There will be differences between the assignments and tests for Math 335 and Math 355.

Each piece of work (assignment, laboratory report, midterm test or final examination submitted by the student will be assigned a percentage score. The student's average percentage score for the various components listed above will be combined with the indicated weights to produce an overall percentage for the course, which will be used to determine the course letter grade. The conversion between course percentage and letter grade is given below.

NOTE: A passing grade (>50%) is required on the final exam in order to obtain a mark of C- or better for the course.
