**Course Description:**
This course invites students to delve into the innovative realm of utilizing Artificial Intelligence (AI) in reinterpreting the typology of buildings in Calgary, aiming to foster exploration and the advancement of new design methodologies. This studio stands witness to an era where the explosive growth of AI is increasingly intertwined with architectural and urban design practices. The current framework employed in architectural design involves the incessant generation of images, such as perspectives or plan/section drawings from AI models, transforming these images into 3D forms, and unearthing spatial values from these forms until satisfactory results are achieved.

*Figure 1. Clusters of Building Form in Montreal Using Deep Learning Model in Data Space (left) and Map Space (right)*
Launching this design research studio, this studio adopts a critical stance on the prevalent tendency to use AI as an oracle in contemporary practices. This studio advocates for a transition: beyond viewing AI as merely the oracle, there lies a vast horizon of benefits to reap from employing AI models in design, both creatively and scientifically. From this standpoint, the course aspires to train AI models on the forms of buildings in Calgary to discover new typomorphologies, subsequently reinterpreting Calgary’s vernacular to propose innovative vernaculars and prototypes.

To realize these objectives, students will complete an architectural design through three progressive phases:

Phase 1. Theoretical Foundation and Explorative Design.
In the initial phase, students engage in readings, drawings, and debates to grasp the relationship between form and space in architectural design, understand what morphology is and its origins, and recognize the significance of the vernacular in design. This phase establishes the design theoretical foundation, setting the stage for the explorative design that characterizes this studio.

Phase 2. AI-Enabled Typology and Vernacular Reinterpretation.
The second phase immerses students in the discovery and reinterpretation of a new vernacular, grounded in AI-assisted typology. Initially, students investigate the vernacular of Calgary’s buildings without AI assistance, understanding the city through its vernacular and variations. Subsequently, with AI’s assistance, they cluster Calgary’s buildings based on morphological features and reinterpret the results to define a new vernacular.

The final phase is dedicated to the design development that materializes the new vernacular. Students will advance the reinterpreted vernacular into prototypes, devising rules for variations. Through site selection, they will analyze suitable locations for applying the prototypes, propose
variations responsive to this analysis, and proceed with the spatial concretization and
development.

This course, lying at the intersection of technology and creative inquiry, is designed for students who aspire to push the conventional boundaries of architectural design and seek to pioneer in the incorporation of AI into dynamic design landscapes.

Course Hours: 6 units;

Online Delivery
As a significant component of this course, we will be leveraging online platforms such as Desire2Learn (D2L) and Zoom to facilitate learning. Throughout the term, students are expected to actively engage in asynchronous learning tasks via the D2L learning environment and synchronous Zoom sessions if they will be. In the event that a student is unable to participate in real-time due to unforeseen circumstances, it is essential to notify the instructor in advance. This will enable us to collaboratively devise an alternative participation plan, which may involve watching recorded sessions, submitting a brief reflection, and actively participating in follow-up online discussions. To ensure a comprehensive understanding of the material, asynchronous online learning requires students to watch recorded lecture videos diligently and conduct their own lab sessions following the instructions provided in the videos.

Course Learning Outcomes:
Upon successful completion of this course, students will have acquired the knowledge and competencies to:

1. comprehend the concept that form serves as an alternate representation of space in architectural contexts,
2. differentiate between 'types' and 'typology' in architectural discourse and gain an in-depth understanding of urban morphology,
3. recognize what constitutes the architectural vernacular and comprehend its significance within the realm of urban architecture,
4. develop the capacity to view urban architecture through the lens of its vernacular and respective variations,
5. understand the capabilities of AI models in learning architectural form data and employing clustering techniques to identify new architectural types,
6. perform typo-morphological analysis, reinterpreting the results from AI model clustering, to identify novel architectural vernaculars,
7. establish prototypes based on the concepts of the reinterpreted vernaculars, and compose variations that respond effectively to specific sites,
8. concretize the spatial qualities inherent in these variations and proceed to develop comprehensive designs for the structures.

These learning outcomes contribute towards equipping students with a multifaceted understanding of both theoretical concepts and practical applications at the intersection of architectural design and artificial intelligence.
Learning Resources:
There is no textbook for this course but reading material will be provided.
The following are useful resources.

Technology Requirements (D2L etc.):
To ensure a productive and enriching learning experience at the University of Calgary, students enrolled in online, remote, and blended courses must have reliable access to the following technology:

- A computer with a supported operating system, equipped with the latest security and malware updates.
- A current and updated web browser to access course materials and online resources.
- A webcam, either built-in or external, to actively participate in virtual sessions and collaborative activities.
- A microphone and speaker (built-in or external) or a headset with a microphone for effective communication during online interactions.
- Current antivirus and/or firewall software enabled to safeguard against potential security threats.
- A broadband internet connection to ensure seamless access to online content and virtual classrooms.

Additionally, this course will utilize specific software tools, namely Grasshopper in Rhinoceros. Students are required to have Rhinoceros version 6.0 or higher (preferably 7.0) and Grasshopper installed on their laptops to fully engage in the course activities.

