEDENCE OVER ANY OUT-OF-CLASS-TIME-ACTIVITY. If you have a conflict with the out-of-class-time-activity, please contact your course coordinator/instructor no later than 14 days prior to the date of the out-of-class activity so that alternative arrangements may be made.

6. Course Materials:

Important note about your textbook:

- Our recommended texts are open-educational resources, freely available online. The primary resource is our own Department of Chemistry Textbook: https://chem-textbook.ucalgary.ca/ that will also be available within D2L. It is a modified version of the OpenStax open-educational resource.

- TopHat may be used by your instructor to monitor class progress. Access to TopHat is free for registered students. Details regarding registration of TopHat are found in D2L.

Other Recommended Course Materials

- A Model Kit is recommended but not required. (Molymod kits are suggested and are available through the University of Calgary Bookstore).
In order to successfully engage in their learning experiences at the University of Calgary, students taking online, remote and blended courses are required to have reliable access to the following technology:

- A computer with a supported operating system, as well as the latest security, and malware updates;
- A current and updated web browser;
- Webcam/Camera (built-in or external);
- Microphone and speaker (built-in or external), or headset with microphone;
- Current antivirus and/or firewall software enabled;
- Stable internet connection.

For more information please refer to the UofC ELearning online website.

7. Examination Policy:

Any student with academic accommodations must be registered with Student Accessibility Services (see Section 12(e) below), and must identify themselves to their instructor as soon as possible.

Both lecture sections will write the Midterm and Final Exams at the same time. Detailed exam regulations for these individual assessments will be provided roughly one week before each examination. The Final Exam date is yet to be announced by the registrar. The Midterm Exam is out-of-class and scheduled for October 20th, 2023 from 6:30-8:30pm.

It is expected that the Midterm Exam will cover all material introduced during lecture up to the end of the day that precedes the Examination date (October 19th, 2023). The Final Exam will be cumulative, covering material from the entire semester.

Students should also read the Calendar, Section G, on Examinations.

8. Approved Mandatory And Optional Course Supplemental Fees:

There are no mandatory or optional course supplemental fees for this course.

9. Writing Across The Curriculum Statement:

For all components of the course, in any written work, the quality of the student's writing (language, spelling, grammar, presentation etc.) can be a factor in the evaluation of the work. See also Section E.2 of the University Calendar.

10. Human Studies Statement:

If you agree, your course work may be used for research purposes. Your responses will remain anonymous and confidential. Grouped data (no individual responses) may be used in academic presentations and publications. Participation in such research is voluntary and will not influence grades in this course. Students' signed consent forms will be withheld from instructors until after final grades are submitted. More information will be provided at the time student participation is requested.

See also Section E.5 of the University Calendar.

11. Reappraisal Of Grades:

A student wishing a reappraisal, should first attempt to review the graded work with the Course coordinator/instructor or department offering the course. Students with sufficient academic grounds may request a reappraisal. Non-academic grounds are not relevant for grade reappraisals. Students should be aware that the grade being reappraised may be raised, lowered or remain the same. See Section I.3 of the University Calendar.

a. Term Work: The student should present their rationale as effectively and as fully as possible to the Course coordinator/instructor within ten business days of either being notified about the mark, or of the item's return to the class. If the student is not satisfied with the outcome, the student shall submit the Reappraisal of Graded Term work form to the department in which the course is offered within 2 business days of receiving the decision from the instructor. The Department will arrange for a reappraisal of the work within the next ten business days. The reappraisal will only be considered if the student provides a detailed rationale that outlines where and for what reason an error is suspected. See sections I.1 and I.2 of the University Calendar.

b. Final Exam: The student shall submit the request to Enrolment Services. See Section I.3 of the University Calendar.

