

COURSE OUTLINE

1. **Course:** SCIE 311, Write & Review Scientific Reports - Winter 2023

Course Outcomes:

- Reading scientific papers and identifying key conclusions in order to write a well-supported argument
- Searching for scientific information using a wide range of library skills and properly documenting those sources
- Recognizing milestones in the writing process and beginning to develop a personal approach to any writing assignment
- Identifying essential formatting and style elements of scientific writing
- Giving and receiving peer feedback throughout the writing process by working effectively as part of a team.

Coordinator(s)

Lecture 03 : TR 14:00 - 15:15 in ES 920

Instructor	Email	Phone	Office	Hours
Julie Adams	TBA	TBA	TBA	TBA

To account for any necessary transition to remote learning for the current semester, courses with in-person lectures, labs, or tutorials may be shifted to remote delivery for a certain period of time. In addition, adjustments may be made to the modality and format of assessments and deadlines, as well as to other course components and/or requirements, so that all coursework tasks are in line with the necessary and evolving health precautions for all involved (students and staff).

In Person Delivery Details:

SCIE 311 lectures and tutorials are run entirely in-person, on campus.

Re-Entry Protocol for Labs and Classrooms:

To limit the spread of COVID-19 on campus, the University of Calgary has implemented safety measures to ensure the campus is a safe and welcoming space for students, faculty and staff. The most current safety information for campus can be found [here](#).

Course Site:

D2L: SCIE 311 L01-L03 (Winter 2023)-Write & Review Scientific Reports

Note: Students must use their U of C account for all course correspondence.

Equity Diversity & Inclusion:

The University of Calgary is committed to creating an equitable, diverse and inclusive campus, and condemns harm and discrimination of any form. We value all persons regardless of their race, gender, ethnicity, age, LGBTQIA2S+ identity and expression, disability, religion, spirituality, and socioeconomic status. The Faculty of Science strives to extend these values in every aspect of our courses, research, and teachings to better promote

academic excellence and foster belonging for all.

2. **Requisites:**

See section [3.5.C](#) in the Faculty of Science section of the online Calendar.

Prerequisite(s):

Any 200-level course offered by the Faculty of Science.

Note(s):

- a. Only declared majors in Chemistry, Applied Chemistry, Geology, Applied and Environmental Geology, Petroleum Geology or the Geosciences program will be admitted prior to the date registration restrictions are lifted. Consult the Enrolment Services website (<http://www.ucalgary.ca/registrar/>) for registration details.

3. **Grading:**

The University policy on grading and related matters is described in [F.1](#) and [F.2](#) of the online University Calendar.

In determining the overall grade in the course the following weights will be used:

Course Component	Weight	Due Date (duration for exams)	Modality for exams	Location for exams
In-tutorial responses ¹	4%	Ongoing		
In-class responses ²	4%	Ongoing		
feedback confirmation microconference ³	4%	Ongoing		
iRAT 0 ⁴	1%	Jan 11 2023		
tRAT 0 ⁵	1%	Jan 12 2023		
iRAT 1 ⁶	1%	Jan 18 2023		
Question Assignment	2%	Jan 18 2023		
tRAT 1 ⁷	1%	Jan 19 2023		
Reflection 1	2.5%	Jan 20 2023		
Encountering Academic Integrity Assignment	2%	Jan 20 2023		
Team Contract	1%	Jan 27 2023		
Paper Plan Assignment	10%	Jan 30 2023		
iRAT 2 ⁸	1%	Feb 01 2023		
tRAT 2 ⁹	1%	Feb 02 2023		
mid-semester ITP Metrics peer evaluation	1.5%	Feb 08 2023		
Reflection 2	2.5%	Feb 10 2023		
Version 1 Instructor review	10%	Feb 17 2023		
Version 1 TA review	4%	Feb 17 2023		
iRAT 3 ¹⁰	1%	Feb 27 2023		
tRAT 3 ¹¹	1%	Feb 28 2023		
Reflection 3	2.5%	Mar 03 2023		
iRAT 4 ¹²	1%	Mar 07 2023		
tRAT 4 ¹³	1%	Mar 07 2023		
Version 2 Instructor review	10%	Mar 10 2023		
Version 2 TA review	8%	Mar 10 2023		
Version 3 Instructor review	16%	Apr 05 2023		
Version 3 TA review	2%	Apr 05 2023		
Reflection 4	2.5%	Apr 11 2023		
end-of-semester ITP Metrics peer evaluation	1.5%	Apr 11 2023		

¹ Your TA will ask you to participate in tutorial most likely by filling out an exit slip, but perhaps also by answering specific questions or having a brief conversation, completing a small in-tutorial exercise, etc. These will be graded and added together to generate this 4% grade.