As the primary platforms for online learning, D2L and Zoom will play essential roles in delivering course materials, conducting virtual lectures, and facilitating interactive discussions. Prioritize ensuring that you have access to D2L and Zoom to make the most of the online learning opportunities provided.

Additional Classroom Conduct and Related Information

Q&A Sessions and Office Hours
D2L has a section for Discussion which will be used for Q&A sessions. Students can post questions about concepts and assignments. Other students can reply to the post to share their experience or ideas and logic about a problem. However, the D2L Discussion is not a place to catch up on missed classes. In necessary circumstances where you are unable to attend class, please make sure to inform us via email and the instructor will address the situation accordingly.

Office hours and supplementary sessions can be conducted remotely through Zoom. The links for these meetings will be announced in D2L or via email.

Digital Works and Back-up Requirements
In this computation course, the majority of the materials and assignments will be in digital format. Therefore, it is imperative for all students to take responsibility for maintaining back-up
files of their digital works and productions. Regardless of the nature of the issue, such as data loss due to electrical problems or the misplacement of storage devices, these circumstances cannot serve as excuses for missed assignments or late submissions.

To ensure the safety and accessibility of your work, it is highly recommended to utilize OneDrive, the cloud storage service provided by the University of Calgary. OneDrive offers a reliable platform with no size limitations, making it an ideal solution for safeguarding your files. By diligently backing up your work, you can confidently approach the course knowing that your progress and efforts are secure and protected from unexpected data loss incidents.

**Plagiarism Policy**

Copying any materials without citation is considered plagiarism and is strictly prohibited in this course. Code plagiarism refers to using code from external sources without proper attribution to the original authors. Any instance of code plagiarism will be treated as a breach of academic integrity, leading to severe consequences as per University policies. Please ensure all code submissions are your own, properly cited, and demonstrate your understanding of the material. If you have questions about using external code or proper citation, seek clarification from the instructor.

**Communication Guidelines**

Please reserve email communication for crucial queries and important concerns. For software-related questions or inquiries about the course content, it is recommended to ask the instructor during office/lab sessions or use the D2L Discussion section. By following these communication guidelines, we can ensure a more efficient and effective means of addressing your inquiries and fostering a collaborative learning environment.

**Guidelines for Zoom Sessions in Online Classes**

Students are expected to participate actively in all Zoom sessions and to turn on their webcam. Please join our class in a quiet space that will allow you to be fully present and engaged in the Zoom sessions. Students must behave in a professional manner during the session. Students, employees, and academic staff are also expected to demonstrate behaviour in class that promotes and maintains a positive and productive learning environment.

**Assessment and Evaluation Information**

**Attendance and Participation Expectations:**
For in-person classes, punctuality is essential, and it is expected that students attend all sessions on time. The course will feature desk crits and small group discussions, and your active engagement in these activities, including asking and answering questions, will be considered as part of your participation. Additionally, your performance in in-class activity sessions, which will occur 1-3 times during each class and last for 20-50 minutes, will also contribute to your overall participation assessment.

**Guidelines for Submitting Assignments:**
Every assignment will include specific submission instructions provided in the assignment handouts and template files. Please ensure that you read and follow these instructions carefully when submitting your work. Following the specified guidelines for submission is crucial for the successful evaluation of your assignments.

**Final Examinations:** There will be no final exam for this course. Instead, we will have a comprehensive 3-hour review session dedicated to the final projects. During this session, students will have the opportunity to present and discuss their final projects in detail. The review will serve as a culmination of your efforts and provide a platform for showcasing your achievements throughout the course.

**Expectations for Writing:**
Expect collegial-level writing. Follow university guidelines.

**Late Assignments:**
A 5%-point deduction will be applied for each day an assignment is submitted late. For instance, if a student submits an assignment (15 points max.) two days late, the highest achievable score for that assignment will be 90% (13.5 points). Please ensure timely submission to avoid any deduction in your scores.

Final Project will have different breakdown and late submission policy, referring to the final project handout.
Criteria that must be met to pass:
Successful completion of assignments is a vital requirement for passing this course. Each assignment should not take more than 2 hours at most to complete. It is strongly recommended to aim for a score of over 70% on each assignment to ensure satisfactory progress.

In the event that you do not meet the desired scores in the assignments, the Final Project presents an additional opportunity to compensate for any low grades. Make the most of this chance to improve your overall grade in the course.

Grading Scale:

<table>
<thead>
<tr>
<th>Grade</th>

<td>0-0.49</td>
<td>0-44.99</td>
<td></td>
</tr>
</tbody>
</table>

A student who receives a "C+" or lower in any one course will be required to withdraw regardless of their grade point average (GPA) unless the program recommends otherwise. If the program permits the student to retake a failed course, the second grade will replace the initial grade in the calculation of the GPA, and both grades will appear on the transcript.

