

COURSE OUTLINE FOR REMOTE LEARNING

1. **Course:** ASTR 207, Intro To Astr I-The Solar System - Spring 2020

Lecture 01: TR 12:00 - 14:45 - Online

Instructor	Email	Phone	Office	Hours
Dr. Denis Leahy	leahy@ucalgary.ca	403 220-7192	SB 529	2:45-3:30pm Tues. and Thurs.

Remote Learning Supplemental Information:

This course is being offered online in real-time via scheduled meeting times, you are required to be online at the same time. Please refer to the details below for more complete information.

Remote Learning Details:

Lectures will be delivered via Zoom (link available in D2L) at the scheduled class-time. Each lecture will be recorded and normally available for viewing by registered students, using a link provided in D2L, one day after the lecture.

Course Site:

D2L: ASTR 207 L01-(Spring 2020)-Intro To Astr I-The Solar System

Note: Students must use their U of C account for all course correspondence.

2. **Requisites:**

See section [3.5.C](#) in the Faculty of Science section of the online Calendar.

No prerequisites. Not open to students with credit in ASTR 205 or ASTR 213, or ASPH 213. Not recommended for physical science majors.

3. **Grading:**

The University policy on grading and related matters is described in [F.1](#) and [F.2](#) of the online University Calendar. In determining the overall grade in the course the following weights will be used:

Component(s)	Weighting %
Homework (Mastering Astronomy)	20
Midterm 1 (online, May 21)	20
Midterm 2 (online, June 2)	20
Final Examination (online, scheduled by the Registrar)	40

Each piece of work (reports, assignments, quizzes, midterm exam(s) or final examination) submitted by the student will be assigned a grade. The student's grade for each component listed above will be combined with the indicated weights to produce an overall percentage for the course, which will be used to determine the course letter grade.

The conversion between a percentage grade and letter grade is as follows.

	A+	A	A-	B+	B	B-	C+	C	C-	D+	D
Minimum % Required	95 %	90 %	85 %	80%	75%	70 %	65 %	60%	55%	50 %	45 %

The midterm exams will be online, with a 2-hour window open for students to start the exam. They will consist of multiple-choice questions with a writing time of 60 minutes, plus 60 minutes to submit your answers to D2L. The percentage score is calculated as the number of correct answers, divided by the number of questions on the test, expressed as a percentage. The scores for the tests are used in the calculation of the final course grade according to the weights listed above.

The Final Exam will be online. It will consist of multiple-choice questions with a writing time of 120 minutes. There will be a 3 hour window to complete the test prior to the end time of the registrar scheduled exam*. The score for the final exam will be calculated as the number of correct answers divided by the number of questions on the exam, expressed as a percentage. The percentage grade for the final exam will be used in the calculation of the course grade with the weight given above.

*For example, if the registrar scheduled your exam from 2-4pm on June 20, 2020, your submission deadline would be 4pm on June 20, 2020.

Additional time will be granted to SAS students, and other accommodation will be done on a case-by-case basis in case of conflict.

Homework. There will be six web-based homework assignments in Mastering Astronomy. There will be a 24 hour period after the due date over which the maximum obtainable grade will decrease to zero. Extensions of the due date require justification in the form of a doctor's note or equivalent.

Students are responsible for accurately and completely entering their personal information in the Mastering Astronomy system. Failure to do so may result in a delay of posting the course grade or a zero grade for the assignments.

We will use the TopHat system during the online classes. In-class TopHat participation is **not** marked.

4. **Missed Components Of Term Work:**

The university has suspended the requirement for students to provide evidence for absences. Please do not attend medical clinics for medical notes or Commissioners for Oaths for statutory declarations.

In the event that a student legitimately fails to submit any online assessment on time (e.g. due to illness etc...), please contact the course coordinator to arrange for a re-adjustment of a submission date. Absences not reported within 48 hours will not be accommodated. If an excused absence is approved, then the percentage weight of the legitimately missed assignment could also be pro-rated among the components of the course.

5. **Scheduled Out-of-Class Activities:**

There are no scheduled out of class activities for this course.

6. **Course Materials:**

Recommended Textbook(s):

Bennett, Donahue, Schneider & Voit, *The Cosmic Perspective - The Solar System, 9th edition*. Addison-Wesley..

Homework assignments are completed using Mastering Astronomy. All students will be provided with a course ID, which is one requirement to register into the Mastering Astronomy system. In addition to the course ID, there are 3 options to access the Mastering Astronomy system:

1. Normal access. Purchase a new textbook at the Campus Bookstore. An access code for Mastering Astronomy will be included. You will have access to the full Mastering Astronomy website including assignments, E-text and study centre.

