

COURSE OUTLINE

1. **Course:** MATH 265, University Calculus I - Fall 2023

Coordinator(s)

Name	Email	Phone	Office	Hours
Dr. Lauren DeDieu	lauren.dedieu@ucalgary.ca	403 220-5056	MS 528	See D2L

Section(s)

Lecture 01 : MWF 15:00 - 15:50 in ST 148

Instructor	Email	Phone	Office	Hours
Dr. Lauren DeDieu	lauren.dedieu@ucalgary.ca	403 220-5056	MS 528	See D2L

Lecture 02 : MWF 10:00 - 10:50 in ENG 60

Instructor	Email	Phone	Office	Hours
Dr. Sedanur Albayrak	gulizar.albayrak@ucalgary.ca		MS 464	TBA

Lecture 03 : MWF 09:00 - 09:50 in ENG 60

Instructor	Email	Phone	Office	Hours
Dr. Sedanur Albayrak	gulizar.albayrak@ucalgary.ca		MS 464	TBA

Lecture 04 : MWF 12:00 - 12:50 in ENG 60

Instructor	Email	Phone	Office	Hours
Danny Glin	dlglin@ucalgary.ca	403 220-7598	MS 456	TBA

Lecture 05 : TR 11:00 - 12:15 in ENG 60

Instructor	Email	Phone	Office	Hours
Thomas Theurer	TBA	TBA	TBA	TBA

To account for any necessary transition to remote learning for the current semester, courses with in-person lectures, labs, or tutorials may be shifted to remote delivery for a certain period of time. In addition, adjustments may be made to the modality and format of assessments and deadlines, as well as to other course components and/or requirements, so that all coursework tasks are in line with the necessary and evolving health precautions for all involved (students and staff).

In Person Delivery Details:

This is an in-person course. In particular, all lectures and tests will be delivered in person.

Course Site:

D2L: MATH 265 - (Fall 2023) - University Calculus I

Note: Students must use their U of C account for all course correspondence.

Labs

The labs are asynchronous (i.e., no live labs). Students should complete their weekly quiz during this asynchronous lab time each week (i.e., at a time of their convenience before the quiz deadline).

Email policy

Please see below for where you should direct your questions:

- Questions about mathematics are best answered in person. As such, you should ask your **mathematical content** questions during class, office hours, or at the Math Help Centre (MS 457).
- Questions about **course organization** should be posted to the "General Course Questions" Discussion Board on D2L.
- All **questions of a personal nature** (e.g., accommodations, missed assessments) should be directed to your course coordinator (lauren.dedieu@ucalgary.ca). You can usually expect a response within 48 hours

(except on weekends and holidays).

In particular, note that emails that contain questions about mathematics and/or questions about course organization will not receive a response. (See above for where to direct these questions)

Supplementary online content (videos)

The supplementary content videos posted to D2L contain definitions and theorems. The examples contained in these videos are at an introductory level. While these videos are not a replacement for attending classes, we encourage you to make use of them to reinforce key ideas. If you are not feeling well, or you have any symptoms of respiratory illness, we do encourage you to stay home and watch the content videos for the topics you miss in class. Once you are well, you can visit the Math Help Centre, and talk to your instructor, for additional support.

Note: To succeed in this course, students must engage with the “Dino Problem” worksheets posted on D2L (these are test-level questions).

Equity Diversity & Inclusion:

The University of Calgary is committed to creating an equitable, diverse and inclusive campus, and condemns harm and discrimination of any form. We value all persons regardless of their race, gender, ethnicity, age, LGBTQIA2S+ identity and expression, disability, religion, spirituality, and socioeconomic status. The Faculty of Science strives to extend these values in every aspect of our courses, research, and teachings to better promote academic excellence and foster belonging for all.

2. Requisites:

See section [3.5.C](#) in the Faculty of Science section of the online Calendar.

Prerequisite(s):

Mathematics 30-1, 212 or Mathematics 2 (offered by Continuing Education); and Mathematics 31 or Mathematics 3 (offered by Continuing Education).

Antirequisite(s):

Credit for Mathematics 265 and either 249 or 275 will not be allowed.

3. Grading:

The University policy on grading and related matters is described in [F.1](#) and [F.2](#) of the online University Calendar.

In determining the overall grade in the course the following weights will be used:

Course Component	Weight	Due Date (duration for exams)	Modality for exams	Location for exams
WeBWork Assignments (5) ¹	15%	Ongoing		
D2L Quizzes (best 10 of 12) ²	15%	Ongoing		
Tests (best 2 of 3) ³	70%	Ongoing		
Registrar Scheduled Final Exam ⁴	0%	Will be available when the final exam schedule is released by the Registrar	in person	Will be available when the final exam schedule is released by the Registrar

¹ WeBWork due dates are: Sept. 25th, Oct. 10th, Oct. 23rd, Nov. 6th, Dec. 4th.

