

REVISED COURSE OUTLINE FOR REMOTE LEARNING

To account for the necessary transition to remote learning from March 13 onward, adjustments have been made to assessment deadlines and requirements so that all coursework tasks are in line with the necessary and evolving health precautions for all involved (students and staff). If you are unable to meet the deadlines or requirements specified, please connect with your course instructor to work out alternative dates/assessments.

1. **Course:** PHYS 611, Statistical Physics - Winter 2020

Lecture 01: MWF 11:00 - 11:50 - Remote Learning (check with your instructor or coordinator for details)

Instructor	Email	Phone	Office	Hours
Dr. Claudia Gomes da Rocha	claudia.gomesdarocha@ucalgary.ca	403 220-7023	SB 537	by appointment

Course Site:

D2L: PHYS 611 L01-(Winter 2020)-Statistical Physics

Note: Students must use their U of C account for all course correspondence.

2. **Requisites:**

See section [3.5.C](#) in the Faculty of Science section of the online Calendar.

3. **Grading:**

The University policy on grading and related matters is described in [F.1](#) and [F.2](#) of the online University Calendar. In determining the overall grade in the course the following weights will be used:

Component(s)	Weighting %	Date
Homework assignments	35	
Midterm exam	20	(Wednesday, March 4, in-class)
Final exam (Take-home assignment)	45	(due April 25)

Each piece of work (reports, assignments, quizzes, midterm exam(s) or final examination) submitted by the student will be assigned a grade. The student's grade for each component listed above will be combined with the indicated weights to produce an overall percentage for the course, which will be used to determine the course letter grade.

The conversion between a percentage grade and letter grade is as follows.

	A+	A	A-	B+	B	B-	C+	C	C-	D+	D
Minimum % Required	95 %	90 %	85 %	80%	75%	70 %	65 %	60%	55%	50 %	45 %

4. **Missed Components Of Term Work:**

The University has suspended requirements for students to provide evidence for reasons for absences so please do not attend medical clinics for medical notes or Commissioners for Oaths for statutory declarations. Please let your instructor know immediately if you are ill and cannot meet the deadlines specified.

5. **Scheduled Out-of-Class Activities:**

There are no scheduled out of class activities for this course.

6. **Course Materials:**

Required Textbook(s):

Mehran Kardar, *Statistical Physics of Particles*: Cambridge University Press.

7. Examination Policy:

No aids are allowed on the midterm. Final examination will consist of a take-home assignment covering all course content. The take-home assignment will be uploaded on 15 April 2020 on D2L and its due date is 27 April 2020. Students will be able to consult and research any material.

Students should also read the Calendar, [Section G](#), on Examinations.

8. Approved Mandatory And Optional Course Supplemental Fees:

There are no mandatory or optional course supplemental fees for this course.

9. Writing Across The Curriculum Statement:

For all components of the course, in any written work, the quality of the student's writing (language, spelling, grammar, presentation etc.) can be a factor in the evaluation of the work. See also [Section E.2](#) of the University Calendar.

10. Human Studies Statement:

Students will not participate as subjects or researchers in human studies.

See also [Section E.5](#) of the University Calendar.

11. Reappraisal Of Grades:

A student wishing a reappraisal, should first attempt to review the graded work with the Course coordinator/instructor or department offering the course. Students with sufficient academic grounds may request a reappraisal. Non-academic grounds are not relevant for grade reappraisals. Students should be aware that the grade being reappraised may be raised, lowered or remain the same. See [Section I.3](#) of the University Calendar.

- a. **Term Work:** The student should present their rationale as effectively and as fully as possible to the Course coordinator/instructor within **ten business days** of either being notified about the mark, or of the item's return to the class. If the student is not satisfied with the outcome, the student shall submit the Reappraisal of Graded Term work form to the department in which the course is offered within 2 business days of receiving the decision from the instructor. The Department will arrange for a reappraisal of the work within the next ten business days. The reappraisal will only be considered if the student provides a detailed rationale that outlines where and for what reason an error is suspected. See sections [I.1](#) and [I.2](#) of the University Calendar
- b. **Final Exam:** The student shall submit the request to Enrolment Services. See [Section I.3](#) of the University Calendar.

