Course Outline:

This course examines how variables and institutions with international linkages influence an economy's macroeconomic behaviour. Throughout the semester students are presented with specific theoretical analysis: balance of payments, the role of money and relative interest rates, exchange rate models/regimes and their effect on price levels and output. In addition, theories are analyzed within the context of current policy-oriented issues in open economy macroeconomics. Examples include the choice of exchange rate regimes such as dollarization, currency boards, currency baskets and monetary unions as well as the causes of currency crises.

Course content includes, but is not limited to, the following text chapters in:

<u>General Topic</u>	<u>Chapters in Feenstra & Taylor</u>
Introduction	Chapter 1
Exchange Rates, Models of Exchange Rate Determination	Chapter 2-4,11

Tests

There will be three tests this spring semester; each test will be approximately 75 minutes in length and may consist of theoretical, mathematical, graphical, applied, and/or “readings” questions. **Make-up tests will not be given.** In cases of documented illness, documented family emergency, or documented religious observance, the weight of the test will be equally divided between the remaining tests and the final exam (or allotted to the final examination in the case of test #3).

Participation

Participation includes attendance, participation in class, and demonstrated familiarity with the readings. Note: With the exception of test dates, each lecture includes a tutorial covering the final 45 – 60 minutes of the class time. *Absence from a tutorial (without official documented) results in a 5% deduction.*

Final Examination

The *final exam is cumulative* and is 2 hours in length as scheduled by the Registrar's office. More information will be provided towards the end of the term.

All assessments are marked on a numerical (percentage) basis and converted to letter grades. The course grade is then calculated using the weights indicated below. As a guide to determining standing, these letter grade equivalences will apply:

A+	95 – 100	B	73 – 76	C-	60 – 62
A	85 – 94	B-	70 – 72	D+	56 – 59
A-	80 – 84	C+	67 – 69	D	50 – 55
B+	77 – 79	C	63 – 66	F	0 – 49

A passing grade on any particular component of the course is not required for a student to pass the course as a whole.

Non-programmable calculators *will* be allowed during the writing of tests or final examinations.

Tests and exams *will not* involve multiple choice questions.

Notes:

- Students seeking reappraisal of a test should discuss their work with the Instructor *within seven days* of the work being returned to the class.
- All students must comply with the regulations published in the University Calendar concerning "Intellectual Honesty," "Examinations," etc. *Students caught cheating on a test or final exam will automatically receive a grade of F; their actions will be reported to the dean of the Faculty of Arts and to the chair of the Department of Economics according to policy K.2.4.2 of the 2015-16 Academic Calendar.*
- It is the student's responsibility to request academic accommodations. If you are a student with a documented disability who may require academic accommodation and have not registered with the Disability Resource Centre, please contact their office at 220-8237. Students who have not registered with the Disability Resource Centre are not eligible for formal academic accommodation. You are also required to discuss your needs with your instructor no later than seven (7) days after the start of this course.