² D2L Quiz due dates are: Sept. 11th, Sept. 18th, Sept. 25th, Oct. 2nd, Oct. 10th, Oct. 18th, Oct. 23rd, Oct. 30th, Nov. 6th, Nov. 22nd, Nov. 27th, Dec. 4th. D2L Quizzes will not be timed. You may open and close a D2L quiz as many times as you'd like. If a student misses a quiz, that will be the one automatically dropped as being the lowest. Each quiz has two attempts. To calculate your quiz grade, we take the highest of the two quiz attempts.

³ The dates for Test 1 and Test 2 can be found below in "Section 5: Scheduled Out-of-Class Activities". Test 3 will be scheduled by the Registrar during the Final Exam period. The lowest test score will be dropped. If a student misses a test, that will be the one automatically dropped as being the lowest.

⁴ The assessment written during our "Registrar Scheduled Final Exam" block will be Test 3. Please see the footnote above for more information about the "Tests" course component.

Each piece of work (reports, assignments, quizzes, midterm exam(s) or final examination) submitted by the student will be assigned a grade. The student's grade for each component listed above will be combined with the indicated weights to produce an overall percentage for the course, which will be used to determine the course letter grade.

The conversion between a percentage grade and letter grade is as follows.

	A+	A	A-	B+	B	B-	C+	C	C-	D+	D
Minimum % Required	95 %	90 %	85 %	80%	76%	72 %	68 %	64%	60%	55 %	50 %

This course will have a Registrar Scheduled Final exam that will be delivered in-person and on campus. The Final Examination Schedule will be published by the Registrar's Office approximately one month after the start of the term. The final exam for this course will be designed to be completed within 2 hours.

The University of Calgary offers a flexible grade option, Credit Granted (CG) to support student's breadth of learning and student wellness. Faculty units may have additional requirements or restrictions for the use of the CG grade at the faculty, degree or program level. To see the full list of Faculty of Science courses where CG is not eligible, please visit the following website: <https://science.ucalgary.ca/current-students/undergraduate/program-advising/flexible-grading-option-cg-grade>

4. **Missed Components Of Term Work:**

In the event that a student legitimately fails to submit any online or in-person assessment on time (e.g. due to illness, domestic affliction, etc...), please contact the course coordinator, or the course instructor if this course does not have a coordinator to arrange for a re-adjustment of a submission date, or possible exemption and reweighing of components. Absences not reported within 48 hours will not be accommodated. Students may be asked to provide supporting documentation (Section M.1) for an excused absence, See FAQ.

If an excused absence is approved, options for how the missed assessment is dealt with is at the discretion of the coordinator or course instructor. Some options such as an exemption and pro-rating among the components of the course may not be a viable option based on the design of this course.

WeBWork: If you miss a WeBWork assignment, no extensions will be granted barring exceptional circumstances (see * below).

D2L Quizzes:

- You can miss up to two D2L quizzes throughout the semester. The two lowest quizzes will be dropped, so if you miss up to two quizzes, then these are the scores that we will drop.
- You are permitted to submit up to two quizzes late. In the event that you submit a quiz late, there is no need to contact anyone; the system will mark the quiz as "late" but your score will be entered in the D2L Gradebook as normal (no penalty). If you submit more than two quizzes late, then these quiz scores will receive a 0% at the end of the semester. All quizzes (including late submissions) must be submitted by Wednesday Dec. 6th. Quizzes will no longer be available to write after Dec. 6th.

Tests: There are no make-up tests barring exceptional circumstances (see * below).

***Exceptional Circumstances:** If exceptional circumstances (e.g., extended illness, emergency, etc.) arise, then contact your course coordinator (lauren.dedieu@ucalgary.ca) by email within 48 hours of the assessment deadline. Accommodations in exceptional circumstances will be made on a case-by-case basis. If you miss Test 3 due to exceptional circumstances, then you must apply to the Registrar to write it during the Deferred Final Exam period.

5. **Scheduled Out-of-Class Activities:**

The following out of class activities are scheduled for this course.

Activity	Location	Date and Time	Duration
Midterm - 1	On-Campus, room to be announced	Wednesday, October 11, 2023 at 6:30 pm	2 Hours
Midterm - 2	On-Campus, room to be announced	Thursday, November 9, 2023 at 6:30 pm	2 Hours

REGULARLY SCHEDULED CLASSES HAVE PRECEDENCE OVER ANY OUT-OF-CLASS-TIME-ACTIVITY. If you have a conflict with the out-of-class-time-activity, please contact your course coordinator/instructor no later than **14 days prior** to the date of the out-of-class activity so that alternative arrangements may be made.

