

# UNIVERSITY OF CALGARY FACULTY OF SCIENCE DEPARTMENT OF COMPUTER SCIENCE COURSE OUTLINE

1. Course: CPSC 217, Introduction to Computer Science for Multidisciplinary Studies I -- Winter 2018

Lecture 01: (MWF, 11:00-11:50 in ST135)

Instructor NameEmailPhoneOfficeHoursJonathon Hudsonjwhudson@ucalgary.caICT 748MW 12:00-13:00

Course Site:

D2L: CPSC 217 L01-(Winter 2018)-Introduction to Computer Science for Multidisciplinary Studies I

http://pages.cpsc.ucalgary.ca/~hudsonj/217\_W18/

Department of Computer Science: ICT 602, 403 220-6015, cpsc@cpsc.ucalgary.ca

Students must use their U of C account for all course correspondence.

## 2. Prerequisites:

See section 3.5.C in the Faculty of Science section of the online Calendar.

Credit for both Computer Science 217 and any of 215, 231, 235 or Computer Engineering 339 or Engineering 231 and 233 will not be allowed.

Computer Science 101 is strongly recommended as preparation for this course. See the statements at the beginning of the Computer Science entry.

#### 3. Grading:

The University policy on grading and related matters is described in  $\underline{F.1}$  and  $\underline{F.2}$  of the online University Calendar. In determining the overall grade in the course the following weights will be used:

Component(s)	Weighting %
Assignment 1	6
Assignment 2	8
Assignment 3	8
Assignment 4	8
Midterm Exam	30
Final Exam	40

Each of the above components will be given a letter grade using the official university grading system. The final grade will be calculated using the grade point equivalents weighted by the percentages given above and then converted to a final letter grade using the official university grade point equivalents.

In order to obtain a final grade of C- or better in the course, a student must achieve a weighted average of C(1.7) or better on the midterm and final exams. Students who achieve a higher grade on the final exam than on the midterm exam will have their midterm exam grade replaced with their final exam grade.

# 4. Missed Components of Term Work:

The regulations of the Faculty of Science pertaining to this matter are found in the Faculty of Science area of the Calendar in <u>Section 3.6</u>. It is the student's responsibility to familiarize himself/herself with these regulations. See also <u>Section E.3</u> of the University Calendar

#### 5. Scheduled out-of-class activities:

The following out of class activities are scheduled for this course:

Out of Class Midterm, scheduled for 90 min on Thursday March 8 2018 at 7:00 pm ICT 102 and 121

# REGULARLY SCHEDULED CLASSES HAVE PRECEDENCE OVER ANY OUT-OF-CLASS-TIME-

**ACTIVITY.** If you have a conflict with the out-of-class-time-activity, please contact your course coordinator/instructor no later than **14 days prior** to the date of the out-of-class activity so that alternative arrangements may be made.

#### 6. Course Materials:

#### Optional Textbook(s):

Tony Gaddis, Starting Out With Python 3e, Pearson

The Python Workbook, Ben Stephenson, Springer (Practice Exercises)

(Students are welcome to use the second, third or fourth edition of Starting Out with Python. Students are strongly discouraged from using the first edition because most of the examples in the first edition do not work with the most recent version of Python).

#### 7. Examination Policy:

No aids are allowed on tests or examinations

Students should also read the Calendar, Section G, on Examinations.

#### 8. Approved Mandatory and Optional Course Supplemental Fees:

There are no mandatory or optional course supplemental fees for this course

#### 9. Writing across the Curriculum Statement:

For all components of the course, in any written work, the quality of the student's writing (language, spelling, grammar, presentation etc.) can be a factor in the evaluation of those reports. See also Section  $\underline{E.2}$  of the University Calendar.

#### 10. Human studies statement:

Students will not participate as subjects or researchers in human studies.

## 11. Reappraisal of Grades:

A student wishing a reappraisal, should first attempt to review the graded work with the Course coordinator/instructor or department offering the course. Students with sufficient academic grounds may request a reappraisal. Non-academic grounds are not relevant for grade reappraisals. Students should be aware that the grade being reappraised may be raised, lowered or remain the same. See Section 1.3 of the University Calendar.

- 1. **Term Work:** The student should present their rationale as effectively and as fully as possible to the Course coordinator/instructor within **15 days** of either being notified about the mark, or of the item's return to the class. If the student is not satisfied with the outcome, the student shall immediately submit the Reappraisal of Graded Term work form to the department in which the course is offered. The department will arrange for a re-assessment of the work if, and only if, the student has sufficient academic grounds. See sections <u>I.1</u> and <u>I.2</u> of the University Calendar
- 2. **Final Exam:**The student shall submit the request to Enrolment Services. See <u>Section I.3</u> of the University Calendar.