2. Electronic Text. Purchase an electronic version of the text plus access code to Mastering Astronomy. You will have access to the full Mastering Astronomy website including assignments, E-text and study centre.

3. Assignment only option. Access is given only to the Mastering Astronomy homework assignments, free of charge. You will not have access to the E-text or to the study centre. The instructions for this option will be given in class and posted on the ASTR207 D2L website.

7. **Examination Policy:**

The exams will be held online and will be multiple choice.

Students should also read the Calendar, [Section G](#), on Examinations.

8. **Approved Mandatory And Optional Course Supplemental Fees:**

There are no mandatory or optional course supplemental fees for this course.

9. Writing Across The Curriculum Statement:

For all components of the course, in any written work, the quality of the student's writing (language, spelling, grammar, presentation etc.) can be a factor in the evaluation of the work. See also Section [E.2](#) of the University Calendar.

10. Human Studies Statement:

Students will not participate as subjects or researchers in human studies.

See also [Section E.5](#) of the University Calendar.

11. Reappraisal Of Grades:

A student wishing a reappraisal, should first attempt to review the graded work with the Course coordinator/instructor or department offering the course. Students with sufficient academic grounds may request a reappraisal. Non-academic grounds are not relevant for grade reappraisals. Students should be aware that the grade being reappraised may be raised, lowered or remain the same. See [Section I.3](#) of the University Calendar.

- a. **Term Work:** The student should present their rationale as effectively and as fully as possible to the Course coordinator/instructor within **ten business days** of either being notified about the mark, or of the item's return to the class. If the student is not satisfied with the outcome, the student shall submit the Reappraisal of Graded Term work form to the department in which the course is offered within 2 business days of receiving the decision from the instructor. The Department will arrange for a reappraisal of the work within the next ten business days. The reappraisal will only be considered if the student provides a detailed rationale that outlines where and for what reason an error is suspected. See sections [I.1](#) and [I.2](#) of the University Calendar
- b. **Final Exam:** The student shall submit the request to Enrolment Services. See [Section I.3](#) of the University Calendar.

12. Other Important Information For Students:

- a. **Mental Health** The University of Calgary recognizes the pivotal role that student mental health plays in physical health, social connectedness and academic success, and aspires to create a caring and supportive campus community where individuals can freely talk about mental health and receive supports when needed. We encourage you to explore the mental health resources available throughout the university community, such as counselling, self-help resources, peer support or skills-building available through the SU Wellness Centre (Room 370, MacEwan Student Centre, [Mental Health Services Website](#)) and the Campus Mental Health Strategy website ([Mental Health](#)).
- b. **SU Wellness Center:** For more information, see www.ucalgary.ca/wellnesscentre or call [403-210-9355](tel:403-210-9355).
- c. **Sexual Violence:** The Sexual Violence Support Advocate, Carla Bertsch, can provide confidential support and information regarding sexual violence to all members of the university community. Carla can be reached by email (syasa@ucalgary.ca) or phone at [403-220-2208](tel:403-220-2208). The complete University of Calgary policy on sexual violence can be viewed at (<https://www.ucalgary.ca/policies/files/policies/sexual-violence-policy.pdf>)
- d. **Misconduct:** Academic misconduct (cheating, plagiarism, or any other form) is a very serious offence that will be dealt with rigorously in all cases. A single offence may lead to disciplinary probation or suspension or expulsion. The Faculty of Science follows a zero tolerance policy regarding dishonesty. Please read the sections of the University Calendar under [Section K](#). Student Misconduct to inform yourself of definitions, processes and penalties. Examples of academic misconduct may include: submitting or presenting work as if it were the student's own work when it is not; submitting or presenting work in one course which has also been submitted in another course without the instructor's permission; collaborating in whole or in part without prior agreement of the instructor; borrowing experimental values from others without the instructor's approval; falsification/ fabrication of experimental values in a report. **These are only examples.**
- e. **Academic Accommodation Policy:** Students needing an accommodation because of a disability or medical condition should contact Student Accessibility Services in accordance with the procedure for accommodations for students with disabilities available at [procedure-for-accommodations-for-students-with-disabilities.pdf](#).

Students needing an accommodation in relation to their coursework or to fulfill requirements for a graduate degree, based on a protected ground other than disability, should communicate this need, preferably in writing, to the Associate Head of the Department of Physics & Astronomy, Dr. David Feder by email phas.ahugrd@ucalgary.ca or phone [403-220-8127](tel:403-220-8127). Religious accommodation requests relating to class, test or exam scheduling or absences must be submitted no later than **14 days** prior to the date in question. See [Section E.4](#) of the University Calendar.

