### Course Description:

This is a course in microeconomic theory. Microeconomics uses theory to determine how people/firms will most likely interact independently and with one another. The results of said theory help governments/policymakers determine the most appropriate way to intervene in society. In this course, we will explore the basic theory of microeconomics. The main topics we will cover are consumer theory (demand), producer theory (supply), and the equilibrium that arises from their interaction.

Many of the concepts covered in this course should be familiar; ECON 201 should have covered a number of concepts we will discuss, however, our treatment of these concepts will be more technical.

Calculus is not required for this course (and will not be used), but high school level algebra will be used extensively. In particular, you must be able to solve a system of two equations and two unknowns.

Microeconomic theory is fundamental to the study of economics, and I have a responsibility to ensure that you are well-versed in the basics. Because of this, the course is structured such that you must attain a strong understanding of basic principles and procedures in order to pass. You will be provided with an ample amount of questions, readings, and office hours to ensure you have every opportunity to attain said understanding.

Drs. Beaulieu and Hollis will be splitting the lecturing across all sections of ECON301, with Dr Beaulieu teaching in most weeks in the first half of the term. Dr. Beaulieu will be available for office hours only during the weeks that he is teaching, and similarly for Dr. Hollis. Thus, depending on the week, office hours will be in SS424 or in SS334.

**Course Objectives**

Upon successful completion of this course, students will be able to:

1. Understand the principles that serve as the foundation of economic reasoning and analysis.
2. Understand how equilibrium is reached through the interaction of actors at the individual and aggregate level.
3. Conduct comparative statics on models studied in class.
4. Evaluate the strengths, limitations, and value judgements imposed in various economic models.

### Tutorials:

Students are expected to attend a weekly tutorial section. During the tutorial section the TA will discuss pre-assigned questions/material relevant to the course. Answers to the tutorial questions should be submitted.

### PASS Program:

This course will benefit from support from the PASS Program – see

<https://www.success.ucalgary.ca/home.htm>

PASS is a free, structured study session that is facilitated by someone who has taken the course before. Attending is voluntary and is meant to supplement other aspects of the course. PASS sessions are offered at multiple different times throughout the week to accommodate students' schedules. In general, students who attend PASS regularly have higher course grades than those who do not. It is also a non-remedial program; PASS is for all students, not just those who are struggling. This creates a collaborative environment where students learn from and help each other.

### Desire2Learn:

This course will make use of the Desire2Learn (D2L) platform. Students who are registered in the course can log on at <http://d2l.ucalgary.ca> through their student centre. Please note that D2L features a class e-mail list that may be used to distribute course-related information. These e-mails go to your University of Calgary e-mail addresses only.

### Grade Determination and Final Examination Details:

MIDTERM EXAM (Oct 22)	32%
FINAL EXAMINATION	32%
ASSIGNMENTS (4)	30%
TUTORIAL QUESTIONS	6%
	<hr/>
	100%

The official grading system will be used. See <http://www.ucalgary.ca/pubs/calendar/current/f-1-1.html>  
Students must receive a passing grade on the final exam to pass the course.

### Grading Scale

A+	95 – 100	B	73 – 76	C-	60 – 62
A	85 – 94	B-	70 – 72	D+	56 – 59
A-	80 – 84	C+	67 – 69	D	50 – 55
B+	77 – 79	C	63 – 66	F	0 – 49

Grades will be rounded up or down from the midpoint between ranges.

As per the Writing Across the Curriculum Statement in the Calendar, writing and grading thereof will be a factor in the evaluation of student work.

Any student work which remains undistributed after the last day of classes will be available to students through the instructor's office during his office hours.

The final examination will be comprehensive, scheduled by the Registrar, held in a classroom, and last 2 hours. If a student cannot write their final exam on the date assigned by the Registrar's Office, they need to apply for a deferred exam [www.ucalgary.ca/registrar/exams/deferred\\_final](http://www.ucalgary.ca/registrar/exams/deferred_final). Under no circumstance will this be accommodated by the Department.

Tests and exams will involve multiple choice questions. Non-programmable calculators will be allowed during the writing of tests or final examinations.

**The midterm examination will be held at 6pm – 7:30pm on October 22.** Students should make arrangements to attend this midterm.

THERE WILL BE NO MAKEUP OR DEFERRED QUIZZES/TESTS/EXAMS under any circumstances, nor may the quizzes/tests/exams be written early. Students unable to write the quizzes/tests/exams because of documented illness, family emergency, religious observance, or university-sanctioned event will have the weight shifted to the final examination; otherwise a grade of zero will be assigned.