## 12. OTHER IMPORTANT INFORMATION FOR STUDENTS:

- a. **Misconduct:** Academic misconduct (cheating, plagiarism, or any other form) is a very serious offence that will be dealt with rigorously in all cases. A single offence may lead to disciplinary probation or suspension or expulsion. The Faculty of Science follows a zero tolerance policy regarding dishonesty. Please read the sections of the University Calendar under <u>Section K</u>. Student Misconduct to inform yourself of definitions, processes and penalties. Examples of academic misconduct may include: submitting or presenting work as if it were the student's own work when it is not; submitting or presenting work in one course which has also been submitted in another course without the instructor's permission; collaborating in whole or in part without prior agreement of the instructor; borrowing experimental values from others without the instructor's approval; falsification/ fabrication of experimental values in a report. **These are only examples**.
- b. **Assembly Points:** In case of emergency during class time, be sure to FAMILIARIZE YOURSELF with the information on <u>assembly points</u>.

c. Academic Accommodation Policy: Students needing an accommodation because of a disability or medical condition should contact Student Accessibility Services in accordance with the procedure for accommodations for students with disabilities available at <u>procedure-for-accomodations-for-students-with-disabilities 0.pdf</u>.

Students needing an accommodation in relation to their coursework or to fulfill requirements for a graduate degree, based on a protected ground other than disability, should communicate this need, preferably in writing, to the Associate Head of Undergraduate Affairs of the Department of Computer Science, Nathaly Verwaal by email nmverwaa@ucalgary.ca or phone 403-220-8485. Religious accommodation requests relating to class, test or exam scheduling or absences must be submitted no later than **14 days** prior to the date in question: <a href="http://www.ucalgary.ca/pubs/calendar/current/e-4.html">http://www.ucalgary.ca/pubs/calendar/current/e-4.html</a>

- d. **Safewalk:** Campus Security will escort individuals day or night (<a href="www.ucalgary.ca/security/safewalk/">www.ucalgary.ca/security/safewalk/</a>). Call 403-220-5333 for assistance. Use any campus phone, emergency phone or the yellow phones located at most parking lot pay booths.
- e. **Freedom of Information and Privacy:** This course is conducted in accordance with the Freedom of Information and Protection of Privacy Act (FOIPP). Students should identify themselves on all written work by placing their name on the front page and their ID number on each subsequent page. For more information, see also <a href="https://www.ucalgary.ca/legalservices/foip">www.ucalgary.ca/legalservices/foip</a>.
- f. **Student Union Information:** <u>VP Academic</u>, Phone: <u>403-220-3911</u> Email: <u>suvpaca@ucalgary.ca</u>. SU Faculty Rep., Phone: <u>403-220-3913</u> Email: <u>sciencerep@su.ucalgary.ca</u>. Student Ombudsman, Email: <u>suvpaca@ucalgary.ca</u>.
- g. **Internet and Electronic Device Information:** Unless instructed otherwise, cell phones should be turned off during class. All communication with other individuals via laptop, tablet, smart phone or other device is prohibited during class unless specifically permitted by the instructor. Students that violate this policy may be asked to leave the classroom. Repeated violations may result in a charge of misconduct.
- h. **Surveys:** At the University of Calgary, feedback through the Universal Student Ratings of Instruction (<u>USRI</u>) survey and the Faculty of Science Teaching Feedback form provides valuable information to help with evaluating instruction, enhancing learning and teaching, and selecting courses. Your responses make a difference please participate in these surveys.
- i. **SU Wellness Center:** The Students Union Wellness Centre provides health and wellness support for students including information and counselling on physical health, mental health and nutrition. For more information, see <a href="https://www.ucalgary.ca/wellnesscentre">www.ucalgary.ca/wellnesscentre</a> or call <a href="https://www.ucalgary.ca/wellnesscentre">403-210-9355</a>.

**Department Approval:** Electronically Approved **Date:** 2018-01-03 12:28

Associate Dean's Approval for out of regular class-time activity: Electronically Approved Date: 2018-01-03 13:34

# **Course Outcomes**

- 1. Develop solutions to small scale problems using procedural problem solving techniques.
- 2. Compute the outcome of a program involving a variety of different programming concepts including complex expressions, conditionals, while and for loops, functions, lists, dictionaries, strings, files and exceptions.
- 3. Create and debug programs that make effective use of a variety of different programming concepts including complex expressions, conditionals, while and for loops, functions, lists, dictionaries, strings, and files.
- 4. Use existing modules to make use of code developed by others, including modules for the creation of graphical programs.
- 5. Summarize and/or apply a selection of non-programming topics such as the history of computing, disciplines within the broader field of computer science, encoding techniques, challenges associated with floating point numbers and introductory database concepts, or others.