² Your instructor will ask you to participate in lecture by asking for your team responses to certain questions posed in class. These might involve submitting responses to TopHat, filling out an exit slip, but perhaps also by answering specific questions or having a brief conversation, completing a small in-class exercise, etc. These will be graded and added together to generate this 4% grade.

³ You will schedule and attend at least one 15-minute one-on-one meeting with your TA after you receive feedback for Version 1 or Version 2. In your microconference, you will demonstrate that you have analyzed the feedback and that you have a plan for implementing it. If you are unsure about how to analyze or implement the feedback, this microconference will be your opportunity to discuss that analysis/implementation with your TA.

⁴ iRAT 0 will open 24 h before your scheduled lecture begins.

⁵ tRAT 0 will be run during your scheduled lecture.

⁶ iRAT 1 will open 24 h before your scheduled lecture begins.

⁷ tRAT 1 will be run during your scheduled lecture.

⁸ iRAT 2 will open 24 h before your scheduled lecture begins.

⁹ tRAT 2 will be run during your scheduled lecture.

¹⁰ iRAT 3 will open 24 h before your scheduled lecture begins.

¹¹ tRAT 3 will be run during your scheduled lecture.

¹² iRAT 4 will open 24 h before your scheduled lecture begins.

¹³ tRAT 4 will be run during your scheduled lecture.

Each piece of work (reports, assignments, quizzes, midterm exam(s) or final examination) submitted by the student will be assigned a grade. The student's grade for each component listed above will be combined with the indicated weights to produce an overall percentage for the course, which will be used to determine the course letter grade.

The conversion between a percentage grade and letter grade is as follows.

	A+	A	A-	B+	B	B-	C+	C	C-	D+	D
Minimum % Required	96 %	90 %	86 %	82%	78%	74 %	70 %	66%	62%	56 %	50 %

Your grade is determined by marks for both individual work (worth 90%) and team-scored components (worth 10%; consisting of all five tRATS, the Team Contract, and the in-class activities). Students cannot be awarded a letter grade higher than a D+ if **all** of the Paper Plan Assignment, Version 1, Version 2, and Version 3 documents are not submitted for grading, even if they are submitted so late that they score zero for lateness.

At the end of the term, you will evaluate the contributions of the other members of your team using an online survey. Each team member will rate you using parameters relating to teamwork. We calculate the average of these ratings and determine your Peer Evaluation Score (PES) based on your teammates' evaluation. Your total team-scored component score (your tRAT, Team Contract, and in-class responses scores) will be multiplied by the PES to determine the final mark for the teamwork component of the course.

Communication, both oral and written form, is the cornerstone of this course, and the quality of your writing will factor into the evaluation of all assignments. Constructive critical analysis of peer work is also an essential course component. Attendance and active participation in all classes and tutorials will be key to your success in this class. The Detailed Syllabus for Science 311 is provided in this document and also as a separate file on D2L. Assignments should be submitted electronically. Further details about these requirements will be provided in class and on D2L. A detailed calendar and schedule is provided on D2L.

The University of Calgary offers a [flexible grade option](#), Credit Granted (CG) to support student's breadth of learning and student wellness. Faculty units may have additional requirements or restrictions for the use of the CG grade at the faculty, degree or program level. To see the full list of Faculty of Science courses where CG is not eligible, please visit the following website: <https://science.ucalgary.ca/current-students/undergraduate/program-advising/flexible-grading-option-cg-grade>

4. **Missed Components Of Term Work:**

The university has suspended the requirement for students to provide evidence for absences. Please do not attend medical clinics for medical notes or Commissioners for Oaths for statutory declarations.

