

Urban Design Theory

EVDS 671 H (3-0)

Winter 2013 Friday 09:00 - 11:50

PF 3160

Dr. Beverly A. Sandalack sandalack@ucalgary.ca

PF 3102 or Urban Lab PF 3201 Office Hours by appointment

Teaching Assistant: Ana Galdon

Introduction

This course is intended to provide students with an introduction to theories, concepts, methods, and contemporary issues in urban design. The course consists of lectures, case studies, seminars, and a short project.

What is Urban Design? In 1956, at what is acknowledged to have been the first Urban Design Conference, held at the Harvard Graduate School of Design, Jose Luis Sert articulated a concern for the development of a common ground within the professions that requires them to play unheroic roles. He advocated bringing together the professions involved in the development of the city, in order to get a total picture of the physical environment by the integration of their efforts. Although subsequent conferences were not able to arrive at a conclusive definition of urban design and its sphere of operation, urban design has persisted as an area of concern. There are still relatively few formal programs of urban design (for example, EVDS offered one of only two degree programs in urban design in Canada from 2002-2007), and although the definition of "urban designer" is not determined by any particular professional organization, urban design is still of great importance.

In this course, urban design is considered to be an approach as well as a methodology for city-building. Urban design deals with three-dimensional design of the built urban environment at the scale of the street, neighbourhood, and city, providing integration between landscape and buildings, and with the processes and strategies of development. Urban design is at the intersection of several disciplines. By focusing on the public nature of all urban development, and by bridging the traditional jurisdictions of many professions, urban design has the potential scope to address the wholeness of the city. Issues of local and regional identity and sustainability also inform the course.

Objectives

1. To develop the skills, techniques and vocabulary to describe, analyse and understand urban form and its evolution
2. To critically review theories, methods and concepts in urban design
3. To understand contemporary issues affecting urban development, urban quality and urban life
4. To be able to articulate a personal approach to urban design from the point of view of designer, facilitator, administrator, and/or user

Content

The course will consist of lectures, case studies, seminars and a short project:

1. Several seminal **lectures and case studies** will cover the following inter-related topics:

Why Urban Design?

- overview of the evolution of urban form, and the planning and design ideas influencing urban development
- urban design as an approach / a way of thinking / a state of mind
- who is involved in the design and development of the urban landscape?

Urban process and form

- a landscape approach to urban design
- urban morphology
- urban typology – the elements of urban form

Making better places

- the qualities of good urban form
- the public realm and its evolution in the contemporary city and town
- local and regional identity and sense of place

The case of Calgary

- evolution of city form and process
- land, landscape and townscape
- contemporary urban design issues and case studies

2. **Seminars** on selected urban design theories and theorists will build on the framework of the lectures. Each student (or pair, depending on class size) will select one reference from a circulated list to review and present to the class in a seminar format. Through these seminars, the class will review several key concepts, theories and issues of urban design. Students will also be required to critique the seminar presentations of their peers and synthesize several presentation topics.

3. Project

Students will document and analyse the historic evolution of a small portion of the city centre from a circulated list and critically evaluate it in terms of the concepts and theories discussed in the course. Students will prepare a presentation panel summarizing and illustrating the analysis, and also submit the work digitally. Guidelines and requirements for the panels and digital files will be provided.

Evaluation

Evaluation will be based on the assignments, completed during the term.

Seminar	40%
Seminar critique	10%
Project	
documentation, graphics	25%
analysis, verbal presentation	25%
Total	100%

Notes:

A passing grade (B-) in each section (seminar, critique, project) is required in order to pass the course as a whole. Work completed as a group or pair will receive a common grade, unless it is clear to the instructor that the balance of the work has been unfairly distributed between team members.

All assignments will be evaluated by letter grades. Final course grades will be reported as letter grades, with the final grade calculated according to the 4-point range.

Letter Grade	4-Point Scale	4-Point Range	Description
A+	4.00	4.00	Outstanding - evaluated by instructor
A	4.00	3.85-4.00	Excellent - superior performance showing comprehensive understanding of the subject matter
A-	3.70	3.50-3.84	Very good performance
B+	3.30	3.15-3.49	Good performance
B	3.00	2.85-3.14	Satisfactory performance
B-	2.70	2.50-2.84	Minimum pass for students in the Faculty of Graduate Studies
C+	2.30	2.15-2.49	All final grades below B- are indicative of failure at the graduate level and cannot be counted toward Faculty of Graduate Studies course requirements.
C	2.00	1.85-2.14	
C-	1.70	1.50-1.84	
D+	1.30	1.15-1.49	
D	1.00	0.50-1.14	
F	0.00	0-0.49	

Note: A student who receives a C+ or lower in any one course will be required to withdraw regardless of their grade point average (GPA) unless the program recommends otherwise. If the program permits the student to retake a failed course, the second grade will replace the initial grade in the calculation of the GPA, and both grades will appear on the transcript.

