

**MATH 353**  
**Handout #5**

1. Find the surface area of the part of the sphere  $x^2 + y^2 + z^2 = 2$  that lies inside the paraboloid  $z = x^2 + y^2$ .
2. Find the flux of  $\mathbf{F} = \mathbf{i} + \mathbf{j} + z(x^2 + y^2)^2\mathbf{k}$  out of the surface (including top and bottom)  $S = \{(x, y, z); x^2 + y^2 = 4, 0 \leq z \leq 3\}$ .
3. Find the surface area of  $S$ 
  - (a) which is the part of the cylinder  $x^2 + y^2 = 4$  in the first octant below the plane  $2x + y + z = 5$ ;
  - (b) which is the part of the plane  $2x + y + z = 5$  inside the cylinder  $x^2 + y^2 = 4$ .
4. Find the flux  $\iint_S \mathbf{F} \cdot d\mathbf{S}$  where  $S$  is the part of the cylinder  $y^2 + z^2 = 4$  which lies inside the cylinder  $x^2 + y^2 = 4$ , above the  $xy$ -plane, oriented upward, and the field is  $\mathbf{F}(x, y, z) = (x^2yz, y, xz)$ .
5. Evaluate  $\int_S zx \, dS$  where  $S$  is the part of  $z = \frac{x^2}{2}$  which lies inside  $x^2 + y^2 = 1, x > 0, y < 0$ .
6. Evaluate  $\iint_S x^2 dS$  where  $S$  is the part of the plane  $x + y + z = 2$  inside the cylinder  $x^2 + 2y^2 = 1$ .
