

UNIVERSITY OF CALGARY
FACULTY OF SCIENCE
DEPARTMENT OF GEOSCIENCE
COURSE OUTLINE

1. **Course:** GOPH 547, Gravity And Magnetism -- Winter 2018

Lecture 01: (MWF, 13:00-13:50 in SB105)

Instructor Name	Email	Phone	Office	Hours
Brandon Karchewski	brandon.karchewski@ucalgary.ca	403-220-6678	ES 108	By appt

Lab Schedule:

- B01: Th, 14:00 – 16:50, ES 924
- B02: Th, 17:00 – 19:50, ES 924
- B03: We, 14:00 – 16:50, ES 924

Course Site:

D2L: GOPH 547 L01-(Winter 2018)-Gravity And Magnetism

Department of Geoscience: ES 118, 403 220-5841, geoscience@ucalgary.ca

Students must use their U of C account for all course correspondence.

Teaching Assistants:

- Ye Sun, ye.sun@ucalgary.ca, *Lab Section(s):* TBD
- Hormoz Izadi, hizadi@ucalgary.ca, *Lab Section(s):* TBD

2. **Prerequisites:**

See section [3.5.C](#) in the Faculty of Science section of the online Calendar.

Geophysics 351 or 355 or 359; Mathematics 331; and Applied Mathematics 415.

3. **Grading:**

The University policy on grading and related matters is described in [F.1](#) and [F.2](#) of the online University Calendar. In determining the overall grade in the course the following weights will be used:

Component(s)	Weighting %
Lab Assignments/Reports*	25%
iRAT/tRAT Quizzes*	15%
Midterm Exam	25%
Final Exam**	35%

Each piece of work (reports, assignments, quizzes, midterm exam(s) or final examination) submitted by the student will be assigned a grade. The student's grade for each component listed above will be combined with the indicated weights to produce an overall percentage for the course, which will be used to determine the course letter grade.

The conversion between a percentage grade and letter grade is as follows;

Letter Grade	A+	A	A-	B+	B	B-	C+	C	C-	D+	D
Minimum Percent Required	95	90	85	80	75	70	65	62	60	55	50

The course is divided into several modules or topics (see Course Schedule at the end of this document). Each module will consist of two to three lectures introducing the module content, one lecture period for completing practice problems and a set of Readiness Assurance Tests or "RATs". The RAT will have two parts: one completed individually (the iRAT) and one completed with a team (the tRAT). This modular format is designed to give students appropriate background and practice with each of the course topics. There will also be four (4) lab assignments, which will include significant computation and/or measurement and a written report. The lab assignment topics will be as follows: 1) Gravity anomaly forward modelling, 2) Gravity survey corrections, 3) Measurement of free air gradient with a gravimeter and 4) Residual removal and upward/downward continuation of magnetic data. The lab periods will provide an opportunity for students to work on the lab assignments and reports, collaborate with peers and discuss difficulties with TAs.

4. Missed Components of Term Work:

The regulations of the Faculty of Science pertaining to this matter are found in the Faculty of Science area of the Calendar in [Section 3.6](#). It is the student's responsibility to familiarize himself/herself with these regulations. See also [Section E.3](#) of the University Calendar

5. Scheduled out-of-class activities:

There are no out-of-class activities scheduled for this course.

REGULARLY SCHEDULED CLASSES HAVE PRECEDENCE OVER ANY OUT-OF-CLASS-TIME-ACTIVITY. If you have a conflict with the out-of-class-time-activity, please contact your course coordinator/instructor no later than **14 days prior** to the date of the out-of-class activity so that alternative arrangements may be made.

6. Course Materials:

Optional Textbook(s):

W.J. Hinze, R.R.B. von Frese, A.H. Saad. (2013)., Gravity and Magnetic Exploration: Principles, Practices and Applications, Cambridge University Press

W.M. Telford, L.P. Geldart, R.E. Sheriff. (1990)., Applied Geophysics, 2nd Edition, Cambridge University Press

Either of the above texts will provide a good reference for most of the course content. It is highly recommended, but not absolutely required to have at least one of these texts. You may already have Telford et al. (1990) from a previous geophysics course. Note that this text is over 15 years old, and the theory is still up-to-date, but the references to global geophysical models for the gravitational and magnetic fields may be out-of-date. The instructor will also post supplemental notes or links to other resources on D2L (<https://d2l.ucalgary.ca/login.asp>).

For in-class quizzes and term tests, you may use course notes, online reference and any calculator (including Matlab or Excel). You can obtain a student license for Matlab for your personal computer by visiting the University of Calgary IT Software Distribution website (<https://iac01.ucalgary.ca/SDSWeb/>) and following the instructions provided.

7. Examination Policy:

All exams and quizzes are "open book". During an exam or quiz, you may consult any course materials including notes and previous exams or quizzes *which you have made yourself*. You may not consult exams or quizzes from previous years. You *may* access the internet during an examination, but *may not* use email or other forms of communication (written, verbal, electronic) except to communicate with the course instructor or TAs. The use of calculators or computers for computation is encouraged. Students should also read the Calendar, [Section G](#), on Examinations.

Students should also read the Calendar, [Section G](#), on Examinations.

8. Approved Mandatory and Optional Course Supplemental Fees:

There are no mandatory or optional course supplemental fees for this course

9. Writing across the Curriculum Statement:

For all components of the course, in any written work, the quality of the student's writing (language, spelling, grammar, presentation etc.) can be a factor in the evaluation of those reports. See also [Section E.2](#) of the University Calendar.