In the event that a student legitimately fails to submit any online assessment on time (e.g. due to illness etc...), please contact the course coordinator, or the course instructor if this course does not have a coordinator to arrange for a re-adjustment of a submission date. Absences not reported within 48 hours will not be accommodated. If an excused absence is approved, one possible arrangement is that the percentage weight of the legitimately missed assignment could also be pro-rated among the components of the course. This option is at the discretion of the coordinator and may not be a viable option based on the design of this course.

In order for your experience in the course to be successful and to avoid workflow problems for you and your TA/instructor, your work must be completed on time (and sometimes brought to class). Valid reasons for missing a deadline are generally illness or serious family afflictions. Official documentation for missing a class or tutorial, or for failing to submit work on time, is not required.

- **Please contact your instructor and/or TA in advance of missing a deadline, if possible, and include a brief note as to why the deadline cannot be met.**
- **Failing that, please contact the Course Coordinator within 48 hours of having missed a deadline with a brief note of why the deadline was missed.**

Your overall mark for the course may be prorated to account for any excused work.

Late marks will be applied as follows:

-5% for each half-day late (i.e. -5% from 1 minute late to 12 h late, -10% from 1 minute late to 24 h late, -15% from 1 minute late to 36 h late, etc.)

5. **Scheduled Out-of-Class Activities:**

There are no scheduled out of class activities for this course.

6. Course Materials:

The required handouts and readings for this course are available through postings on D2L. Students will be responsible for bringing paper or electronic handouts to class and to keep current with the reading material posted on D2L. It is sufficient to bring an electronic device with a screen large enough to read easily (e.g. a laptop) to each lecture.

ITP Metrics and Top Hat will be used in SCIE 311. These systems involve secure web-based tools for team peer evaluations and collecting in-class responses, respectively. These tools are free to all students and are not dependent on prior access.

In order to successfully engage in their learning experiences at the University of Calgary, students taking online, remote and blended courses are required to have reliable access to the following technology:

- A computer with a supported operating system, as well as the latest security, and malware updates;
- A current and updated web browser;
- Webcam/Camera (built-in or external);
- Microphone and speaker (built-in or external), or headset with microphone;
- Current antivirus and/or firewall software enabled;
- Stable internet connection.

For more information please refer to the UofC [ELearning](#) online website.

7. Examination Policy:

iRAT quizzes are open book and should only require ~10 minutes to complete, but you have 24 h to complete them. Please save your quiz and be sure to submit it when completed, and contact the course coordinator if you have any technical difficulties.

tRAT quizzes are closed book and in-class.

Missed RAT quizzes may not be written at a later time.

Students should also read the Calendar, [Section G](#), on Examinations.

8. Approved Mandatory And Optional Course Supplemental Fees:

There are no mandatory or optional course supplemental fees for this course.

9. Writing Across The Curriculum Statement:

For all components of the course, in any written work, the quality of the student's writing (language, spelling, grammar, presentation etc.) can be a factor in the evaluation of the work. See also Section [E.2](#) of the University Calendar.

10. Human Studies Statement:

If you agree, your course work may be used for research purposes. Your responses will remain anonymous and confidential. Grouped data (no individual responses) may be used in academic presentations and publications. Participation in such research is voluntary and will not influence grades in this course. Students' signed consent forms will be withheld from instructors until after final grades are submitted. More information will be provided at the time student participation is requested.

See also [Section E.5](#) of the University Calendar.

11. Reappraisal Of Grades:

A student wishing a reappraisal, should first attempt to review the graded work with the Course coordinator/instructor or department offering the course. Students with sufficient academic grounds may request a reappraisal. Non-academic grounds are not relevant for grade reappraisals. Students should be aware that the grade being reappraised may be raised, lowered or remain the same. See [Section I.3](#) of the University Calendar.

