**Course Materials** including: readings, notebooks, and R-Studio software code etc. will be posted via the D2L course website.

**Asking Questions:** many students will have additional questions, especially regarding assignment problems or course content. These questions should be asked on the relevant Discussion Boards or Online Chats on D2L, where Instructors, TA’s, and peers can contribute and curate answer(s) to these questions centralizing, reducing duplication, and improving answer consistency.

Conversations of a personal or private nature may be conducted through email, and we will make every effort to respond in a timely manner within one working day. We ask for your patience, professionalism, and respect during communication.

**Academic integrity** is the foundation of the development and acquisition of knowledge and is based on values of honesty, trust, responsibility, and respect. We expect members of our community to act with integrity. Research integrity, ethics, and principles of conduct are key to academic integrity. Members of our campus community are required to abide by our institutional code of conduct and promote academic integrity in upholding the University of Calgary’s reputation of excellence.

To account for any necessary transition to remote learning for the current semester, courses with in-person lectures, labs, or tutorials may be shifted to remote delivery for a certain period of time. In addition, adjustments may be made to the modality and format of assessments and deadlines, as well as to other course components and/or requirements, so that all coursework tasks are in line with the necessary and evolving health precautions for all involved (students and staff).

**In Person Delivery Details:**

Lectures will be held in-person so long as it makes sense to do so. As you will read, efforts will be made to be as flexible as possible for those who cannot join in-person.

If you are ill, and have documentation to prove it, please email Sarobiso@UCalgary.ca your documentation and you will be provided the videos for the lectures you missed. These are not to be shared with others.

Students (and members of the teaching team) should stay home if ill.

Office hour(s) availability may be subject to changing modalities and schedules contingent on the holders health, comfort, and circumstances.

**Course Site:**

D2L: STAT 321 L01-(Fall 2022)-Introduction to Probability

**Note:** Students must use their U of C account for all course correspondence.
Any material that is posted of the D2L website is under copyright protection, students are not permitted to redistribute any of the material they find there to anyone not in this semester's class.

Any material that is posted on D2L is subject to be taken down within two weeks of the posted date, so do not use D2L as your digital storage space. Do not expect that you will have access to the D2L page beyond the End of Classes date (Apr. 9, 2024). Download any material you would like to your personal devices before they are removed from the website.

**Equity Diversity & Inclusion:**

The University of Calgary is committed to creating an equitable, diverse and inclusive campus, and condemns harm and discrimination of any form. We value all persons regardless of their race, gender, ethnicity, age, LGBTQIA2S+ identity and expression, disability, religion, spirituality, and socioeconomic status. The Faculty of Science strives to extend these values in every aspect of our courses, research, and teachings to better promote academic excellence and foster belonging for all.

2. **Requisites:**

See section 3.5.C in the Faculty of Science section of the online Calendar.

**Prerequisite(s):**
Statistics 213.

**Antirequisite(s):**
Credit for Statistics 217 and either Statistics 205 or 327 will not be allowed. Not available to students who have previous credit for one of Statistics 321, Engineering 319 or Digital Engineering 319 or are concurrently enrolled in Statistics 321, Engineering 319 or Digital Engineering 319.

3. **Grading:**

The University policy on grading and related matters is described in F.1 and F.2 of the online University Calendar.

In determining the overall grade in the course the following weights will be used:

<table>
<thead>
<tr>
<th>Course Component</th>
<th>Weight</th>
<th>Due Date (duration for exams)</th>
<th>Modality for exams</th>
<th>Location for exams</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lab Quizzes (8)</td>
<td>20%</td>
<td>Ongoing</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Assignments (5)</td>
<td>25%</td>
<td>Ongoing</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Midterm 1</td>
<td>12.5%</td>
<td>Ongoing</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Midterm 2</td>
<td>12.5%</td>
<td>Ongoing</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Registrar Scheduled Final Exam</td>
<td>30%</td>
<td>Will be available when the final exam schedule is released by the Registrar</td>
<td>online</td>
<td>Will be available when the final exam schedule is released by the Registrar</td>
</tr>
</tbody>
</table>

1 Lab quizzes will be held weekly in-person in registered labs starting Jan. 22. (Week 3). Each lab quiz will have an accompanying lab exercise, each respective lab exercise can replace the lab quiz (up to 70% credit) if better or needed. Lab exercise (LE) replacement grade will be converted to lab quizzes (LQ) as such: LQ=LE*0.7.

