Course Outline: This course is a joint spring/summer independent study course for MA students. The objective of this summer project is to provide you with an opportunity to conduct your independent research. Specifically during this part, you will:

2. identify an appropriate research method to address your question, and
3. learn how to apply empirical and theoretical skills that you have acquired from core curriculum courses to your specific question.

The instructors' role throughout this course is to support your research when you need it. You need to act promptly and proactively when you seek help. You assume full responsibility for completing your research. A detailed guideline will be presented in the first meeting