12. Other Important Information For Students:

a. Mental Health The University of Calgary recognizes the pivotal role that student mental health plays in
physical health, social connectedness and academic success, and aspires to create a caring and supportive campus community where individuals can freely talk about mental health and receive supports when needed. We encourage you to explore the mental health resources available throughout the university community, such as counselling, self-help resources, peer support or skills-building available through the SU Wellness Centre (Room 370, MacEwan Student Centre, Mental Health Services Website) and the Campus Mental Health Strategy website (Mental Health).

b. **SU Wellness Services**: For more information, see their website or call 403-210-9355.

c. **Sexual Violence**: The Sexual Violence Support Advocate, Carla Bertsch, can provide confidential support and information regarding sexual violence to all members of the university community. Carla can be reached by email (evsa@ucalgary.ca) or phone at 403-220-2208. The complete University of Calgary policy on sexual violence can be viewed here.

d. **Student Ombuds Office**: A safe place for all students of the University of Calgary to discuss student related issues, interpersonal conflict, academic and non-academic concerns, and many other problems.

e. **Student Union Information**: SU contact. Email your SU Science Reps: science1@su.ucalgary.ca, science2@su.ucalgary.ca, science3@su.ucalgary.ca.

f. **Academic Accommodation Policy**:

   It is the student’s responsibility to request academic accommodations according to the University policies and procedures listed below. The student accommodation policy can be found at: https://www.ucalgary.ca/legal-services/sites/default/files/teams/1/Policies-Student-Accommodation-Policy.pdf

   Students needing an accommodation because of a disability or medical condition should communicate this need to Student Accessibility Services in accordance with the Procedure for Accommodations for Students with Disabilities: https://www.ucalgary.ca/legal-services/sites/default/files/teams/1/Policies-Accommodation-for-Students-with-Disabilities-Procedure.pdf.

   Students needing an accommodation in relation to their coursework or to fulfil requirements for a graduate degree, based on a Protected Ground other than Disability, should communicate this need, by filling out the Request for Academic Accommodation Form and sending it to Associate Head, Undergraduate by email ahugchem@ucalgary.ca preferably 10 business days before the due date of an assessment or scheduled absence.

g. **Misconduct**: Academic integrity is the foundation of the development and acquisition of knowledge and is based on values of honesty, trust, responsibility, and respect. We expect members of our community to act with integrity. Research integrity, ethics, and principles of conduct are key to academic integrity. Members of our campus community are required to abide by our institutional Code of Conduct and promote academic integrity in upholding the University of Calgary’s reputation of excellence. Some examples of academic misconduct include but are not limited to: posting course material to online platforms or file sharing without the course instructor’s consent; submitting or presenting work as if it were the student’s own work; submitting or presenting work in one course which has also been submitted in another course without the instructor’s permission; borrowing experimental values from others without the instructor’s approval; falsification/fabrication of experimental values in a report. Please read the following to inform yourself more on academic integrity:

   - Student Handbook on Academic Integrity
   - Student Academic Misconduct Policy and Procedure
   - Faculty of Science Academic Misconduct Process
   - Research Integrity Policy

   Additional information is available on the Student Success Centre Academic Integrity page

h. **Copyright of Course Materials**: All course materials (including those posted on the course D2L site, a course website, or used in any teaching activity such as (but not limited to) examinations, quizzes, assignments, laboratory manuals, lecture slides or lecture materials and other course notes) are protected by law. These materials are for the sole use of students registered in this course and must not be redistributed. Sharing these materials with anyone else would be a breach of the terms and conditions governing student access to D2L, as well as a violation of the copyright in these materials, and may be pursued as a case of student academic or non-academic misconduct, in addition to any other remedies available at law.

i. **Freedom of Information and Privacy**: This course is conducted in accordance with the Freedom of Information and Protection of Privacy Act (FOIPP). Students should identify themselves on all written work by placing their name on the front page and their ID number on each subsequent page. For more information, see Legal Services website.
Course Outcomes:

- **Observation/Analysis:** Collect and analyze observations related to experiential chemical activities.
- **Atoms:** Use the quantum theory description of the energy and spatial distribution of electrons to correlate the physical properties of atoms with how atoms interact.
- **Chemical Species:** Generate Lewis & VSEPR diagrams and use bonding theories to describe and evaluate the connectivity between atoms and spatial arrangement of bonding in a chemical species.
- **Collections of Chemical Species:** Identify the charge distribution in a chemical species and use it to...
illustrate how collections of chemical species will interact with each other physically and chemically.
