

COURSE OUTLINE

1. **Course:** STAT 323, Introduction to Theoretical Statistics - Summer 2022

Lecture 01 : MWF 14:00 - 15:50 in ST 130

Instructor	Email	Phone	Office	Hours
Claudia Mahler	claudia.mahler@ucalgary.ca	403 220-7717	MS 376	Mondays 16:00 - 17:00

To account for any necessary transition to remote learning for the current semester, courses with in-person lectures, labs, or tutorials may be shifted to remote delivery for a certain period of time. In addition, adjustments may be made to the modality and format of assessments and deadlines, as well as to other course components and/or requirements, so that all coursework tasks are in line with the necessary and evolving health precautions for all involved (students and staff).

In Person Delivery Details:

- **Lectures** will take place **in person** every Monday, Wednesday, and Friday from 14:00 - 15:50 in ST 130. If possible (given the technology in the room), I will **record the lectures** and make them available by the end of each lecture day. It is highly recommended to attend the in-person lectures if you are able!
- **Labs** will take place every Tuesday and Thursday from 13:00 - 13:50 in your scheduled lab rooms. Lab tasks (typically worksheets) are optional but highly recommended! You can complete the lab tasks in your lab rooms (where there will be a TA present for help/guidance) **or** you can complete them on your own time when it is convenient for you.
- **Office hours** with TAs and/or your instructor will be held either in-person or via scheduled Zoom meetings (more specifics provided at a later date).

Re-Entry Protocol for Labs and Classrooms:

To limit the spread of COVID-19 on campus, the University of Calgary has implemented safety measures to ensure the campus is a safe and welcoming space for students, faculty and staff. The most current safety information for campus can be found [here](#).

Course Site:

D2L: STAT 323 L01 - (Summer 2022) - Introduction to Theoretical Statistics

Note: Students must use their U of C account for all course correspondence.

Equity Diversity & Inclusion:

The University of Calgary is committed to creating an equitable, diverse and inclusive campus, and condemns harm and discrimination of any form. We value all persons regardless of their race, gender, ethnicity, age, LGBTQIA2S+ identity and expression, disability, religion, spirituality, and socioeconomic status. The Faculty of Science strives to extend these values in every aspect of our courses, research, and teachings to better promote academic excellence and foster belonging for all.

2. **Requisites:**

See section [3.5.C](#) in the Faculty of Science section of the online Calendar.

Prerequisite(s):

Statistics 321.

Antirequisite(s):

Credit for Statistics 323 and either Data Science 305 or Mathematics 323 will not be allowed.

3. **Grading:**

The University policy on grading and related matters is described in [F.1](#) and [F.2](#) of the online University Calendar.

In determining the overall grade in the course the following weights will be used:

Course Component	Weight	Due Date (duration for exams)	Modality for exams	Location for exams
Assignment 1	10%	Jul 11 2022		
Quiz 1	15%	Jul 14 2022		
Assignment 2	10%	Jul 18 2022		
Quiz 2	15%	Jul 21 2022		
Assignment 3	10%	Jul 25 2022		
Quiz 3	15%	Jul 28 2022		
Assignment 4	10%	Aug 08 2022		
Quiz 4	15%	Aug 09 2022		

Each piece of work (reports, assignments, quizzes, midterm exam(s) or final examination) submitted by the student will be assigned a grade. The student's grade for each component listed above will be combined with the indicated weights to produce an overall percentage for the course, which will be used to determine the course letter grade.

The conversion between a percentage grade and letter grade is as follows.

	A+	A	A-	B+	B	B-	C+	C	C-	D+	D
Minimum % Required	95 %	88 %	84 %	80%	76%	72 %	68 %	64%	60%	55 %	50 %

Assignments and quizzes will be submitted for grading through D2L's dropbox feature.