- Term Work:** The student should present their rationale as effectively and as fully as possible to the Course coordinator/instructor within **ten business days** of either being notified about the mark, or of the item's return to the class. If the student is not satisfied with the outcome, the student shall submit the Reappraisal of Graded Term work [form](#) to the department in which the course is offered within 2 business days of receiving the decision from the instructor. The Department will arrange for a reappraisal of the work within the next ten business days. The reappraisal will only be considered if the student provides a detailed rationale that outlines where and for what reason an error is suspected. See sections [I.1](#) and [I.2](#) of the University Calendar

- b. **Final Exam:**The student shall submit the request to Enrolment Services. See [Section 1.3](#) of the University Calendar.

If you are concerned about the comments on your assignment or have questions about the grade you have earned, you should first email the instructor or TA (depending on who marked the assignment). Please note that some assignments have rubrics that do not allow for partial credit, and some work might be graded with reference to previous submissions.

Additional Academic Integrity Information: All work submitted for this class (whether as a draft or for final grading) is held to the strictest standards for intellectual honesty. During the first few weeks of the semester, you will complete an assignment about understanding academic integrity and avoiding plagiarism. You must successfully complete this assignment before any other assignments will be graded. We encourage SCIE 311 students to discuss academic integrity issues surrounding assignments with TAs and instructors.

12. Other Important Information For Students:

- a. **Mental Health** The University of Calgary recognizes the pivotal role that student mental health plays in physical health, social connectedness and academic success, and aspires to create a caring and supportive campus community where individuals can freely talk about mental health and receive supports when needed. We encourage you to explore the mental health resources available throughout the university community, such as counselling, self-help resources, peer support or skills-building available through the SU Wellness Centre (Room 370, MacEwan Student Centre, [Mental Health Services Website](#)) and the Campus Mental Health Strategy website ([Mental Health](#)).
- b. **SU Wellness Services:** For more information, see their [website](#) or call [403-210-9355](#).
- c. **Sexual Violence:** The Sexual Violence Support Advocate, Carla Bertsch, can provide confidential support and information regarding sexual violence to all members of the university community. Carla can be reached by email ([svsa@ucalgary.ca](mailto:svs@ucalgary.ca)) or phone at [403-220-2208](#). The complete University of Calgary policy on sexual violence can be viewed [here](#).
- d. **Student Ombuds Office:** A safe place for all students of the University of Calgary to discuss student related issues, interpersonal conflict, academic and non-academic concerns, and many other problems.
- e. **Student Union Information:** [SU contact](#), Email your SU Science Reps: science1@su.ucalgary.ca, science2@su.ucalgary.ca, science3@su.ucalgary.ca,
- f. **Academic Accommodation Policy:**

It is the student's responsibility to request academic accommodations according to the University policies and procedures listed below. The student accommodation policy can be found at: <https://www.ucalgary.ca/legal-services/sites/default/files/teams/1/Policies-Student-Accommodation-Policy.pdf>

Students needing an accommodation because of a disability or medical condition should communicate this need to Student Accessibility Services in accordance with the Procedure for Accommodations for Students with Disabilities: <https://www.ucalgary.ca/legal-services/sites/default/files/teams/1/Policies-Accommodation-for-Students-with-Disabilities-Procedure.pdf>.

Students needing an accommodation in relation to their coursework or to fulfil requirements for a graduate degree, based on a Protected Ground other than Disability, should communicate this need, by filling out the [Request for Academic Accommodation Form](#) and sending it to Dr. Nicole Sandblom by email ntscdirector@ucalgary.ca preferably 10 business days before the due date of an assessment or scheduled absence.

- g. **Misconduct:** Academic integrity is the foundation of the development and acquisition of knowledge and is based on values of honesty, trust, responsibility, and respect. We expect members of our community to act with integrity. Research integrity, ethics, and principles of conduct are key to academic integrity. Members of our campus community are required to abide by our institutional [Code of Conduct](#) and promote academic integrity in upholding the University of Calgary's reputation of excellence. Some examples of academic misconduct include but are not limited to: posting course material to online platforms or file sharing without the course instructor's consent; submitting or presenting work as if it were the student's own work; submitting or presenting work in one course which has also been submitted in another course without the instructor's permission; borrowing experimental values from others without the instructor's approval; falsification/fabrication of experimental values in a report. Please read the following to inform yourself more on academic integrity:

[Student Handbook on Academic Integrity](#)
Student Academic Misconduct [Policy](#) and [Procedure](#)

Additional information is available on the [Student Success Centre Academic Integrity page](#)

- h. **Copyright of Course Materials:** All course materials (including those posted on the course D2L site, a course website, or used in any teaching activity such as (but not limited to) examinations, quizzes, assignments, laboratory manuals, lecture slides or lecture materials and other course notes) are protected by law. These materials are for the sole use of students registered in this course and must not be redistributed. Sharing these materials with anyone else would be a breach of the terms and conditions governing student access to D2L, as well as a violation of the copyright in these materials, and may be pursued as a case of student academic or [non-academic misconduct](#), in addition to any other remedies available at law.
- i. **Freedom of Information and Privacy:** This course is conducted in accordance with the Freedom of Information and Protection of Privacy Act (FOIPP). Students should identify themselves on all written work by placing their name on the front page and their ID number on each subsequent page. For more information, see [Legal Services](#) website.
- j. **Surveys:** At the University of Calgary, feedback through the Universal Student Ratings of Instruction ([USRI](#)) survey and the Faculty of Science Teaching Feedback form provides valuable information to help with evaluating instruction, enhancing learning and teaching, and selecting courses. Your responses make a difference - please participate in these surveys.

FACULTY OF SCIENCE

SCIENCE 311: WRITING & REVIEWING SCIENTIFIC REPORTS

DETAILED COURSE SYLLABUS in Section 13 of Course Outline

Responsibilities and Expectations

Science 311 is a writing course in the Faculty of Science. Writing papers is both challenging and informative. You will learn to critically and substantially revise your paper rather than simply making grammatical and superficial changes. You will also practice searching the literature and critically examining published journal articles' science.

We note that successful students tend to:

- Come prepared to participate actively in class activities and tutorials.
- Read all material on D2L.
- Complete all assignments to the best of their ability.
- Submit assignments **on time**.*
- Provide thoughtful, well-organized, and critical suggestions to their peers during the review process.
- Reflect on their peer, TA, and instructor reviews and incorporate suggestions into their papers.**

**We understand that life happens and are willing to consider extensions of e.g. 48 h where appropriate. Extensions beyond 48 h usually delay the return of feedback and delay student progress towards the next milestone assignment.*

***You have the academic freedom to write on any topic of your choice; however, there are topics that are not suitable for the course - and cannot receive high scores using our rubrics - because they are not suitable topics for a second-year scientific review paper.*

What can you expect from us?

Most of this syllabus is directed at giving you information about the structure of the course, grading and assignment information, and what we (the instructors) expect from you. However, we also recognize that there are certain expectations that we need to meet in order for you to have a positive learning experience in this class.

Specifically, we will:

- Be respectful of all persons in the class and create an environment where all opinions and comments are heard and valued.
- Be available outside of class time to discuss course work or other course concerns.
- Encourage you to be well read.
- Provide you with instructional material that will enable you to excel in this class.
- Develop activities that allow you to build your writing skills.
- Assess all assignments fairly and provide suggestions and comments for improvement.

We are excited about this class and look forward to helping you improve as a writer.

Format and Procedures:

Team-Based Learning:

In this class, we will be using a Team-Based Learning (TBL) approach. We will practice the approach in Module Zero during the first week of the semester.

In TBL, you will spend many classes working in teams **applying** what you've learned from the assigned readings. Teams in TBL are different than the kind of group work you may have done in other classes: the instructor forms the teams (as described below) and you will work together throughout the term to complete course assignments and quizzes; team members also evaluate each other's contributions to the group throughout the term.