6. Course Materials:

Required Textbook(s):

Joel Feldman, Andrew Rechnitzer, Elyse Yeager, *CLP Calculus Textbooks: CLP-I Differential Calculus and CLP-II Integral Calculus*.: Open access eBook <http://www.math.ubc.ca/~CLP>.

In order to successfully engage in their learning experiences at the University of Calgary, students taking online, remote and blended courses are required to have reliable access to the following technology:

- A computer with a supported operating system, as well as the latest security, and malware updates;
- A current and updated web browser;
- Webcam/Camera (built-in or external);
- Microphone and speaker (built-in or external), or headset with microphone;
- Current antivirus and/or firewall software enabled;
- Stable internet connection.

For more information please refer to the UofC [ELearning](#) online website.

7. Examination Policy:

Homework Answer Services: You may NOT use homework answer services (e.g. Chegg.com) on any assessments. Posting and/or viewing solutions from such services is considered academic misconduct.

Collaborating with Peers: You may not collaborate with your peers (or anyone else) during tests. D2L Quizzes must be completed independently. You may consult with your peers for WeBWork assignments.

Calculators:

- No aids are allowed on tests. In particular, no electronic devices of any kind permitted in the examination rooms for the tests. This includes, but is not limited to, calculators, phones, smart watches, tablets, laptops, headphones and any bluetooth-enabled device. Failure to comply with this regulation will result in the rejection of the examination paper.
- You may use graphing calculators and online computer algebra systems for WeBWork and quizzes, but we caution against relying on them too much, because you won't have access to calculators on the tests, so it's important that you are capable of doing the computations on your own.

Discussing Assessment Questions Publicly After the Due Date: Since our quizzes don't have a firm close date (i.e., students can submit two quizzes late), we ask that you do not discuss quiz solutions publicly. Similarly, for other assessments we ask that you do not discuss the questions publicly until after we have posted the key. Keeping the assessments private will allow us to better accommodate students with extenuating circumstances.

Students should also read the Calendar, [Section G](#), on Examinations.

8. Approved Mandatory And Optional Course Supplemental Fees:

There are no mandatory or optional course supplemental fees for this course.

9. Writing Across The Curriculum Statement:

For all components of the course, in any written work, the quality of the student's writing (language, spelling, grammar, presentation etc.) can be a factor in the evaluation of the work. See also [Section E.2](#) of the University Calendar.

10. Human Studies Statement:

Students will not participate as subjects or researchers in human studies.

See also [Section E.5](#) of the University Calendar.

11. Reappraisal Of Grades:

A student wishing a reappraisal, should first attempt to review the graded work with the Course coordinator/instructor or department offering the course. Students with sufficient academic grounds may request a reappraisal. Non-academic grounds are not relevant for grade reappraisals. Students should be aware that the grade being reappraised may be raised, lowered or remain the same. See [Section I.3](#) of the University Calendar.

- Term Work:** The student should present their rationale as effectively and as fully as possible to the Course coordinator/instructor within **ten business days** of either being notified about the mark, or of the item's return to the class. If the student is not satisfied with the outcome, the student shall submit the Reappraisal of Graded Term work form to the department in which the course is offered within 2 business days of

receiving the decision from the instructor. The Department will arrange for a reappraisal of the work within the next ten business days. The reappraisal will only be considered if the student provides a detailed rationale that outlines where and for what reason an error is suspected. See sections [I.1](#) and [I.2](#) of the University Calendar

- b. **Final Exam:** The student shall submit the request to Enrolment Services. See [Section I.3](#) of the University Calendar.

12. Other Important Information For Students:

- a. **Mental Health** The University of Calgary recognizes the pivotal role that student mental health plays in physical health, social connectedness and academic success, and aspires to create a caring and supportive campus community where individuals can freely talk about mental health and receive supports when needed. We encourage you to explore the mental health resources available throughout the university community, such as counselling, self-help resources, peer support or skills-building available through the SU Wellness Centre (Room 370, MacEwan Student Centre, [Mental Health Services Website](#)) and the Campus Mental Health Strategy website ([Mental Health](#)).
- b. **SU Wellness Services:** For more information, see their [website](#) or call [403-210-9355](#).
- c. **Sexual Violence:** The Sexual Violence Support Advocate, Carla Bertsch, can provide confidential support and information regarding sexual violence to all members of the university community. Carla can be reached by email (svsa@ucalgary.ca) or phone at [403-220-2208](#). The complete University of Calgary policy on sexual violence can be viewed [here](#).
- d. **Student Ombuds Office:** A safe place for all students of the University of Calgary to discuss student related issues, interpersonal conflict, academic and non-academic concerns, and many other problems.
- e. **Student Union Information:** [SU contact](#), Email your SU Science Reps: science1@su.ucalgary.ca, science2@su.ucalgary.ca, science3@su.ucalgary.ca,
- f. **Academic Accommodation Policy:**