Special Budgetary Considerations

Site visits will be possible on foot or by LRT/bus. Required base maps and air photos will be provided, or will be available from the SANDS (Spatial and Numeric Data Services) or on-line, and any additional information and associated costs will be at the discretion of the student. Students should have basic drawing tools (pencils, a small selection of markers, scale, sketch roll, other paper), although most/all of the graphic analysis may be done through digital means. Some costs for plotting and printing should be anticipated, as per EVDS practice.

Readings

Specific readings will be assigned. Students are encouraged to read widely from the general reference list below. It is expected that students will have a general understanding of the history of cities. Students without this background are strongly advised to read either Morris, AEJ (1979) *History of Urban Form* or Mumford, L (1961) *The City in History* prior to or early in the term. Students are encouraged to acquire one of the urban design readers.

URBAN DESIGN REFERENCES Short List

urban design / city readers, compendia and standards (older editions are also fine):

American Planning Association (2006) *Planning and Urban Design Standards* (Wiley Graphic Standards)
Carmona, Matthew and Steve Tiesdell (2007) *Urban Design Reader*, Architectural Press
Charette, Catherine (ed.) (1995) *Issues in Canadian Urban Design*, Institute for Urban Studies, University of Winnipeg
English Partnerships (several printings) *The Urban Design Compendium*. You can order this (it is FREE) on line from <http://www.englishpartnerships.co.uk/PublicationsOrderForm.aspx>
Grant, Jill (2007) *Reader in Canadian Planning: Linking Theory and Practice*, Thompson Nelson Canada, Scarborough
Jencks, Charles and Karl Kropf (eds.) (1997) *Theories/Manifestoes of Contemporary Architecture* Academy Editions
Larice, Michael and Elizabeth Macdonald (2007) *The Urban Design Reader*, Routledge
LeGates, Richard T. and Frederic Stout (1996) *The City Reader*, Routledge
Waldheim, Charles (2006) *The Landscape Urbanism Reader*, New York, NY: Princeton Architectural Press

recommended texts

Alexander, Christopher et al (1977) *A Pattern Language* (Oxford University Press)
Bacon, Edmund N. (1974) *Design of Cities* (New York: Penguin Books)
Bentley, Ian. et al (1985) *Responsive Environments: A Manual for Designers* (Architectural Press)
Calthorpe, Peter (1993) *The Next American Metropolis* (New York: Princeton Architectural Press)
Ellin, Nan (1996) *Postmodern Urbanism* (Oxford: Blackwell Publishers)
Gehl, Jan (1987) *Life Between Buildings: Using Public Space*
Hough, Michael (1990) *Out of Place: Restoring Identity to the Regional Landscape* (Yale University Press)
Hough, Michael (1994) *Cities and Natural Process* (Routledge)

Notes:

1. Written work, term assignments and other course related work may only be submitted by e-mail if prior permission to do so has been obtained from the course instructor. Submissions must come from an official University of Calgary (ucalgary) email account.
2. It is the student's responsibility to request academic accommodations. If you are a student with a documented disability who may require academic accommodation and have not registered with the Disability Resource Centre, please contact their office at 220-8237. (<http://www.ucalgary.ca/drc/node/46>) Students who have not registered with the Disability Resource Centre are not eligible for formal academic accommodation. You are also required to discuss your needs with your instructor no later than fourteen (14) days after the start of this course.
3. Plagiarism - Plagiarism involves submitting or presenting work in a course as if it were the student's own work done expressly for that particular course when, in fact, it is not. Most commonly plagiarism exists when:(a) the work submitted or presented was done, in whole or in part, by an individual other than the one submitting or presenting the work (this includes having another impersonate the student or otherwise substituting the work of another for one's own in an examination or test),(b) parts of the work are taken from another source without reference to the original author,(c) the whole work (e.g., an essay) is copied from another source, and/or,(d) a student submits or presents work in one course which has also been submitted in another course(although it may be completely original with that student) without the knowledge of or prior agreement of the instructor involved. While it is recognized that scholarly work often involves reference to the ideas, data and conclusions of other scholars, intellectual honesty requires that such references be explicitly and clearly noted. Plagiarism is an extremely serious academic offence. It is recognized that clause (d) does not prevent a graduate student incorporating work previously done by him or her in a thesis. Any suspicion of plagiarism will be reported to the Dean, and dealt with as per the regulations in the University of Calgary Graduate Calendar.
4. Information regarding the Freedom of Information and Protection of Privacy Act (<http://www.ucalgary.ca/secretariat/privacy>) and how this impacts the receipt and delivery of course material
5. Emergency Evacuation/Assembly Points (<http://www.ucalgary.ca/emergencyplan/assemblypoints>)
6. Safewalk information (<http://www.ucalgary.ca/security/safewalk>)
7. Contact Info for: Student Union (<http://www.su.ucalgary.ca/page/affordability-accessibility/contact>); Graduate Student representative(<http://www.ucalgary.ca/gsa/>) and Student Ombudsman's Office (<http://www.su.ucalgary.ca/page/quality-education/academic-services/student-rights>).
