### Course Outline:

This course examines how variables and institutions with international linkages influence an economy's macroeconomic behaviour. Throughout the semester students will be presented with specific theoretical analysis: balance of payments, the role of money and relative interest rates, exchange rate models/regimes and their effect on price levels and output. In addition, theories will be analyzed within the context of current policy-oriented issues in open economy macroeconomics. Examples include the choice of exchange rate regimes such as dollarization, currency boards, currency baskets and monetary unions as well as the causes of currency crises.

The course includes, but is not limited to, the following content:

<u>General Topic</u>	<u>Chapters in Feenstra &amp; Taylor</u>
Introduction	Chapter 1
Exchange Rates, Models of Exchange Rate Determination	Chapter 2-4
Balance of Payments Issues	Chapter 5 & 6

**Grade Determination:**

Tests and final exams are marked on a numerical (percentage) basis and converted to letter grades. The course grade is then calculated using the weights indicated above. As a guide to determining standing, these letter grade equivalencies will generally apply:

A+	95 – 100	B	76 – 79	C-	60 – 62
A	90 – 94	B-	70 – 75	D+	56 – 59
A-	85 – 90	C+	66 – 69	D	50 – 55
B+	80 – 84	C	63 – 65	F	0 – 49

Students do not require a passing grade on each assessment in order to pass the course.

**Notes:**

Students seeking reappraisal of a midterm or assignment should discuss their work with the Instructor *within seven days* of the work being returned to the class.