It is the student's responsibility to request academic accommodations according to the University policies and procedures listed below. The student accommodation policy can be found at: <https://www.ucalgary.ca/legal-services/sites/default/files/teams/1/Policies-Student-Accommodation-Policy.pdf>

Students needing an accommodation because of a disability or medical condition should communicate this need to Student Accessibility Services in accordance with the Procedure for Accommodations for Students with Disabilities: <https://www.ucalgary.ca/legal-services/sites/default/files/teams/1/Policies-Accommodation-for-Students-with-Disabilities-Procedure.pdf>.

Students needing an accommodation in relation to their coursework or to fulfil requirements for a graduate degree, based on a Protected Ground other than Disability, should communicate this need, by filling out the [Request for Academic Accommodation Form](#) and sending it to Jerrod Smith by email jerrod.smith@ucalgary.ca preferably 10 business days before the due date of an assessment or scheduled absence.

- g. **Misconduct:** Academic integrity is the foundation of the development and acquisition of knowledge and is based on values of honesty, trust, responsibility, and respect. We expect members of our community to act with integrity. Research integrity, ethics, and principles of conduct are key to academic integrity. Members of our campus community are required to abide by our institutional [Code of Conduct](#) and promote academic integrity in upholding the University of Calgary's reputation of excellence. Some examples of academic misconduct include but are not limited to: posting course material to online platforms or file sharing without the course instructor's consent; submitting or presenting work as if it were the student's own work; submitting or presenting work in one course which has also been submitted in another course without the instructor's permission; borrowing experimental values from others without the instructor's approval; falsification/fabrication of experimental values in a report. Please read the following to inform yourself more on academic integrity:

[Student Handbook on Academic Integrity](#)
[Student Academic Misconduct Policy and Procedure](#)
[Faculty of Science Academic Misconduct Process](#)
[Research Integrity Policy](#)

Additional information is available on the [Student Success Centre Academic Integrity page](#)

- h. **Copyright of Course Materials:** All course materials (including those posted on the course D2L site, a

course website, or used in any teaching activity such as (but not limited to) examinations, quizzes, assignments, laboratory manuals, lecture slides or lecture materials and other course notes) are protected by law. These materials are for the sole use of students registered in this course and must not be redistributed. Sharing these materials with anyone else would be a breach of the terms and conditions governing student access to D2L, as well as a violation of the copyright in these materials, and may be pursued as a case of student academic or non-academic misconduct, in addition to any other remedies available at law.

- i. **Freedom of Information and Privacy:** This course is conducted in accordance with the Freedom of Information and Protection of Privacy Act (FOIPP). Students should identify themselves on all written work by placing their name on the front page and their ID number on each subsequent page. For more information, see [Legal Services](#) website.
- j. **Surveys:** At the University of Calgary, feedback through the Universal Student Ratings of Instruction ([USRI](#)) survey and the Faculty of Science Teaching Feedback form provides valuable information to help with evaluating instruction, enhancing learning and teaching, and selecting courses. Your responses make a difference - please participate in these surveys.

Course Outcomes:

- use the language and notion of differential calculus, and apply the key concepts to compute derivatives of functions of a real variable.
- explore the relationship between key calculus concepts and their geometric representation, and seek to apply calculus techniques to a wide variety of practical problems.
- recognize that not only the technology can be used to achieve some desired results; but also it has limitations.
- Mathematical Literacy This includes the fluent reading, manipulation, and graphic 5. interpretation of algebraic expressions and functions.
- The concept of Limit Students will gain an intuition of the concept of limit, and acquire a basic 6. level of mathematical literacy on limits and their computations.
- The concept of Derivative Students will be to associate the concept of differentiation with 7. rates of change, and they will be able to compute and manipulate derivatives.
- Applications of Derivatives Students will be able to analyze the shape of functions through their derivatives. Students will use derivatives to solve a variety of applied problems, including 8. optimization problems.
- The Riemann Integral Students will explore the process of estimating areas under a curve, develop the notion of integral, and compute basic integrals. Students will be able to demonstrate the fundamental relations between the processes of integration and differentiation.

Approvals Pending