TBL uses short quizzes to make sure you've got the basics from the required readings. They're not ordinary quizzes, though: you take the quizzes both individually and as a team, so the quizzes function as learning tools. Most classes will involve lecturing but almost every class will have time to apply what we've learned. You will also spend time individually working on your own writing-in-progress before you submit assignments. **We hope you will rely on your teammates for support in the course from the minutiae of when the next RAT is held, to what a Version 1 document 'looks like'.**

Here are the basics of TBL in SCIE311:

1. We'll form teams during the first class meeting. It's an instructor's job to make the teams as diverse as possible, so you will be divided in teams of about six students based on previous courses, your major/year, writing experience, and other factors that will help us form successful teams.
2. For each major Module in the course, you will be assigned some readings, short videos, and animations; we prepared Reading Guides for all assigned readings to help you focus on the most important points. At the beginning of the Module, you will take an individual quiz (~10 multiple-choice questions) called an "Individual Readiness Assessment Test" (iRAT) to see how well you've understood the concepts in the assigned reading. These quizzes will be available on D2L 24 hours before the Module begins. **Missed quizzes may not be written at a later time.**
3. The lecture after having taken the iRAT, you will take the same quiz with your team. This version is called a "Team Readiness Assessment Test" (tRAT). **The whole team earns the same score for the tRAT even if some students are absent.**
4. As described in the Course Outline, we will determine your **Peer Evaluation Score (PES)**. Your tRAT, Team Contract, and in-class responses scores will be multiplied by the PES to determine the final mark for the teamwork component of the course.

What will you write in SCIE311?

Our course is designed so that you can think about writing as a process. You will write and submit milestone *Assignments* leading up to your final paper as Version 3 at the end of the semester: Encountering Academic Integrity, Question Assignment, Paper Plan Assignment, Version 1, Version 2, and Version 3. The last four Assignments are weighted quite heavily and are therefore key milestones in your writing progression. We will, time permitting, hold at least one official peer review session during class time; you should both give and receive peer feedback within your Team throughout the course. Additional in-class and in-tutorial activities will support your writing process.

1. Milestone Assignments

The goal of SCIE 311 is for you to write a brief, well-supported and documented review paper that provides analysis of on a topic of your choice.

Context: Regardless of the type of scientific writing you do, a key skill that you need to develop is identifying related research, then discussing and analyzing the results and conclusions of all of the resources you find, as a single, connected unit.

- Your reference list should be sorted into three sections titled: *Research Papers*, *Review Papers*, and *Other Instructor-Approved Sources*. In class, we will help you identify a Question based on your interests and to find additional articles that allow you to answer the question.
- *Readings* and in-class activities will provide more instruction about how to use evidence from the results and discussion sections of these research papers.

You must use at least six *research papers* that together with your other sources span the history of the topic

- Look at the authors in your list; all of your citations should not come from one research group.
- Look at the dates on your list; established facts in the field will be from your *Review Papers* section or your *Other Instructor Approved* section. The evidence in your body should be mostly from more recent work. The actual dates for these papers will be very much dependent on the pace of research in the field you choose to write about; sometimes, papers that are ten years old are fine, but sometimes papers that are less than two years old are outdated!
- Your TA will help critique your list, but don't hesitate to ask your instructor for advice!

Once you have found suitable resources, you will make notes on the key results and conclusions of the papers, then establish how the papers fit together and answer your research Question. In our library sessions, the librarians will teach you how to do a cited reference search, because this strategy will help you to find the more recent literature that you need. There are many paths that your paper can take and remember: a discovery in one area can allow for scientific discoveries in another!

Your paper needs to present a critical analysis of a segment of a body of knowledge. This kind of analysis is essential for all types of scientific writing – most notably introduction and discussion sections of research papers, field reports and literature reviews.

D2L provides Word templates to complete for all course Assignments.

D2L provides the rubrics for all course Assignments.

Paper Plan Assignment

This milestone assignment will allow you to focus on the important articles and ideas from your information search process and start to build your own interpretation and analysis leading to Version 1. You will critique a sample Plan in lecture. You can review this example and your critique while you are building your own Plan. This kind of planning can help you generate ideas for your writing; consider your interpretations and conclusions from your research thus far in order to identify supporting details and missing pieces. We would like you to be flexible as you work on your Plan and start writing your Version 1, but you will commit to your overall topic as part of the Approval of Topic process that accompanies this assignment.

