Course Description:

The course invites students into the Canadian Architectural Archives (CAA) to explore the archival holdings and understand the value of archival research in the design process. Embedded in the CAA with archivist Robb Gilbert and researcher Mohammad Moezzi, the course will explore key questions about the architectural archive. On the one hand, greater online access enhances the role of archives and enables remote access to the work of architects and designers. On the other hand, the experience of reviewing original archival documents in-person in the reading room is an opportunity to read and understand the documentary record on an irreplaceable physical level. Technology today enables architectural archives to provide researchers with access to the archive through digitization and digital access interfaces. What is gained and what is potentially lost when the experience of in-person archival research has been replaced with the digital archive? The course will take a collaborative approach to exploring views and perspectives on the value of the architectural archive in the work of researchers, designers, conservators, photographers, and archivists.
**Course Topics**

Themes to be explored in this course include, but are not limited to:

- archival research in-person and online
- architectural drawings, theory, and representation
- documentary literacy in the archive, reading design materials of all genres and eras
- the development of digital access tools
- relation of the architect to the documentary record of architecture
- the space of the reading room and its impact on the researcher and the documents consulted
- archives and reading room design
- criticism and writing about architectural drawings, models, and photographs
- preservation of architectural and design records

**Teaching Approach:**

The course will be taught in a collaborative seminar style, with significant student participation, archival study, and guest speakers. Guest speakers will include architects whose archives are held at the CAA, an accomplished researcher, an architectural photographer, a conservator, and an archivist. The archive will form a locus of collaboration between the instructors, students, and guest speakers. Sessions will consist of instructor-led discussion of themes, guest presentations, review of archival materials, and group discussion. The classroom will be in the archives and archival materials will be on-hand and integrated into each session.

**Course Hours:** 1.5 units

**Course Learning Outcomes:**

Upon completion of this course, students will know and be able to:

1. Undertake primary source archival research and develop knowledge of the design materials held in architectural archives.
2. Analyze and interpret the experience of in-person archival research and the challenges and opportunities of online digital archives and virtual reading rooms.
3. Investigate and understand the role of the design professional in the production of archival materials and, in turn, the use of such materials as sources of study in the design profession.
4. Explore methods for writing and communicating design theory based in archival research.
5. Read, interpret, and analyse architectural drawings and physical models, in terms of materiality and its language.
