

Textbook Material for the first Midterm Exam

Sections 2.1-2.5

3.2, 3.3

All of Chapter 5

6.1, 6.3

You should also know how to compute σ^2 and σ for a discrete probability distribution.

For the exam on Feb 27, you may use a calculator (but only $+$, $-$, \times , \div and $\sqrt{\quad}$ functions).

Formulas will be provided for a , b , r^2 for linear regression. You should memorize all other formulas.

J. Collins' Office Hours this week (in MS458)

Wed, Feb 25 4:00 pm - 5:00 pm

Thurs, Feb 26, 3:00 pm - 4:00 pm

Fri, Feb 27, 1:00 pm - 2:30 pm