2 Assignment due dates will be: Feb. 2, Mar. 1, Mar. 15, Apr. 5, Apr. 9. They are completed through WebWork.

3 Midterm 1 will be held in-person in your registered lab, Feb. 5, 6, 7, 8 or 9 depending what date you have lab. (Week 5). Midterm 1 will have an accompanying Midterm 1 exercise, this exercise can replace the Midterm (up to 70% credit) if better or needed. Midterm exercise (ME1) replacement grade will be converted to Midterm (M1) as such: M1=ME1*0.7.

4 Midterm 2 will be held in-person in your registered lab, Mar. 11, 12, 13, 14 or 15 depending what date you have lab. (Week 9). Midterm 2 will have an accompanying Midterm 2 exercise, this exercise can replace the Midterm (up to 70% credit) if better or needed. Midterm exercise (ME2) replacement grade will be converted to Midterm (M2) as such: M2=ME2*0.7.

5 See the footnotes for additional details.

Each piece of work (reports, assignments, quizzes, midterm exam(s) or final examination) submitted by the student will be assigned a grade. The student's grade for each component listed above will be combined with the indicated weights to produce an overall percentage for the course, which will be used to determine the course letter grade.

The conversion between a percentage grade and letter grade is as follows.

<table>
<thead>
<tr>
<th>Course Component</th>
<th>A+</th>
<th>A</th>
<th>A-</th>
<th>B+</th>
<th>B</th>
<th>B-</th>
<th>C+</th>
<th>C</th>
<th>D+</th>
<th>D</th>
</tr>
</thead>
<tbody>
<tr>
<td>Minimum % Required</td>
<td>95%</td>
<td>90%</td>
<td>85%</td>
<td>80%</td>
<td>75%</td>
<td>70%</td>
<td>65%</td>
<td>60%</td>
<td>55%</td>
<td>54.99%</td>
</tr>
</tbody>
</table>

This course will have a Registrar Scheduled Final exam that will be delivered on-line. The Final Examination Schedule will be published by the Registrar’s Office approximately one month after the start of the term. The final exam for this course will be designed to be completed within 2 hours.
Per section G.5 of the online Academic Calendar, timed final exams administered using an on-line platform, such as D2L, will be available on the platform. Due to the scheduling of the final exams, the additional time will be added to the end of the registrar scheduled synchronous exam to support students. This way, your exam schedule accurately reflects the start time of the exam for any synchronous exams. E.g. If a synchronous exam is designed for 2 hours and the final exam is scheduled from 9-11am in your student centre, the additional time will be added to the end time of the synchronous exam. This means that if the exam has a 1 hour buffer time, a synchronous exam would start at 9 am and finish at 12pm.

*If these any dates cannot work for you please arrange (sarobiso@ucalgary.ca) an alternate time to write these exams prior (at least one week) to the date(s) in question. Of course, valid reasons will be accommodated, however, simple matters of preference will not be accommodated.

**In the event that a student legitimately fails to submit any assessment on time (e.g. due to illness etc...), please contact the course instructor within 48 hours of the due date! If this course does not have a coordinator to arrange for a re-adjustment of a submission date. Absences not reported within 48 hours will not be accommodated.

***If any assessments is/are missing and unaccounted for they will be graded as zeros and count toward any assessment(s) that do not count.