12. Other Important Information For Students:

- a. **Mental Health** The University of Calgary recognizes the pivotal role that student mental health plays in physical health, social connectedness and academic success, and aspires to create a caring and supportive campus community where individuals can freely talk about mental health and receive supports when needed. We encourage you to explore the mental health resources available throughout the university community, such as counselling, self-help resources, peer support or skills-building available through the SU Wellness Centre (Room 370, MacEwan Student Centre, [Mental Health Services Website](#)) and the Campus Mental Health Strategy website ([Mental Health](#)).
- b. **SU Wellness Center:** The Students Union Wellness Centre provides health and wellness support for students including information and counselling on physical health, mental health and nutrition. For more information, see www.ucalgary.ca/wellnesscentre or call [403-210-9355](tel:403-210-9355).
- c. **Sexual Violence:** The University of Calgary is committed to fostering a safe, productive learning environment. The Sexual Violence Policy (<https://www.ucalgary.ca/policies/files/policies/sexual-violence-policy.pdf>) is a fundamental element in creating and sustaining a safer campus environment for all community members. We understand that sexual violence can undermine students' academic success and we encourage students who have experienced some form of sexual misconduct to talk to someone about their experience, so they can get the support they need. The Sexual Violence Support Advocate, Carla Bertsch, can provide confidential support and information regarding sexual violence to all members of the university community. Carla can be reached by email (svsa@ucalgary.ca) or phone at [403-220-2208](tel:403-220-2208).
- d. **Misconduct:** Academic misconduct (cheating, plagiarism, or any other form) is a very serious offence that will be dealt with rigorously in all cases. A single offence may lead to disciplinary probation or suspension or expulsion. The Faculty of Science follows a zero tolerance policy regarding dishonesty. Please read the sections of the University Calendar under [Section K](#). Student Misconduct to inform yourself of definitions,

processes and penalties. Examples of academic misconduct may include: submitting or presenting work as if it were the student's own work when it is not; submitting or presenting work in one course which has also been submitted in another course without the instructor's permission; collaborating in whole or in part without prior agreement of the instructor; borrowing experimental values from others without the instructor's approval; falsification/ fabrication of experimental values in a report. **These are only examples.**

- e. **Assembly Points:** In case of emergency during class time, be sure to FAMILIARIZE YOURSELF with the information on [assembly points](#).
- f. **Academic Accommodation Policy:** Students needing an accommodation because of a disability or medical condition should contact Student Accessibility Services in accordance with the procedure for accommodations for students with disabilities available at [procedure-for-accommodations-for-students-with-disabilities.pdf](#).

Students needing an accommodation in relation to their coursework or to fulfill requirements for a graduate degree, based on a protected ground other than disability, should communicate this need, preferably in writing, to the Associate Head of the Department of Physics & Astronomy, Dr. David Feder by email phas.ahugrd@ucalgary.ca or phone 403-220-8127. Religious accommodation requests relating to class, test or exam scheduling or absences must be submitted no later than **14 days** prior to the date in question. See [Section E.4](#) of the University Calendar.
- g. **Safewalk:** Campus Security will escort individuals day or night (See the [Campus Safewalk](#) website). Call [403-220-5333](tel:403-220-5333) for assistance. Use any campus phone, emergency phone or the yellow phones located at most parking lot pay booths.
- h. **Freedom of Information and Privacy:** This course is conducted in accordance with the Freedom of Information and Protection of Privacy Act (FOIPP). Students should identify themselves on all written work by placing their name on the front page and their ID number on each subsequent page. For more information, see [Legal Services](#) website.
- i. **Student Union Information:** [VP Academic](#), Phone: [403-220-3911](tel:403-220-3911) Email: suvpaca@ucalgary.ca. SU Faculty Rep., Phone: [403-220-3913](tel:403-220-3913) Email: sciencerep@su.ucalgary.ca. [Student Ombudsman](#), Email: ombuds@ucalgary.ca.
- j. **Internet and Electronic Device Information:** Unless instructed otherwise, cell phones should be turned off during class. All communication with other individuals via laptop, tablet, smart phone or other device is prohibited during class unless specifically permitted by the instructor. Students that violate this policy may be asked to leave the classroom. Repeated violations may result in a charge of misconduct.
- k. **Surveys:** At the University of Calgary, feedback through the Universal Student Ratings of Instruction ([USRI](#)) survey and the Faculty of Science Teaching Feedback form provides valuable information to help with evaluating instruction, enhancing learning and teaching, and selecting courses. Your responses make a difference - please participate in these surveys.
- l. **Copyright of Course Materials:** All course materials (including those posted on the course D2L site, a course website, or used in any teaching activity such as (but not limited to) examinations, quizzes, assignments, laboratory manuals, lecture slides or lecture materials and other course notes) are protected by law. These materials are for the sole use of students registered in this course and must not be redistributed. Sharing these materials with anyone else would be a breach of the terms and conditions governing student access to D2L, as well as a violation of the copyright in these materials, and may be pursued as a case of student academic or [non-academic misconduct](#), in addition to any other remedies available at law.