The School of Architecture, Planning and Landscape will not permit the Flexible Grade Option (CG Grade) for any course offered by the School.
https://www.ucalgary.ca/pubs/calendar/current/f-1-3.html

CACB Student Performance Criteria (for Architecture courses only)
The following CACB Student Performance Criteria will be covered in this course at a primary level (other criteria will be covered at a secondary level): A2: Design Skills; A3: Design Tools; B1: Critical Thinking and Communication; B3: Architectural Theory.
## Topic Areas & Detailed Class Schedule

### University of Calgary Policies and Supports

**ACADEMIC ACCOMMODATION**

It is the student’s responsibility to request academic accommodations according to the University policies and procedures listed below. The student accommodation policy can be found at: [https://www.ucalgary.ca/legal-services/university-policies-procedures/student-accommodation-policy](https://www.ucalgary.ca/legal-services/university-policies-procedures/student-accommodation-policy)

Students needing an accommodation because of a disability or medical condition should communicate this need to Student Accessibility Services in accordance with the Procedure for Accommodations for Students with Disabilities: [https://www.ucalgary.ca/legal-services/sites/default/files/teams/1/Policies-Accommodation-for-Students-with-Disabilities-](https://www.ucalgary.ca/legal-services/sites/default/files/teams/1/Policies-Accommodation-for-Students-with-Disabilities-)
Students needing an accommodation in relation to their coursework or to fulfil requirements for a graduate degree, based on a Protected Ground other than Disability, should communicate this need, preferably in writing, to their instructor (contact information on first page above).

SAS will process the request and issue letters of accommodation to instructors. For additional information on support services and accommodations for students with disabilities, visit www.ucalgary.ca/access/.

**ACADEMIC MISCONDUCT**

Academic Misconduct refers to student behavior which compromises proper assessment of a student’s academic activities and includes: cheating; fabrication; falsification; plagiarism; unauthorized assistance; failure to comply with an instructor’s expectations regarding conduct required of students completing academic assessments in their courses; and failure to comply with exam regulations applied by the Registrar.

For information on the Student Academic Misconduct Policy and Procedure please visit: https://www.ucalgary.ca/legal-services/university-policies-procedures/student-academic-misconduct-policy

Additional information is available on the Academic Integrity Website at https://ucalgary.ca/student-services/student-success/learning/academic-integrity.

**COPYRIGHT LEGISLATION:**

All students are required to read the University of Calgary policy on Acceptable Use of Material Protected by Copyright (https://www.ucalgary.ca/legal-services/university-policies-procedures/acceptable-use-material-protected-copyright-policy) and requirements of the copyright act (https://laws-lois.justice.gc.ca/eng/acts/C-42/index.html) to ensure they are aware of the consequences of unauthorised sharing of course materials (including instructor notes, electronic versions of textbooks etc.). Students who use material protected by copyright in violation of this policy may be disciplined under the Non-Academic Misconduct Policy (https://www.ucalgary.ca/pubs/calendar/current/k.html).

**INSTRUCTOR INTELLECTUAL PROPERTY**

Course materials created by instructors (including presentations and posted notes, labs, case studies, assignments and exams) remain the intellectual property of the instructor. These materials may NOT be reproduced, redistributed or copied without the explicit consent of the instructor. The posting of course materials to third party websites such as note-sharing sites without permission is prohibited. Sharing of extracts of these course materials with other students enrolled in the course at the same time may be allowed under fair dealing.

**FREEDOM OF INFORMATION AND PROTECTION OF PRIVACY**

Student information will be collected in accordance with typical (or usual) classroom practice. Students’ assignments will be accessible only by the authorized course faculty. Private
information related to the individual student is treated with the utmost regard by the faculty at the University of Calgary.

**SEXUAL AND GENDER-BASED VIOLENCE POLICY**
The University recognizes that all members of the University Community should be able to learn, work, teach and live in an environment where they are free from harassment, discrimination, and violence. The University of Calgary’s sexual violence policy guides us in how we respond to incidents of sexual violence, including supports available to those who have experienced or witnessed sexual violence, or those who are alleged to have committed sexual violence. It provides clear response procedures and timelines, defines complex concepts, and addresses incidents that occur off-campus in certain circumstances. Please see the policy available at [https://www.ucalgary.ca/legal-services/university-policies-procedures/sexual-and-gender-based-violence-policy](https://www.ucalgary.ca/legal-services/university-policies-procedures/sexual-and-gender-based-violence-policy).

**UNIVERSITY STUDENT APPEALS OFFICE**
If a student has a concern about a grade that they have received, they should refer to Section I of the Undergraduate Calendar ([https://www.ucalgary.ca/pubs/calendar/current/i-3.html](https://www.ucalgary.ca/pubs/calendar/current/i-3.html)) which describes how to have a grade reappraised. In addition, the student should refer to the SAPL’s Procedure for reappraisal of grades

**OTHER IMPORTANT INFORMATION**
Please visit the Registrar’s website at: [https://www.ucalgary.ca/registrar/registration/course-outlines](https://www.ucalgary.ca/registrar/registration/course-outlines) for additional important information on the following:

- Wellness and Mental Health Resources
- Student Success
- Student Ombuds Office
- Student Union (SU) Information
- Graduate Students’ Association (GSA) Information
- Emergency Evacuation/Assembly Points
- Safewalk