For assignments:

Assignment questions will be posted to D2L at least a week before they are due. Assignments can either be typed or neatly handwritten for submission. To submit handwritten assignments to the D2L dropbox, students can do one of the following:

- Scan the pages containing their written work and upload the scans as one document/image or upload each page as its own document/image
- Take pictures of the pages containing their written work and upload the pictures as one set of images or upload each picture as its own image.

It is the responsibility of the student to ensure that the scans/pictures are uploaded correctly. That is, the student must ensure that the scans/pictures are **readable** and are **uploaded in the correct orientation** (so that the scans/pictures do not need to be rotated in order to be read and graded).

For quizzes:

The relevant quiz document will be emailed to the students at midnight on the day of the quiz. Students will then have until 11:59 PM on the day of the quiz to upload the completed quiz questions to the relevant D2L dropbox. For example, the Quiz 1 questions will be emailed to students at midnight (12:00 AM or 0:00) on July 14. Students will then have until 11:59 PM (or 23:59) to upload the completed quiz to the D2L dropbox.

The quiz document will have space for students to fill in their answers. A student can fill out the quiz on the quiz paper or they can complete the quiz questions on blank pieces of paper, provided that the questions and question parts are clearly labeled on the pieces of paper.

Quizzes can either be typed up (or filled in using something like OneNote) or handwritten for submission. **The same guidelines stated above for handwritten assignment submissions apply for handwritten quiz submissions.**

A passing mark (at least 50%) on at least three of the four quizzes is required to earn a minimum grade of C- in the course.

Students with SAS accommodations are asked to contact their instructor as soon as possible to discuss their needed accommodations. All other accommodations will be made on a case-by-case basis.

Requests for grade rounding or alterations to grade component weighting will not be considered. All letter grade cutoffs as stated in this outline are fixed and will not be adjusted on an individual basis (e.g., 88.0% is the cutoff for an A, not 87.9% or 87.99%!).

The University of Calgary offers a [flexible grade option](#), Credit Granted (CG) to support student's breadth of learning and student wellness. Faculty units may have additional requirements or restrictions for the use of the CG grade at the faculty, degree or program level. To see the full list of Faculty of Science courses where CG is not eligible, please visit the following website: <https://science.ucalgary.ca/current-students/undergraduate/program-advising/flexible-grading-option-cg-grade>

4. **Missed Components Of Term Work:**

The university has suspended the requirement for students to provide evidence for absences. Please do not attend medical clinics for medical notes or Commissioners for Oaths for statutory declarations.

In the event that a student legitimately fails to submit any online assessment on time (e.g. due to illness etc...), please contact the course coordinator, or the course instructor if this course does not have a coordinator to arrange for a re-adjustment of a submission date. Absences not reported within 48 hours will not be accommodated. If an excused absence is approved, one possible arrangement is that the percentage weight of the legitimately missed assignment could also be pro-rated among the components of the course. This option is at the discretion of the coordinator and may not be a viable option based on the design of this course.

It is the responsibility of the student to clearly communicate with the instructor **before** (if possible) or **directly after** (within 48 hours) any crises or extenuating circumstances have occurred so that proper arrangements can be made for missed work.

5. **Scheduled Out-of-Class Activities:**

There are no scheduled out of class activities for this course.

6. **Course Materials:**

Required Textbook(s):

Wackerly, Dennis, Mendenhall, William, Scheaffer, Richard L., *Mathematical Statistics with Applications*: Duxbury Br..

R Software: students will make use of R statistical software throughout the course. R is free and can be downloaded at <https://www.r-project.org/>.

Any material (lecture notes, videos, quizzes, etc.) posted to the D2L website is under copyright protection. **Students are not permitted to redistribute any of the material they find there to anyone who is not registered in the Summer 2022 STAT 323 course.** This includes (but is not limited to) posting material/questions to Chegg, StuDocu, Course Hero, etc.