****Any grade appeals after 14 days from initial grade posting, will be denied.

The University of Calgary offers a flexible grade option. Credit Granted (CG) to support student’s breadth of learning and student wellness. Faculty units may have additional requirements or restrictions for the use of the CG grade at the faculty, degree or program level. To see the full list of Faculty of Science courses where CG is not eligible, please visit the following website: https://science.ucalgary.ca/current-students/undergraduate/program-advising/flexible-grading-option-cg-grade

4. Missed Components Of Term Work:

In the event that a student legitimately fails to submit any online or in-person assessment on time (e.g. due to illness, domestic affliction, etc...), please contact the course coordinator, or the course instructor if this course does not have a coordinator to arrange for a re-adjustment of a submission date, or possible exemption and reweighing of components. Absences not reported within 48 hours will not be accommodated. Students may be asked to provide supporting documentation (Section M.1) for an excused absence, See FAQ.

If an excused absence is approved, options for how the missed assessment is dealt with is at the discretion of the coordinator or course instructor. Some options such as an exemption and pro-rating among the components of the course may not be a viable option based on the design of this course.

It is your job to communicate clearly with your instructor before (if possible) or directly after (<48 hours) crisis or extenuating circumstance has occurred documentation will be required. Simply missing or not being aware of time (time zones) is not a valid justification. This includes: any course conflicts or work schedules etc.

5. Scheduled Out-of-Class Activities:

There are no scheduled out of class activities for this course.

6. Course Materials:

In order to successfully engage in their learning experiences at the University of Calgary, students taking online, remote and blended courses are required to have reliable access to the following technology:

- A computer with a supported operating system, as well as the latest security, and malware updates;
- A current and updated web browser;
- Webcam/Camera (built-in or external);
- Microphone and speaker (built-in or external), or headset with microphone;
- Current antivirus and/or firewall software enabled;
- Stable internet connection.

For more information please refer to the UofC ELearning online website.

7. Examination Policy:

Any requests to for a deferred exam must be submitted within 48 hours of the exam date.

Students should also read the Calendar, Section G, on Examinations.

8. Approved Mandatory And Optional Course Supplemental Fees:

There are no mandatory or optional course supplemental fees for this course.
9. Writing Across The Curriculum Statement:

For all components of the course, in any written work, the quality of the student's writing (language, spelling, grammar, presentation etc.) can be a factor in the evaluation of the work. See also Section E.2 of the University Calendar.

For graded assessment work, you are expected to show your supporting work for full marks. Correct answers that fail to display clear and concise evidence and explanation of answers will not be given full credit.

Your work must be submitted correctly to the Gradescope and WeBWorK platforms to be eligible for any credit. Attempting to not submit on time (before deadlines, even if only second(s) late) will result in zero earned credit. Inability to submit/upload the assessments correctly will also result in zero credit. Regardless of typos or what was “meant to be submitted” all that can be graded is what was actually submitted. This, unfortunately, includes if time limits or other errors were incurred resulting in blanks being submitted on behalf of the student.

Any submitted work must be legible, display an organized expected and readable flow, contain a consistent and singular solution. Any solutions that appear to contain multiple answers or attempt to commit to multiple inconsistent answers will result in zero credit. ex. trying to indicate both True and False; selecting A and B in multiple choice format; or Answers that contain both correct and incorrect answers the correct final answer must be clearly be indicated (with supporting work that lead to that response). This applies to cumulative answers that appear to “change consistency” at some point of the response. How the question is started will be given precedence in the event of inconsistencies.

10. Human Studies Statement:

Students will not participate as subjects or researchers in human studies.

See also Section E.5 of the University Calendar.

