### Book(s) on Reserve: N/A

**Desire2Learn:** This course will make use of the Desire2Learn (D2L) platform. Students who are registered in the course can log on at <http://d2l.ucalgary.ca> through their student centre. Please note that D2L features a class e-mail list that may be used to distribute course-related information. The default is your University of Calgary e-mail address.

### Course Outline:

This course follows from, and builds on, Economics 321, International Trade I (but note that Econ 321 is NOT a prerequisite for this course). Economics 425 provides a detailed explanation of trade flows, gains from trade and trade policy measures and considers such issues as: comparative advantage; trade with economies of scale; strategic trade policy in the presence of imperfect competition; trade, growth and technological change; trade-related aspects of intellectual property; and trade, trade policy and the environment. The course examines the nature, causes and consequences of international trade in order to provide the basis for analyzing aspects of trade policy such as: Canadian Commercial Policy (Trade and investment), regional preferential trading arrangements such as NAFTA and the European Union, and global trading arrangements such as the World Trade Organization.

A key focus of the course will be Canada's position in the world economy and the course will critically examine Canada's international trade and investment policy. A list of topics and accompanying readings will be made available during the first week of class

The Department of Economics offers two senior level international economics courses, Economics 425 (International Trade II) and Economics 423 (International Macroeconomics). Economics 425 provides students with a more detailed explanation of trade flows and goes on to consider issues such as:

strategic trade policy in the presence of imperfect competition; trade, growth and technological change; trade-related aspects of intellectual property; and trade, trade policy and the environment. Economics 423 examines international economics from a macro-economic perspective including the financial side of international economics such as exchange rates.