In this course, the quality of the student's writing in laboratory reports will be a factor in the evaluation of those reports. See also [Section E.2](#) of the University Calendar.

10. Human studies statement:

Students will not participate as subjects or researchers in human studies.

11. Reappraisal of Grades:

A student wishing a reappraisal, should first attempt to review the graded work with the Course coordinator/instructor or department offering the course. Students with sufficient academic grounds may request a reappraisal. Non-academic grounds are not relevant for grade reappraisals. Students should be aware that the grade being reappraised may be raised, lowered or remain the same. See [Section I.3](#) of the University Calendar.

1. **Term Work:** The student should present their rationale as effectively and as fully as possible to the Course coordinator/instructor within **15 days** of either being notified about the mark, or of the item's return to the class. If the student is not satisfied with the outcome, the student shall immediately submit the Reappraisal of Graded Term work form to the department in which the course is offered. The department will arrange for a re-assessment of the work if, and only if, the student has sufficient academic grounds. See sections [I.1](#) and [I.2](#) of the University Calendar
2. **Final Exam:** The student shall submit the request to Enrolment Services. See [Section I.3](#) of the University Calendar.

12. OTHER IMPORTANT INFORMATION FOR STUDENTS:

- a. **Misconduct:** Academic misconduct (cheating, plagiarism, or any other form) is a very serious offence that will be dealt with rigorously in all cases. A single offence may lead to disciplinary probation or suspension or expulsion. The Faculty of Science follows a zero tolerance policy regarding dishonesty. Please read the sections of the University Calendar under [Section K](#). Student Misconduct to inform yourself of definitions, processes and penalties. Examples of academic misconduct may include: submitting or presenting work as if it were the student's own work when it is not; submitting or presenting work in one course which has also been submitted in another course without the instructor's permission; collaborating in whole or in part without prior agreement of the instructor; borrowing experimental values from others without the instructor's approval; falsification/ fabrication of experimental values in a report. **These are only examples.**
- b. **Assembly Points:** In case of emergency during class time, be sure to FAMILIARIZE YOURSELF with the information on [assembly points](#).
- c. **Academic Accommodation Policy:** Students needing an accommodation because of a disability or medical condition should contact Student Accessibility Services in accordance with the procedure for accommodations for students with disabilities available at [procedure-for-accomodations-for-students-with-disabilities_0.pdf](#).

Students needing an accommodation in relation to their coursework or to fulfill requirements for a graduate degree, based on a protected ground other than disability, should communicate this need, preferably in writing, to the Sr. Instructor of the Department of Geoscience, Dr. Rudi Meyer by email rmeyer@ucalgary.ca or phone 403-210-7848. Religious accommodation requests relating to class, test or exam scheduling or absences must be submitted no later than **14 days** prior to the date in question: <http://www.ucalgary.ca/pubs/calendar/current/e-4.html>

- d. **Safewalk:** Campus Security will escort individuals day or night (www.ucalgary.ca/security/safewalk/). Call [403-220-5333](tel:403-220-5333) for assistance. Use any campus phone, emergency phone or the yellow phones located at most parking lot pay booths.
- e. **Freedom of Information and Privacy:** This course is conducted in accordance with the Freedom of Information and Protection of Privacy Act (FOIPPA). Students should identify themselves on all written work by placing their name on the front page and their ID number on each subsequent page. For more information, see also www.ucalgary.ca/legalservices/foip.
- f. **Student Union Information:** [VP Academic](#), Phone: [403-220-3911](tel:403-220-3911) Email: suvpaca@ucalgary.ca. SU Faculty Rep., Phone: [403-220-3913](tel:403-220-3913) Email: sciencerep@su.ucalgary.ca. Student Ombudsman, Email: suvpaca@ucalgary.ca.
- g. **Internet and Electronic Device Information:** Unless instructed otherwise, cell phones should be turned off during class. All communication with other individuals via laptop, tablet, smart phone or other device is prohibited during class unless specifically permitted by the instructor. Students that violate this policy may be asked to leave the classroom. Repeated violations may result in a charge of misconduct.
- h. **Surveys:** At the University of Calgary, feedback through the Universal Student Ratings of Instruction ([USRI](#)) survey and the Faculty of Science Teaching Feedback form provides valuable information to help with evaluating instruction, enhancing learning and teaching, and selecting courses. Your responses make a difference - please participate in these surveys.
- i. **SU Wellness Center:** The Students Union Wellness Centre provides health and wellness support for students including information and counselling on physical health, mental health and nutrition. For more information, see www.ucalgary.ca/wellnesscentre or call [403-210-9355](tel:403-210-9355).

Department Approval:

Electronically Approved

Date: 2017-12-22 19:32

Course Outcomes

1. Explain the nature of Earth's gravity and magnetic fields.
2. Identify the main points in the history of the development of our current models of these fields and explain the relevance of the scientists that contributed to this development.
3. Apply the mathematical theory of potential fields to solve problems relevant to geophysical surveying (e.g. determine the expected gravitational and/or magnetic field of bodies with simple and complex shapes).
4. Calculate typical corrections to survey data to plot and interpret a gravitational or magnetic anomaly map.
5. Perform the analysis in CLO #3 and #4 using modern computational tools (e.g. Matlab, Excel).
6. Communicate the results of a gravitational or magnetic survey to peers in the geophysics/scientific community and critically evaluate the work of peers.