11. Reappraisal Of Grades:

A student wishing a reappraisal, should first attempt to review the graded work with the Course coordinator/instructor or department offering the course. Students with sufficient academic grounds may request a reappraisal. Non-academic grounds are not relevant for grade reappraisals. Students should be aware that the grade being reappraised may be raised, lowered or remain the same. See Section I.3 of the University Calendar.

a. Term Work: The student should present their rationale a effectively and as fully as possible to the Course coordinator/instructor within ten business days of either being notified about the mark, or of the item's return to the class. If the student is not satisfied with the outcome, the student shall submit the Reappraisal of Graded Term work form to the department in which the course is offered within 2 business days of receiving the decision from the instructor. The Department will arrange for a reappraisal of the work within the next ten business days. The reappraisal will only be considered if the student provided a detailed rationale that outlines where and for what reason an error is suspected. See sections I.1 and I.2 of the University Calendar.

b. Final Exam: The student shall submit the request to Enrolment Services. See Section I.3 of the University Calendar.

Grade appeals must be submitted to the Teaching Assistant (TA) of their registered lab. If the TA agrees they may pass on the record of the account to the instructor of record.

12. Other Important Information For Students:

a. Mental Health The University of Calgary recognizes the pivotal role that student mental health plays in physical health, social connectedness and academic success, and aspires to create a caring and supportive campus community where individuals can freely talk about mental health and receive supports when needed. We encourage you to explore the mental health resources available throughout the university community, such as counselling, self-help resources, peer support or skills-building available through the SU Wellness Centre (Room 370, MacEwan Student Centre, Mental Health Services Website) and the Campus Mental Health Strategy website (Mental Health).

b. SU Wellness Services: For more information, see their website or call 403-210-9355.

c. Sexual Violence: The Sexual Violence Support Advocate, Carla Bertsch, can provide confidential support and information regarding sexual violence to all members of the university community. Carla can be reached by email (svsa@ucalgary.ca) or phone at 403-220-2208. The complete University of Calgary policy on sexual violence can be viewed here.

d. Student Ombuds Office: A safe place for all students of the University of Calgary to discuss student related issues, interpersonal conflict, academic and non-academic concerns, and many other problems.

e. Student Union Information: SU contact, Email your SU Science Reps: science1@su.ucalgary.ca, science2@su.ucalgary.ca, science3@su.ucalgary.ca.

f. Academic Accommodation Policy:

It is the student’s responsibility to request academic accommodations according to the University policies and procedures.
Course Outcomes:

- Demonstrate how to use critical thinking, formulae, and statistical software to provide solutions for both theoretical and non-parametric counterparts.

- Conduct population parameter comparisons between three or more quantitative variables through the employment of the significance of the regression equation's estimate from two or more quantitative and/or qualitative independent variables.

- Display and interpret the least-squares-estimate for Multiple Linear Regression. To defend, model, and verify the statistical techniques. Produce confidence interval estimation of both the mean and an individual value of the response variable.

- Demonstrate awareness of the conditions of the linear model and validate that these conditions are met through various any specified well-defined model.

- Determine the ‘Goodness-of-Fit’ of an empirical data set to the well-known probability models: Binomial, Poisson, as well as Normality, the equality of variance, and the dependence of the data structure(s).

- Recognize and distinguish between Type I and Type II errors that accompany statistical hypothesis testing. Displaying the ability to calculate the probabilities associated with these errors, for both single population proportions and large sample sized population means.

- Conduct appropriate parametric and/or non-parametric single and multiple population comparisons (for both qualitative and quantitative data types), applying confidence interval estimation and hypothesis testing. Verify the necessary conditions of: the Normality, the equality of variance, and the dependence of the data structure(s).

- Conduct population parameter comparisons between three or more quantitative variables through the employment of the balanced: One-Way-ANOVA/Post Hoc inference (Tukey’s HSD), Two-Way-ANOVA (including repetition), and with selected Non-parametric counterparts.

- Demonstrate how to use critical thinking, formulae, and statistical software to provide solutions for both theoretical and practical applications.

Students needing an accommodation because of a disability or medical condition should communicate this need to Student Accessibility Services in accordance with the Procedure for Accommodations for Students with Disabilities: https://www.ucalgary.ca/legal-services/sites/default/files/teams/1/Policies-Accommodation-for-Students-with-Disabilities-Procedure.pdf.