In order to successfully engage in their learning experiences at the University of Calgary, students taking online, remote and blended courses are required to have reliable access to the following technology:

- A computer with a supported operating system, as well as the latest security, and malware updates;
- A current and updated web browser;
- Webcam/Camera (built-in or external);
- Microphone and speaker (built-in or external), or headset with microphone;
- Current antivirus and/or firewall software enabled;
- Stable internet connection.

For more information please refer to the UofC [ELearning](#) online website.

7. **Examination Policy:**

Students are expected to work **independently** on all quizzes but can consider the quizzes "open book" (that is, students can use their notes, lecture videos, other online resources and calculators, etc.).

Students may be expected to use **R** on certain quizzes.

Students should also read the Calendar, [Section G](#), on Examinations.

8. **Approved Mandatory And Optional Course Supplemental Fees:**

There are no mandatory or optional course supplemental fees for this course.

9. Writing Across The Curriculum Statement:

For all components of the course, in any written work, the quality of the student's writing (language, spelling, grammar, presentation etc.) can be a factor in the evaluation of the work. See also Section [E.2](#) of the University Calendar.

10. Human Studies Statement:

Students will not participate as subjects or researchers in human studies.

See also [Section E.5](#) of the University Calendar.

11. Reappraisal Of Grades:

A student wishing a reappraisal, should first attempt to review the graded work with the Course coordinator/instructor or department offering the course. Students with sufficient academic grounds may request a reappraisal. Non-academic grounds are not relevant for grade reappraisals. Students should be aware that the grade being reappraised may be raised, lowered or remain the same. See [Section I.3](#) of the University Calendar.

- a. **Term Work:** The student should present their rationale as effectively and as fully as possible to the Course coordinator/instructor within **ten business days** of either being notified about the mark, or of the item's return to the class. If the student is not satisfied with the outcome, the student shall submit the Reappraisal of Graded Term work [form](#) to the department in which the course is offered within 2 business days of receiving the decision from the instructor. The Department will arrange for a reappraisal of the work within the next ten business days. The reappraisal will only be considered if the student provides a detailed rationale that outlines where and for what reason an error is suspected. See sections [I.1](#) and [I.2](#) of the University Calendar
- b. **Final Exam:** The student shall submit the request to Enrolment Services. See [Section I.3](#) of the University Calendar.

12. Other Important Information For Students:

- a. **Mental Health** The University of Calgary recognizes the pivotal role that student mental health plays in physical health, social connectedness and academic success, and aspires to create a caring and supportive campus community where individuals can freely talk about mental health and receive supports when needed. We encourage you to explore the mental health resources available throughout the university community, such as counselling, self-help resources, peer support or skills-building available through the SU Wellness Centre (Room 370, MacEwan Student Centre, [Mental Health Services Website](#)) and the Campus Mental Health Strategy website ([Mental Health](#)).
- b. **SU Wellness Services:** For more information, see their [website](#) or call [403-210-9355](#).
- c. **Sexual Violence:** The Sexual Violence Support Advocate, Carla Bertsch, can provide confidential support and information regarding sexual violence to all members of the university community. Carla can be reached by email (syasa@ucalgary.ca) or phone at [403-220-2208](#). The complete University of Calgary policy on sexual violence can be viewed [here](#).
- d. **Misconduct:** Academic integrity is the foundation of the development and acquisition of knowledge and is based on values of honesty, trust, responsibility, and respect. We expect members of our community to act with integrity. Research integrity, ethics, and principles of conduct are key to academic integrity. Members of our campus community are required to abide by our institutional [Code of Conduct](#) and promote academic integrity in upholding the University of Calgary's reputation of excellence. Some examples of academic misconduct include but are not limited to: posting course material to online platforms or file sharing without the course instructor's consent; submitting or presenting work as if it were the student's own work; submitting or presenting work in one course which has also been submitted in another course without the instructor's permission; borrowing experimental values from others without the instructor's approval; falsification/fabrication of experimental values in a report. Please read the following to inform yourself more on academic integrity:

[Student Handbook on Academic Integrity](#)
[Student Academic Misconduct Policy](#) and [Procedure](#)
[Faculty of Science Academic Misconduct Process](#)
[Research Integrity Policy](#)

Additional information is available on the [Student Success Centre Academic Integrity page](#)

e. Academic Accommodation Policy:

It is the student's responsibility to request academic accommodations according to the University policies

and procedures listed below. The student accommodation policy can be found at: <https://www.ucalgary.ca/legal-services/sites/default/files/teams/1/Policies-Student-Accommodation-Policy.pdf>

Students needing an accommodation because of a disability or medical condition should communicate this need to Student Accessibility Services in accordance with the Procedure for Accommodations for Students with Disabilities: <https://www.ucalgary.ca/legal-services/sites/default/files/teams/1/Policies-Accommodation-for-Students-with-Disabilities-Procedure.pdf>.

Students needing an accommodation in relation to their coursework or to fulfil requirements for a graduate degree, based on a Protected Ground other than Disability, should communicate this need, by filling out the [Request for Academic Accommodation Form](#) and sending it to Mark Bauer by email bauerm@ucalgary.ca preferably 10 business days before the due date of an assessment or scheduled absence.

- f. **Freedom of Information and Privacy:** This course is conducted in accordance with the Freedom of Information and Protection of Privacy Act (FOIPPA). Students should identify themselves on all written work by placing their name on the front page and their ID number on each subsequent page. For more information, see [Legal Services](#) website.
- g. **Student Union Information:** [SU contact](#), Email SU Science Rep: sciencerep1@su.ucalgary.ca, [Student Ombudsman](#)
- h. **Surveys:** At the University of Calgary, feedback through the Universal Student Ratings of Instruction ([USRI](#)) survey and the Faculty of Science Teaching Feedback form provides valuable information to help with evaluating instruction, enhancing learning and teaching, and selecting courses. Your responses make a difference - please participate in these surveys.
- i. **Copyright of Course Materials:** All course materials (including those posted on the course D2L site, a course website, or used in any teaching activity such as (but not limited to) examinations, quizzes, assignments, laboratory manuals, lecture slides or lecture materials and other course notes) are protected by law. These materials are for the sole use of students registered in this course and must not be redistributed. Sharing these materials with anyone else would be a breach of the terms and conditions governing student access to D2L, as well as a violation of the copyright in these materials, and may be pursued as a case of student academic or [non-academic misconduct](#), in addition to any other remedies available at law.

Course Outcomes:

- Identify a target population and its corresponding target parameter
- Apply the method of moments and maximum likelihood estimation to derive a statistic to estimate a target parameter
- Derive the probability distribution of a statistic and compute both its mean, its variance or standard deviation, and its bias.
- Evaluate the large -sample merits of a statistic based on its (i) biased/unbiasedness and (ii) its consistency/lack of consistency, to determine its usefulness
- Read, replicate, and create mathematical proofs of statistical theorems covered in the course
- Recognize parameter estimation through the application of the pivotal quantity method to create a confidence interval for the unknown value of a population parameter. This is to include parametric estimation of the mean, proportion, variance, difference of two means, difference of two proportions, and ratio of variances.
- Comprehend the scientific method of statistical hypothesis testing. This is to include the derivation of a statistical hypotheses, identification and subsequent application of a statistical test, to be encapsulated with the computation and interpretation of a P - value.
- Conduct dual population comparisons through the application of both confidence intervals and hypothesis testing to compare (i) two population means and (ii) two population proportions. Such applications are expected to be done manually and with the assistance of R.
- Model the existing synergy between two quantitative variables through the employment of least- squares estimation , resulting in the creation of a statistical model that predicts one variable based on the value of another
- Conduct a statistical hypothesis on the appropriateness of the simple linear model with both the t -test and F-test. Awareness of the conditions of the linear model as well as diagnosis of their satisfaction. Confidence interval estimation of both the mean and an individual value of the response variable.

Electronically Approved - Jun 28 2022 17:00

Department Approval