- f. **Freedom of Information and Privacy:** This course is conducted in accordance with the Freedom of Information and Protection of Privacy Act (FOIPP). Students should identify themselves on all written work by placing their name on the front page and their ID number on each subsequent page. For more information, see [Legal Services](#) website.
- g. **Student Union Information:** [VP Academic](#), Phone: [403-220-3911](#) Email: suvpaca@ucalgary.ca. SU Faculty Rep., Phone: [403-220-3913](#) Email: sciencerep@su.ucalgary.ca. [Student Ombudsman](#), Email: ombuds@ucalgary.ca.
- h. **Surveys:** At the University of Calgary, feedback through the Universal Student Ratings of Instruction ([USRI](#)) survey and the Faculty of Science Teaching Feedback form provides valuable information to help with evaluating instruction, enhancing learning and teaching, and selecting courses. Your responses make a difference - please participate in these surveys.
- i. **Copyright of Course Materials:** All course materials (including those posted on the course D2L site, a course website, or used in any teaching activity such as (but not limited to) examinations, quizzes, assignments, laboratory manuals, lecture slides or lecture materials and other course notes) are protected by law. These materials are for the sole use of students registered in this course and must not be redistributed. Sharing these materials with anyone else would be a breach of the terms and conditions governing student access to D2L, as well as a violation of the copyright in these materials, and may be pursued as a case of student academic or [non-academic misconduct](#), in addition to any other remedies available at law.

Course Syllabus:

(tentative schedule, updates will be posted on D2L)

May 7: Course Day 1

- 1.1 The Scale of the Universe
- 1.2 The History of the Universe/ 1.3 Spaceship Earth

May 12: Course Day 2

- 14.1 The Sun
- 2.1 Patterns in the Night Sky/ 2.2 The Earth's Seasons

Ass'n 1 due May 13: 23:59

May 14: Course Day 3

- 2.3 The Moon
- 2.4 The Ancient Mystery of the Planets
- 3.1 Ancient Roots of Science/ 3.2 Greek Science

May 19: Course Day 4

- 3.3 The Copernican Revolution
- 3.4 The Nature of Science/ 3.5 Astrology
- S1.1 Astronomical Time Periods

Ass'n 2 due May 20: 23:59

May 21: Course Day 5

- 4.1 Describing Motion / 4.2 Newton's Laws

May 21: Online midterm (length: 60 minutes)

May 26: Course Day 6

- 4.3 Conservation Laws/ 4.4 Law of Gravitation/ 4.5 Orbits and Tides
- 7.1 The Solar System

Ass'n 3 due May 27: 23:59

May 28: Course Day 7

- 7.2 Patterns in the Solar System
- 5.1, 5.2, 5.3 Properties of Light and Matter

June 2: Course Day 8

- 5.4 Learning from Light

6.1 Eyes and Cameras/ 6.2 Telescopes

June 2: Online midterm (length: 60 minutes)

Ass'n 4 due June 3: 23:59

June 4: Course Day 9

6.3 Telescopes and the Atmosphere/ 6.4 Telescopes and technology

7.3 Spacecraft exploration of the solar system

8.1 The Search for Origins

June 9: Course Day 10

8.2 Explaining Features of the Solar System

9.1 Planetary Interiors and Surfaces

9.2 Shaping Planetary Surfaces,

Ass'n 5 due June 10: 23:59

June 11: Course Day 11

9.6 Geology of the Earth;

10.1 Atmosphere Basics 10.2 Weather and Climate

11.1 Jovian Planets

June 16: Course Day 12

12.1 Asteroids

12.2 Meteorites/ 12.3 Comets/ 12.4 Pluto and the Kuiper Belt

12.5 Cosmic Collisions

Ass'n 6 due June 17: 23:59

During exam period: Online Final Exam scheduled by the Registrar (length: 120 minutes)

Course Outcomes:

- Students will be able to describe the features of the solar system and the formation process of the solar system.
- Students will be able to explain how ideas have changed from ancient times to today.
- Students will be able to describe the electromagnetic spectrum; telescopes and detectors, and explain the basic properties of laws of planetary motion; planets, asteroids, comets, and the Sun.

Electronically Approved - Apr 21 2020 11:53

Department Approval

Electronically Approved - May 11 2020 17:06

Associate Dean's Approval for arrangements for remote learning and alternate final examination
