This course introduces deeper tools, skills, and techniques for collecting, manipulating, visualizing, analyzing, and presenting a number of different common types of data. With a data life-cycle perspective, we will discuss data collection and preparation as well as the usage of data in a decision-making context. The course will also introduce techniques for visualizing and supporting the interactive analysis and decision making for a variety of different types of data, including text, networks, and geographic datasets. The class will also focus on critical thinking and good analysis practices to avoid cognitive biases when designing, thinking, analyzing, and making decisions based on data.

**Course Objectives**

- **Visualization Types.** Students should be aware of a variety of specific domain areas in information visualization such as text visualization, tree and network visualization, maps, multidimensional data visualization, physical visualization, and casual/personal visualization.
- **Visualization Assessment.** Students should be able to interpret, critique, and deconstruct visualizations created by others.
- **Exploratory Data Analysis.** Students should be able to conduct exploratory data analysis on real, complex data sets by creating new visualizations in tools like Tableau and Jupyter.
- **Presentation.** Students should be able to create visual presentations of their analytic results, including dashboards, graphical reports, presentations, and stories.
- **Data and Ethics.** Students should be aware of the ethical implications of data collection and analytics. Students should be able to identify problematic data collection and experimentation practices, anonymize datasets, and describe good data security practices.

Datathon Assignments	60%	
Data Story Critique Presentation	15%	
Final Project	25%	

Each of the above components will be given a letter grade using the official university grading system (see [section F.1.1](#)). The final grade will be calculated using the grade point equivalents weighted by the percentages given above and then converted to a final letter grade using the official university grade point equivalents.