DETAILED COURSE SYLLABUS

Catalog description: classical and quantum ensemble theory applied to interacting systems: real gases, spin systems, phase transitions. Kinetic theory: Boltzmann equation, transport processes, irreversible processes and fluctuations. Specifically, we will cover:

1. Thermodynamics: the zeroth law, the first law, the second law, Carnot engines, entropy, thermodynamic potentials;
2. Probability theory: random variables, probability distributions, central limit theorem, rules for large numbers, information and entropy;

3. Kinetic theory: Liouville's theorem, BBGKY hierarchy, Boltzmann equation, H-theorem, conservation laws;
4. Classical statistical mechanics: microcanonical ensemble, two-level systems, ideal gas, mixing entropy and Gibbs paradox, canonical ensemble, grand canonical ensemble;
5. Interacting systems: cumulant expansion, cluster expansion, van der Waals equation;
6. Quantum statistical mechanics: dilute polyatomic gas, vibrations of a solid, black body radiation, quantum microstates, quantum macrostates;
7. Ideal quantum gas: identical particles, canonical formulation, grand canonical formulation, non-relativistic gas, degenerate Fermi gas, degenerate Bose gas, Bose-Einstein condensation;
8. Introduction to phase transitions and critical phenomena (time permitting): Ising model, transfer matrix method, mean-field theory, Landau theory.

In addition to our textbook, the following are useful reference books:

- (a) Callen, H. B. Thermodynamics and an Introduction to Thermostatistics, 2d ed., Wiley (2001). ISBN-10:0471862568.
- (b) Toda, M., Kubo, R., Saitō, N. Statistical physics, Springer, 1991. ISBN: 3540536620, 9783540536628.
- (c) Landau, L. D., and E. M. Lifshitz. Statistical Physics. Part 1. 3rd ed. New York, NY: Pergamon, 1980. ISBN: 0080230385.
- (d) Reif, F., ed. Fundamentals of Statistical and Thermal Physics. New York, NY: McGraw-Hill, 1965.
- (e) Stanley, H. Eugene. Introduction to Phase Transitions and Critical Phenomena. New York, NY: Oxford University Press, 1971. ISBN: 0195014588.
- (f) Reichl, Linda E. A Modern Course in Statistical Physics. 2d ed., Wiley (1998). ISBN-10: 0471595209.
- (g) Plischke, M., Bergersen, B. Equilibrium Statistical Physics, World Scientific, 2005. ISBN: 9812560483, 9789812560483.
- (h) Christensen, K., Moloney, N. R. Complexity and Criticality, World Scientific Publishing; 1 edition (Oct. 4 2005).

Further references and course related material will be given in class or posted on D2L.

Homework assignments and final take-home assignment

There will be several homework assignments (including reading assignments) over the term, which will typically be posted on D2L together with their respective due dates. These are the backbone of the course; it is through these assignments that you will build up and apply your understanding of the various concepts and techniques. Please, keep in mind that your two main goals in writing up your homework are: (i) to be clear so that I can understand what you have written, (ii) to demonstrate insight. Writing clearly means using readable handwriting. If one cannot read and understand your assignments easily, you will get little or no credit. You are allowed to collaborate on the homework assignments (this is realistic, scientists collaborate all the time in research) but as much as possible you should attempt the assignments on your own since you will learn the most that way. Whether or not you collaborate, you must write up your homework (including the final take-home assignment) on your own, in your own words, and with your own understanding. Failure to write your homework in your own words can lead to severe academic penalties.

If you use Mathematica or any other software package in a homework assignment, please do not give me the output of your entire session. Instead, give me enough output to convince me that you have answered the question correctly. You should also include any source code that you write so that I can try to understand how you obtained your answers.

Midterm exam

This will be a 50-minute closed-book exam on Wednesday, March 4, during regular class hours.

Important dates for Winter 2020

Visit <https://www.ucalgary.ca/pubs/calendar/current/academic-schedule.html> for detailed information.

M 13 Jan: Lectures begin
 Th 23 Jan: Drop date deadline
 F 24 Jan: Add date deadline
 F 31 Jan: Fee payment deadline

Su 16 Feb to Sa 22 Feb: Term break, no classes
M 17 Feb: Alberta Family Day (recognized holiday)
W 15 Apr: Lectures end
F 10 Apr: Good Friday (recognized holiday)
Sa 18 Apr to W 29 Apr: Final exam period

Electronically Approved - Mar 18 2020 15:25

Department Approval

Electronically Approved - Mar 18 2020 17:35

Associate Dean's Approval for alternate final examination arrangements or remote learning