Version 1 Assignment

This milestone assignment will allow you to focus on **writing paragraphs** and including **evidence** from your cited sources in the body of your paper. You will critique a sample of paper body text in lecture. Your TA will provide a review of your Version 1 and your Instructor will provide feedback and score the paragraph that you think is your best! You should change **the colour of the text** for the paragraph you would like to be scored.

Version 2 Assignment

This milestone assignment will allow you to focus on your **flow and style** while **revising** your body and writing an Introduction. You will critique an example Introduction in lecture. You may write a cover letter to your TA; your TA will provide a review of your Version 2. Your Instructor will provide feedback and score the body paragraph that you think is your best. You should change **the colour of the text** for the paragraph you would like to be scored.

Version 3 Assignment

This milestone assignment is your final paper. You will critique a sample Conclusion and two sample Abstracts in lecture. You will write a cover letter to your TA; your TA will provide a review of this cover letter. Your Instructor will score the entire paper.

2. Additional in-class and in-tutorial activities

Our goals for the activities in this course are all intended to move you forward in your writing and to clarify *communication* of the course outcomes and how you can meet them! Our plans with the activities are *simple*; we ask you to work on the assigned exercises in lecture or tutorial time so that your instructor/TA can review your understanding *before* you need to apply your understanding to the next milestone assignment.

Submissions and grading:

Coursework	Graded by:
RATs	Instructor; PES applied to team work
Reflections	Instructor
In-class responses	Instructor; PES applied to team work
In-tutorial responses	TA
Encountering Academic Integrity Assignment	TA, with the option to resubmit for a better score
Team Contract	Instructor; PES applied
Question Assignment	Instructor
Paper Plan	Instructor
Version 1	Instructor – one paragraph, using one rubric TA – entire work, using a different rubric
Version 2	Instructor – one paragraph, using one rubric TA – entire work, using a different rubric
Version 3	Instructor – entire work, using one rubric TA – cover letter, using a different rubric
ITP metrics peer evaluations	Instructor
Feedback confirmation microconference	TA

Course Requirements:

1. Class Attendance & Scheduled Tutorial Attendance:

- **Arrive** at schedule classes and tutorials on time. Late arrivals and early departures can be disruptive and can result in you missing important information. We understand that there are special circumstances when you may have to arrive late or leave early; please make your arrival/departure as unobtrusive as possible and be sure to let your teammates know about your

situation in advance of class. **The PES score assigned to you by your team members could be based in part on your communication with your team.**

- *Attend* all scheduled classes and tutorials. If you have to miss class, email your Instructor and/or the Course Coordinator ahead of time to find out if alternative arrangements are possible. If you are ill, email your instructor and/or the Course Coordinator as soon as possible and make-up arrangements might be able to be planned. If your email concerns a tutorial session, you should cc to your TA so that s/he knows your situation.
- *Attend* your microconference, and please reschedule it if you are unwell or cannot make the original booked time. We want to ensure that your TA devotes 15 minutes to you alone – as opposed to you in your tutorial group – and confirm that you know how you will proceed with your writing progress.

What happens if you are late for any of these four major assignments?

For the four major assignments (Paper Plan, Version 1, Version 2, Version 3), we aim to balance being **fair** and **reasonable** about deadlines. We know that life happens during the semester:

1. You must submit each of these four assignments to receive credit for subsequent one(s).
2. Let us know as soon as you realize you will be late! Your instructor will be able to help you plan the next steps. You might need an **excused extension (mental or physical health, emergencies, etc.)** and we can plan your subsequent deadlines accordingly.
3. For these four assignments, you can also use one **48 hour postponement** with *no questions asked* if you need it. You do need to let your instructor know that you are cashing in on this policy (See Step 2 above).

*Please come speak with us if you feel like you are about to make a bad decision
with respect to your academic integrity.*

2. Re-grading of Assignments

If you are concerned about the comments on your assignment or have questions about the grade you have earned, you should email the instructor or TA (depending on who marked the assignment). If you think the mark earned is not appropriate, you should write an email letter to the Course Coordinator to present your argument. You must submit this information to the Course Coordinator within the time stated in the course outline. Please note: the assignment may be re-graded by another individual. The mark may go up or it may stay the same. In our experience with Science 311, the mark typically stays the same.
