Course Description:

This course is the first of a pair of courses designed to acquaint students with microeconomic theory. Microeconomics is concerned with a systematic understanding of the choices of individuals, firms, and organizations. It seeks to address the social consequences of the behaviour of economic agents. Economic theory provides the structure, or framework, for economic inquiry.

Course Learning Outcomes:

Students who successfully complete this course will:

(i) Develop expertise in the methodology of economic analysis. Economic theory has four elements that students are expected to master:

- (a) Students will become familiar with the foundation of economic reasoning. This involves a fundamental assumption—that individuals make choices based on their perception of their self-interest. The consequence of this assumption is that individual choices and actions depend on incentives. In turn, incentives depend on the interaction of preferences and constraints on time, income, technology, and ability. This framework explains how choices can be understood in terms of their incremental or marginal costs and benefits and how changing an individual's perception of either incremental costs or benefits will change behaviour.
- (b) Students will master equilibrium analysis which involves aggregating over the choices of individuals and ensuring that the choices of individuals are consistent—that what individuals plan to do they are in fact able to do. Equilibrium analysis underlies how economists explain resource allocation in the economy.
- (c) A key part of equilibrium analysis is comparative statics: asking how the equilibrium will change when conditions change.
- (d) Students will understand the strengths, limitations, and value judgments that underlie the notion of efficiency. Efficiency is the yardstick by which economists measure the social desirability of resource allocation.

These four elements of economic modeling are developed through their deployment in the topics considered.

(ii) The Economist's View of the World and the Economic Way of Thinking. Scarcity and Its Management; Pareto Optimality and Gains from Trade; The Role of Prices and Markets; Institutional Foundation of Market Economies; Restrictions on Voluntary Trade; Success of Market Economies and Institutional Choice to Relax Scarcity Constraints.

(iii) Consumer Theory: Axioms of Preferences; Budget Set; Optimal Choice and Derivation of a demand function; Marshallian and Hicksian demand functions; Income and Substitution Effects; Expenditure function; Measuring Welfare (CV, EV, Consumer Surplus); Applications.

(iv) Neoclassical Theory of the Firm. Characterization of Technological Possibilities; Opportunity Costs, Sunk Costs, Depreciation, the User Cost of Capital and Economic Profit; Profit Maximization; Cost Minimization Long and Short Run.

(v) Theory of Perfect Competition. Assumptions; Price Taking; Supply Curves; Short Run Equilibrium; Quasi-Rents versus Profits, Entry and Exit; Long-Run Industry Supply Curve; Ricardian Rents.

(vi) The Use and Usefulness of Economics in the Determination of Public Policy: Equity vs. Efficiency; Market Failure and the normative role for government (An Introduction to Econ 357)

Students must receive a passing grade on the final exam to pass the course.

If a student's letter grade on the final exam exceeds their midterm(s) letter grade, the weight of the midterm(s) is (are) transferred to the final exam. The student must have written the midterm(s) or provided supporting documentation for the absence(s) such as a medical note or statutory declaration.

As per the Writing Across the Curriculum Statement in the Calendar, writing and grading thereof will be a factor in the evaluation of student work. See <https://www.ucalgary.ca/pubs/calendar/current/e-2.html>.

Any student work which remains undistributed after the last day of classes will be available to students through the instructor's office during the instructor's office hours.

The final examination will be an open-book, take-home exam. The exam will be available on D2L 24 hours before the end of the Registrar's scheduled final exam time. Students will hand in their exam in pdf format on D2L prior to the end of the scheduled completion time of their final exam using DropBox. If a student cannot write their final exam during this interval, they need to apply for a deferred exam at www.ucalgary.ca/registrar/exams/deferred_final. Under no circumstance will this be accommodated by the Department.

Tests and exams **WILL NOT** involve multiple choice questions

Programmable calculators, cellphones, textbooks, course notes, and other electronic devices will not be allowed during the writing of tests or final examinations. Students are reminded that simply being able to access their cellphone during an exam is academic misconduct.

The exact date for the in-class midterm will be announced at least one week in advance.

THERE WILL BE NO MAKEUP OR DEFERRED QUIZZES/TESTS/EXAMS under any circumstances, nor may the quizzes/tests/exams be written early.
