Course Description

The purpose of this course is to acquaint you with the academic field of Religious Studies and offer practical instruction in research methods and academic writing. You will be introduced to a small sampling of the great variety of theories used in the academic study of religion and you will be asked to formulate a research question and carry through a research project of your own. By the end of the course, you will have a better appreciation of the nature of academic scholarship, be able to conduct research efficiently and effectively, and write a respectable academic paper.

The course will concentrate on the development of skills and habits of mind that are important in the academic study of religion. Paden's text will give you an overview of the interdisciplinary field of Religious Studies. Dr. Tumaszk will give instruction in 1) effective reading, including the central skill of identifying the thesis and argument of a text, and 2) critical thinking, including the important habit of critically assessing the premises and presuppositions of scholarship on religion. She also will provide instruction in the development of effective research questions and writing processes and familiarize you with the conventions of academic writing.

Ms. Lipton, the University's senior librarian of Religious Studies, will acquaint students with the myriad of resources available to Religious Studies students. She will provide intensive instruction in the tools and methods of scholarly research, helping students to develop the skills needed to effectively locate and evaluate information.