Students needing an accommodation in relation to their coursework or to fulfil requirements for a graduate degree, based on a Protected Ground other than Disability, should communicate this need, by filling out the Request for Academic Accommodation Form and sending it to Jerrod Smith by email jerrod.smith@ucalgary.ca preferably 10 business days before the due date of an assessment or scheduled absence.

\[\text{g. Misconduct: Academic integrity is the foundation of the development and acquisition of knowledge and is based on values of honesty, trust, responsibility, and respect. We expect members of our community to act with integrity. Research integrity, ethics, and principles of conduct are key to academic integrity. Members of our campus community are required to abide by our institutional Code of Conduct and promote academic integrity in upholding the University of Calgary's reputation of excellence. Some examples of academic misconduct include but are not limited to: posting course material to online platforms or file sharing without the course instructor’s consent; submitting or presenting work as if it were the student’s own work; submitting or presenting work in one course which has also been submitted in another course without the instructor’s permission; borrowing experimental values from others without the instructor’s approval; falsification/fabrication of experimental values in a report. Please read the following to inform yourself more on academic integrity:} \]

- Student Handbook on Academic Integrity
- Student Academic Misconduct Policy and Procedure
- Faculty of Science Academic Misconduct Process
- Research Integrity Policy

Additional information is available on the Student Success Centre Academic Integrity page.

\[\text{h. Copyright of Course Materials: All course materials (including those posted on the course D2L site, a course website, or used in any teaching activity such as (but not limited to) examinations, quizzes, assignments, laboratory manuals, lecture slides or lecture materials and other course notes) are protected by law. These materials are for the sole use of students registered in this course and must not be redistributed. Sharing these materials with anyone else would be a breach of the terms and conditions governing student access to D2L, as well as a violation of the copyright in these materials, and may be pursued as a case of student academic or non-academic misconduct, in addition to any other remedies available at law.}\]

\[\text{i. Freedom of Information and Privacy: This course is conducted in accordance with the Freedom of Information and Protection of Privacy Act (FOIPP). Students should identify themselves on all written work by placing their name on the front page and their ID number on each subsequent page. For more information, see Legal Services website.}\]

\[\text{j. Surveys: At the University of Calgary, feedback through the Universal Student Ratings of Instruction (USRI) survey and the Faculty of Science Teaching Feedback form provides valuable information to help with evaluating instruction, enhancing learning and teaching, and selecting courses. Your responses make a difference - please participate in these surveys.}\]

\[\text{Course Outcomes:}\]

- Conduct appropriate parametric and/or non-parametric single and multiple population comparisons (for both qualitative and quantitative data types), applying confidence interval estimation and hypothesis testing. Verify the necessary conditions of: the Normality, the equality of variance, and the dependence of the data structure(s).

- Recognize and distinguish between Type I and Type II errors that accompany statistical hypothesis testing. Displaying the ability to calculate the probabilities associated with these errors, for both single population proportions and large sample sized population means.

- Evaluate the correlation between bivariate data for two qualitative variables.

- Determine the ‘Goodness-of-Fit’ of an empirical data set to the well-known probability models: Binomial, Poisson, as well as any specified well-defined model.

- Model and verify the statistical significance of the model relating two quantitative variables (least-squares estimation). Demonstrate awareness of the conditions of the linear model and validate that these conditions are met through various techniques. Produce confidence interval estimation of both the mean and an individual value of the response variable.

- Display and interpret the least-squares-estimate for Multiple Linear Regression. To defend, model, and verify the statistical significance of the regression equation’s estimate from two or more quantitative and/or qualitative independent variables.

- Conduct population parameter comparisons between three or more quantitative variables through the employment of the balanced: One-Way-ANOVA/Post Hoc inference (Tukey’s HSD), Two-Way-ANOVA (including repetition), and with selected Non-parametric counterparts.

- Demonstrate how to use critical thinking, formulae, and statistical software to provide solutions for both theoretical and practical applications.
practical applications of course material.
