Course Description:
Thematic inquiry and design contextualized by experiential learning in architecture. 
https://www.ucalgary.ca/pubs/calendar/current/architecture.html

This session will introduce students to techniques for real-time rendering and data visualization in the node-based graphics software TouchDesigner. Students will have the opportunity to explore various data inputs including audio and video to create dynamic generative projects. Familiarity with node-based programming e.g. Grasshopper for Rhinoceros 3D is an asset but is not required.

This course may be repeated for credit.
Course Hours: 1.5 units; (3-0)

Course Learning Outcomes:
Upon completion of this course, students will know and be able to:
1. Develop skills in real-time data visualization through research and experimentation.
2. Develop understanding of performance requirements, opportunities and limitations in real-time visualization applications.
3. Develop skills in the synthesis and combination of digital visualization techniques.
4. Demonstrate an understanding of form, flow, evolution, reactivity and data legibility in real-time outputs.

Learning Resources:
Links to supplemental tutorial content will be provided.

Technology requirements (D2L etc.):
In order to successfully engage in their learning experiences at the University of Calgary, students taking online, remote and blended courses are required to have reliable access to the following technology:

- A computer with a supported operating system, as well as the latest security, and malware updates
- A computer with a discrete GPU (e.g. NVIDIA geforce) or advanced integrated graphics (e.g. Apple M1 or M2)
- A current and updated web browser
- Webcam (built-in or external)
- Microphone and speaker (built-in or external), or headset with microphone
- Current antivirus and/or firewall software enabled
- Broadband internet connection
- Software Including:
  - TouchDesigner Non-Commercial (https://derivative.ca/download)
  - Rhino / Grasshopper (+ assignment specific plugins)

Most current laptops will have a built-in webcam, speaker and microphone.

Workshop Safety Training Requirement
If a course requires the use of the SAPL workshop, students must complete all online University of Calgary safety courses, the online Trajectory safety training course, as well as in-person
workshop training and a grade of pass on the final evaluation project, to be granted access to the SAPL workshop. This training is offered once a year, around the start of the Fall term and has a completion deadline.

**Additional Classroom Conduct and Related Information**

**Guidelines for Zoom Sessions in Online Classes**
Students are expected to participate actively in all Zoom sessions and to turn on their webcam. Please join our class in a quiet space that will allow you to be fully present and engaged in the Zoom sessions. Students must behave in a professional manner during the session. Students, employees, and academic staff are also expected to demonstrate behaviour in class that promotes and maintains a positive and productive learning environment.
